Extended-Season Produce Key To Keeping Customer Relations

ANDY ANDREWS
Lancaster Farming Staff

HERSHEY (Dauphin Co.) — While interest in organic farming and growing fruits and vegetables for the "niche" market increases, growers need to listen to the manager of a successful south central growers' cooperative.

"Our growth has not come in finding more customers, but supplying existing customers with what they want over a long period of time," said Chris Fullerton, Tuscarora Organic Growers Cooperative, Hustontown.

Fullerton spoke Wednesday afternoon during a special session on farmers' markets, auctions, and cooperatives at the 2000 Mid-Atlantic Fruit and Vegetable Convention at the Hershey Lodge and Convention Center.

Fullerton noted that the cooperative, founded in 1988, has grown to include 20 grower-members who work with 25 farmers to supply restaurant managers and retailers in the Washington, D.C. area.

The cooperative, with growers on both sides of the Tuscarora Mountain in south central Pennsylvania, began with the help of grower Jim Crawford. All the family farms are small, with the largest grower comprising less than 100 acres, and most in the

Recent inclement weather held attendance down the day the Mid-Atlantic Fruit and Vegetable Convention opened Tuesday in Hershey. But by Wednesday more growers and agri-industry representatives were on hand to tour the exhibits. *Photo by Andy Andrews*

Mt. Joy Dairy Co-op Increases Milk Handled

EVERETT NEWSWANGER
Editor

NEW HOLLAND (Lancaster Co.) - After several postponements early in the week because of the snow storm, Mt. Joy Farmers Cooperative members held their one annual meeting on Thursday at Yoder's, and were scheduled to hold the second annual meeting at the Gathering Place in Mt. Joy, Friday after publication of this issue of *Lancaster Farming*.

Officials again reported a good year for the cooperative. At the meeting last year, milk prices were at an all-time high, this year at a 20-year low. And the outlook is for low prices for the next several months with hope for improvement later in the year.

Overall, the average gross milk price paid to Mt. Joy patrons for 1999 was $15.50 per hundredweight, the highest in the history of the Cooperative. Net price to patrons was $14.75, the highest in the last four years. Management was able to keep the operating costs to 59 cents per hundredweight, the same as

(Turn to Page A25)

Russell Shopp of York County has donated a Dunloggin dispersal catalog to be auctioned off during the upcoming Pennsylvania Holstein Convention. The Junior Holstein Convention is Feb. 4-6, and the annual Convention and Sale will be held Feb. 17-18. See story on page B12. *Photo by Jayne Sebright*

Dairy Of Distinction Is Public Relations Tool For Farm And Industry

JAYNE SEBRIGHT
Lancaster Farming Staff

STATE COLLEGE (Centre Co.) — Perception is reality. For the urban public, what they see when they drive by neighboring farms affects what they think about the foods they eat.

Since 1983, the Dairy of Distinction program has honored dairy farmers for keeping their farms neat and clean. Non-farmers who drive by these pristine-looking farms are left with a positive message about dairy products.

"It's an excellent way to promote milk," said Janet Hileman, District 14 Coordinator. "When urban people come and see these attractive farms, they think, 'Gee, drinking milk from that farm would be a delight.' "

Hileman and her committee made up of one person from each of the six counties in District 14 actually visit attractive-looking farms and encourage the farmers to apply. Last year District 14 had 15 applicants and nine winners in the program.

"It's an incentive for the farmer to keep the farm nice," said Hileman. "We acknowledge the farmer for their hard work because it can be costly and time-consuming. But it's worth it."

Brenda Zimmerman agrees. She and her husband, Paul, were awarded Dairy of Distinction in District 19 last year. They own a 83-acre dairy farm in Lititz and milk around 90 cows.

"I saw the Dairy of Distinction signs at other places, and I always thought that those people were going over and beyond what the average farmer

(Turn to Page A32)

Corn Talk Includes Hybrid Reports, Conference Preview

This week's *Lancaster Farming* includes *Corn Talk*, the newsletter of the Pennsylvania Master Corn Growers Association (PMCGA). The issue features a preview of the upcoming corn and soybean conference, the 1999 Pennsylvania hybrid corn reports, an upcoming list of corn grower meetings and activities, and other news of interest to the grower. Also scheduled are comments from the PMCGA and advertising messages.

CALVES Due to the hazardous road conditions, there were not enough calves on offer for a market test

New Holland Livestock Auction

New Holland, Pa.
Report Supplied By USDA
Thursday, January 27, 2000

	Cattle	Calves	Sheep	Goats
THURSDAY				
	1109	1080	75	111
LAST WEEK				
	984	512	129	80
LAST YEAR				
	1083	735	354	304

CATTLE: Compared to Tuesday, slaughter steers and heifers sold mostly steady with a definite weakness noted on a large number of late arrivals that were hampered by poor backroad conditions. Supply was attractive and demand was fairly good, but slow trading kept the market from reaching its potential. A good run of Holstein steers sold .50-1.00 higher. There were not enough slaughter cows on Tuesday for a comparison, but prices were 1.00 than last week. Slaughter bulls sold sharply higher, as bulls have been scarce this past week. Supply included 36 pct slaughter steers and 50 pct slaughter cows.

SLAUGHTER STEERS: High Choice and Prime 2-4 1190-1525 lbs 70.50-74.25. Choice 2-3 1080-1485 lbs 68.75-71.50 with late sales down to 68.00, high dressing X- bred 1-2 71.50-73.25; 1520-1625 lbs 65.75-68.75. Select and low Choice 2-3 1010-1525 lbs 64.50-69.00; 1560-1770 lbs 61.25-64.25. Select 1-3 1070-1350 lbs 63.75-67.00.

HOLSTEIN STEERS: High Choice and Prime 2-3 1350-1695 lbs 60.10-64.00. Choice 2-3 1380-1775 lbs 58.25-62.25. Select and low Choice 2-3 1170-1730 lbs 54.75- 59.00. Few Select 1-2 1230-1430 lbs 52.00-55.25.

SLAUGHTER HEIFERS: Choice, few Prime 2-4 1110-1355 lbs 67.50-70.50, low dressing 4-5 1235-1290 lbs 64.75-65.60. Select and low Choice 2-3 1160-1520 lbs 63.85-66.10. Few Select 1-3 1050-1380 lbs 60.00-64.00.

SLAUGHTER COWS: PERCENT LEAN WEIGHT BULK LOW DRESSING Breakers 75-80 pct lean over-1400 lbs 42.00-46.00 38.50-42.50 Boners 80-85 pct lean over-1200 lbs 38.50-42.75 36.25-39.00 Lean (Hi-Yield) 85-88 pct lean over-1200 lbs 37.50-40.25 34.50-37.50 Lean 88-90 pct lean over-1000 lbs 35.00-38.75 31.75-35.50 Lean (Light-Wt) 85-90 pct lean 750 -1000 lbs 33.00-36.75 28.75-33.00.

SLAUGHTER BULLS: Yield Grade 1 1395-1785 lbs 54.25-59.00. Yield Grade 2 1130- 1920 lbs 48.00-54.50. Bullocks: Couple Choice 2-3 1290-1300 lbs 62.00-62.25. Select 1-3 915-1470 lbs 52.00-59.00.

CALVES: Compared to Monday's auction, a good test of veal calves sold 5.00- 15.00 higher on increased demand by interests outside the area. Larger slaughter calves were not well tested. There was a large supply of Holstein calves to return to feed, due to the winter storm that limited movement earlier in the week. Holstein bulls sold steady to 13.00 lower than Monday, even on the larger offering. Holstein heifer prices were steady to firm with a greater variety of heifers than on Monday. Supply included 650 head in the State graded sale and 90 percent returned to feed.

VEALERS: Good and Choice 70-110 lbs 30.00-46.00. Standard and low Good 60-90 lbs 11.00-30.00.

SLAUGHTER CALVES: Few Good and Choice 200-350 lbs 90.00-105.00.

RETURNED TO FARM: Holstein bulls 80-125 lbs 140.00-157.00. Plainer-type bulls 75-125 lbs 88.00-145.00, weaker calves down to 40.00. Holstein heifers 80-120 lbs 270.00-335.00. Plainer heifers 75-100 lbs 180.00-270.00; 60-75 lbs 100.00-180.00.

SHEEP: There were not enough slaughter lambs or ewes for a good market test and posted prices would not have held up under heavier receipts.

SLAUGHTER LAMBS: Choice and Prime 2-3 50-90 lbs 95.00-137.00, few fancy up to 175.00; 90-120 lbs 80.00-110.00; 120-145 lbs 69.00-80.00.

	CATTLE	CALVES
THIS WEEK	1573	1310
LAST WEEK	1881	1430
LAST YEAR	2225	1826

CATTLE: Compared to last week's closing prices, a light test of slaughter steers and heifers sold mostly steady. The entire Northeast was dominated by this week's huge winter storm. Livestock movement was very difficult as most local areas received anywhere from a foot to as much as 20 inches of snow. Western feedlot cattle sold mostly 1.00 lower this week from 67.00-68.00 live and 107.00-108.00 dressed. Boxed beef values also lost ground this past week, but beef promotion must be finally paying off as the NCBA reported a 3.5 percent increase in beef demand, after 20 years of declining. Local Holstein steers closed .50-1.00 higher than last week. The slaughter cow market benefited from the snow as buyers scrambled for cows. Prices ended 1.00 higher, after selling sharply higher on light receipts early in the week. Slaughter bulls closed sharply higher on a very thin test. Supply included 39 percent slaughter steers, 6 percent slaughter heifers, 42 percent slaughter cows, 4 percent bulls, with the balance feeders.

SLAUGHTER STEERS: High Choice and Prime 2-4 1190-1490 lbs 70.35-74.25. Choice 2-3 1080-1495 lbs 68.75-71.60, high dressing 1-2 up to 73.25; 1520-1625 lbs 65.75-68.75. Select and low Choice 2-3 1010-1545 lbs 64.50-69.35. Select 1-3 1070-1350 lbs 63.75-67.00.

HOLSTEIN STEERS: High Choice and Prime 2-3 1350-1695 lbs 60.10-64.00. Choice 2-3 1380-1775 lbs 58.25-62.25. Select and low Choice 2-3 1160-1730 lbs 53.75- 59.00. Few Select 1-2 1230-1430 lbs 52.00-55.25.

Delmarva Broiler

ATLANTA, GA.
JANUARY 27, 2000

DELMARVA BROILER/FRYER MARKET. FEDERAL-STATE

Movement of ready-to-cook whole birds was just fair at best; however, offerings were limited due to the recent plant closings brought about by adverse weather conditions. Live supplies were moderate to heavy; weights were often heavier than desired. Processing schedules were moderately heavy and several plants were expecting to operate this Saturday. Less than truckiot asking prices were 1 cent higher at 46 to 58 cents. Trade sentiment was steady to firm, sometimes cautious. In the parts complex, Boneless skinless breasts and bone-in breast were in short supply. Leg items were adequate. Wings were in excess.

ESTIMATED SLAUGHTER OF BROILER/FRYERS IN DELMARVA (000)

ESTIMATED ACTUAL AVG. WEIGHT ACTUAL AVG. WEIGHT
01/27 01/25 01/25 01/20 01/18

NY Phil Frozen Eggs

ATLANTA, GA.
JANUARY 21, 2000

EASTERN REGION FROZEN EGGS, JANUARY 21, 2000. FEDERAL-STATE

Prices were unchanged to higher on whites, whole unchanged, and yolks unchanged to lower when compared to a week earlier. Undertone was in a full range with whites firm and yolks weak. Liquid and frozen eggs (ingredients included) processed under federal inspection in the Eastern region for the week ending January 15, 2000 were 11 % less than last week, and 2 % more than a year ago. Shell egg supplies were sufficient for trade needs.

ATLANTA, GA.
JANUARY 27, 2000

NORTHEAST BROILER/FRYER PARTS - PART I FEDERAL-STATE

Trucklot buying activity was generally moderate as most locations were recovering from this week's winter storm. Due to plant closings earlier this week, offerings were generally tight to adequate with breast items in the shortest position. Wings, however, were more than adequate. Retail and distributive movement continued slow. The market tone was firm on breast items, weak on wings and at least steady on the balance.

PRICES PAID PER POUND, ICE PACKED AND CO2 PACKED BROILER/FRYER PARTS, DELIVERED TO FIRST RECEIVERS IN POOL TRUCKLOT AND TRUCKLOT QUANTITIES.

ITEM CURRENT NEGOTIATED TRADING*

BREAST - B/S 140-145 TENDERLOINS 115 BREAST - WITH RIBS 68-69 BREAST - LINE RUN 68 LEGS 26-27 LEG QUARTERS (BULK) 16-17 DRUMSTICKS 34-35 THIGHS 21-22 B/S THIGHS 70-71 WINGS (WHOLE) 70-71 BACKS AND NECKS (STRIPPED) 10-12 LIVERS (5 POUND TUBS) 30-35 GIZZARDS (HEARTS) 55-60

National Egg Market

ATLANTA, GA
JANUARY 26, 2000

NATIONAL EGG MARKET - AT A GLANCE

Prices were unchanged. The market tone was about steady. Demand continued light to moderate in most areas, but was occasionally better where limited feature activity and wintery conditions stimulated consumer activity. Supplies were mostly adequate to available. Breaking stock supplies were adequate to ample from regular sources, and demand for additional product remained light. Light type fowl were fully sufficient for current processors' schedules.

National Grain Market

St. Joseph, MO
Wed Jan 26, 2000

USDA-MO Dept Ag Market News

Daily National Grain Market Summary

Profit taking, weather conditions, and slow export sales drove grain and soybean bids lower. Wheat 2 to 6 cents lower. Corn 3 to 6 cents lower. Sorghum 8 cents lower. Soybeans 3 to 5 cents lower. Very light export sales overnight for wheat kept pressure on wheat bids. More precipitation is forecast for northern and southern Plains areas this week. Corn and soybean bids were sharply lower due to profit taking on the Board and rain forecast for Brazil and Argentina. Export sales have been very sluggish this week. Producer selling remains light. Heavy snows and icy conditions continued to paralyze the eastern part of the US. USDA has been shut down for two days and export sales and Census reports have been delayed.

EXPORT SALES: PURCHASER COMMODITY TONNAGE DELIVERY DATE South Korea 11.5 pct Hard Red Winter Wheat 3,000 Apr/May 14.0 pct DN Spring Wheat 1,800 Soft White Wheat 4,200

The OLD FARMER'S ALMANAC THIS WEEK WITH

JAN. 31-FEB. 6, 2000

NEW MOON, FEBRUARY 5.

LEAPING THE CENTURIES

The year 2000 is a leap year, but did you know that 1900 was not a leap year, nor was 1800 or 1700? The last century year to have the 29th day in February was 1600. Most people credit Julius Caesar with the leap year plan when he reformed the calendar system in 46 B.C. In fact, however, a Greek named Sosigenes gave him the idea. By 1582, the accumulated error in the Julian system amounted to about ten days, which were dropped when the Gregorian calendar was introduced. By this system, leap years are those divisible by 4 (as with 1996), but century years must be divisible by 400 to be leap years.

You can't measure time in days . . . because every day is different. – Jorge Luis Borges

TIP OF THE WEEK

☛ **Under-the-bed containers are great for storing bed linens and off-season clothing.**

ONION SOUP WITH MISO

- 2 tablespoons EACH butter and olive oil, plus extra
- 3 cups sliced yellow onions
- 4 cloves garlic, minced
- 1 tablespoon Dijon-style mustard
- 6 cups beef stock
- 3 tablespoons miso
- 2 teaspoons fresh thyme, OR 1 teaspoon dried
- 1 small loaf French bread, sliced
- 4 tablespoons EACH grated Parmesan and mozzarella

Heat butter and olive oil in a large soup pot, add onions and garlic, and sauté until golden. Stir in mustard, beef stock, miso, and thyme. Simmer for 30 minutes, but do not boil. Meanwhile, butter bread and sprinkle with olive oil. Lightly toast the slices. Ladle soup into four bowls, top each with a bread slice, and sprinkle with cheese mixture. Place under broiler briefly to melt cheese.

Makes 4 servings.

The OLD FARMER'S WEATHER PROVERBS

If there is snow on St. Brigid's Day (Feb. 1), the ditches will be filled with rain, come spring.

As far as the Sun shines in at the window on Candlemas Day (Feb. 2), so deep will the snow be ere winter is gone

February 2 bright and clear gives a good flax year.

Oklahoma City Feeder Cattle

Oklahoma City, OK
Wed Jan 26, 2000

USDA-OK Dept Ag Market News
Oklahoma National Stockyards - Weekly Cattle Summary

Compared to last week: Feeder steers and steer calves steady to 2.00 lower with least decline on under 725 lbs. Feeder heifers and heifer calves 2.00-4.00 lower. Demand good for all classes. Large front end supply of slaughter ready cattle next three to four weeks is pressuring prices downward and having a domino effect on the feeder market. Local farmer demand is off some as moisture is needed for wheat and spring grass prospects. Quality average. Feeder cattle in slightly thin to moderately fleshy conditions; calves in thin to medium flesh. Weigh-ups gaunt to average. Slaughter cows and bulls 1.50-2.00 higher. Packer demand good. Impending winter storm slated for midweek through early next week has packers concerned for numbers. Country demand continues good for bred cows and pairs. Total of 420 cows and bulls sold with 35 percent to packers. Receipts this week 11,875; last week 15,662; last year 9,833. Supply consisted of 72 percent yearlings and calves over 600 lbs; 24 percent calves under 600 lbs; 4 percent cows and bulls. Heifers comprised 34 percent of feeder and calf supply. Prices follow with weighted average weight and price in parenthesis.

Feeder Steers Medium and Large 1 350-400 lbs (375 lb) 107.00-114.50 (111.21); 400-450 lbs (431 lb) 108.00-116.00 (111.94); 450-500 lbs (469 lb) 106.00-111.00 (109.30); 500-550 lbs (530 lb) 96.50-99.25 (97.16); 550-600 lbs (578 lb) 91.00-97.00 (94.72); 600-650 lbs (632 lb) 89.00-95.50 (91.69); 650-700 lbs (677 lb) 87.25-93.75 (90.09); 700-750 lbs (724 lb) 84.00-92.25 (88.75); 750-800 lbs (777 lb) 81.00- 88.75 (84.85); 800-850 lbs (814 lb) 78.00-85.10 (81.56); 850-900 lbs (874 lb) 75.75-82.00 (78.35); 900-950 lbs (926 lb) 75.25-77.35 (76.52); 950-1000 lbs (968 lb) 74.00-77.10 (75.99); Holstein: Large 2: 600-650 lbs (610 lb) 65.00; 750-800 lbs (775 lb) 63.00; 800-850 lbs 61.50-61.75; 850-900 lbs (875 lb) 58.75.

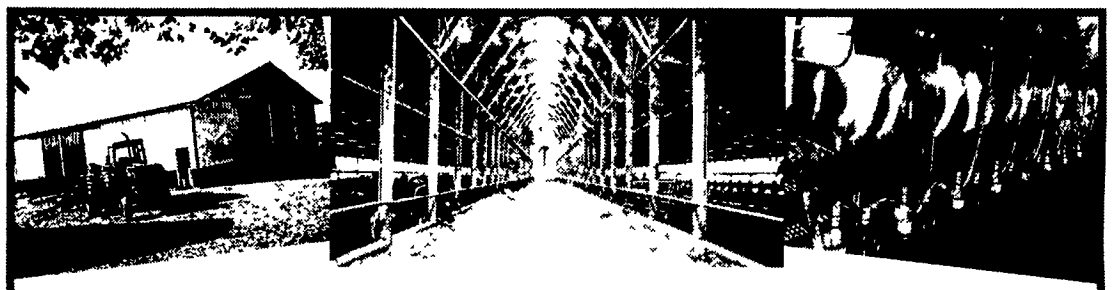
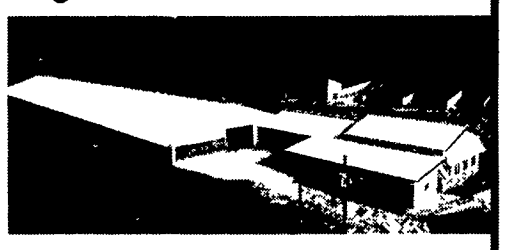
NO WESTMINSTER HAY SALE JAN. 25 DUE TO SNOW STORM.



The **Building** you want.
The **Lease** you need.



Telmark has been leasing equipment for over 30 years. Did you know that we've been leasing new buildings for that long too? Consider:

- **Tax deductibility and accelerated write-offs:** Lease payments are income tax deductible over the term of the lease compared to **20-year** depreciation of farm buildings and **39-year** depreciation of commercial buildings. **Could reduce tax liability this year.**
- **Low upfront costs:** As little as one monthly lease payment.
- **Flexible lease term:** Building lease terms from five to fifteen years.
- **Customized payment schedules**: Lease payment schedules are specially designed to match your cash flow.

First: *Talk with a qualified builder to determine your needs and building cost.*
Then: *Call your Telmark representative for your financing.*

Lancaster Farming

OPINION

Sacrifices On The Altar Of Political Expediency

Amid a lot of talk about urban development running over America's farmland, a new study by Reason Public Policy Institute (RPPI) reveals that farmland loss rates often have more to do with governmental policies than urban sprawl.

Many governmental policies make farmland preservation more problematic and economic survival on the farm more difficult. While much farmland has been developed especially in places like Southeast Pennsylvania, other lost farmland has been converted to other "quality of life" uses such as parks, recreational land, pastureland, and forests. Nationally, according to RPPI, of the total decline in cropland between 1949 and 1992, less than 25% can be attributed to urbanization. The remaining 75% were lost due to changes in farming population and income.

RPPI argues that a number of poorly designed governmental policies actually fuel the inefficient conversion of farmland. Some of these policies include:

- Estate taxes which can prevent farming families from keeping their land after the death of a parent;
- business-specific subsidies and tax-incentive programs which distort market prices; and
- one-size-fits-all zoning rules that discourages flexible development and increases the pressure to develop outward, often at the expense of farmland.

Locally, Lancaster County has become a model for preserving open space and farmland without the intrusive restrictions on property rights. The creation of private land trusts and conservation easements encourages the orderly transfer of land from one generation to the next.

But we still believe the real salvation of farmland can come only if and when farming is profitable to the operator of the farm. Until this profitability is evident on the average farm, all other remedies are simply sacrifices on the altar of political expediency.

Now Is The Time

By John Schwartz

Lancaster County Agricultural Agent

To Look At Corn Trivia Facts

Today's modern corn farmer can produce a bushel of corn with less than two minutes of labor using tractors and other equipment, reports Robert Anderson, Lancaster County Extension Agronomy Agent. According to the Corn Book published in 1956, early settlers spent 10 to 12 hours to produce each bushel of corn.

In 1904, The Book of Corn, reported one man can easily husk 50 to 55 bushels of corn a day. To put some of these numbers into perspective, in 1998 Lancaster County farmers grew 183,000 acres of corn with an average yield of 133 bushels per acre or about 24.339 million bushels. Using the old methods it would take 268 million hours of labor to produce this corn. If a man works 2,000 hours per year, it would take 134,000 man years to grow and harvest the corn crop. However, with modern technology and equipment, it takes less than 370 man years of work to produce the crop. That is 133,630 man years of labor saved with modern technology.

The number of workers required just to husk the 1998 corn crop between October and end of December using 1904 methods would be 5,642 people. Today it takes about 4 hours to grow and harvest 1 acre of corn according to Penn State Agronomy Guide.

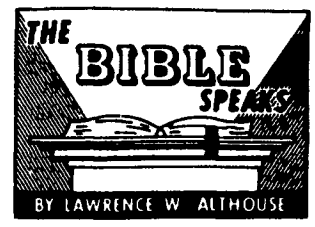
To Consider These Thoughts

Herb Jordan, retired Poultry Scientist, developed the following list of characteristics of successful farmers based on field observations. These farmers: List all tasks to do daily in priority on a pad and then use it. Convert fresh, wet manure to high quality dry manure to replace commercial fertilizer on fields. Hire help selectively. Give verbal, written or skill tests. Hire skillful, talented and genuine people who like to work. Build a team of people, animals, tools and machines. Choose reliable vendors, employees, buyers and repairmen. Avoid errors in aesthetics like flies, obnoxious odors, dust, toxic gases and noise. Avoid excessive payments on interest on debt, insurance premiums and taxes. Sort out when buying what you want, need or have to have. Shepherd each farm enterprise to pay its own way.

To Check on Social Security Benefits

At least once every three years you should check on your benefits estimate from Social Security, according to Dr. Robert Thee, Multi-County Extension Financial Management Agent. To do this, get a Request for Earnings and Benefit Estimate Statement form from the Social Security Administration. When you receive your estimate, look it over to see if their record of your earnings matches yours. If not, now is the time to get it corrected rather than after you retire. With millions of accounts, mistakes can happen. One person reported his earnings were credited to his twin brother. Because he found out about it early, it was easily corrected.

Feather Prof.'s Footnote: "What lies behind us and what lies before us are tiny matters compared to what lies within us."



BEWARE OF THE EVIL EYE!
January 30, 2000

Background Scripture:
Matthew 19:16 through 20:16.
Devotional Reading:
Matthew 20:20-28.

The parable of the laborers in the vineyard is one of those gospel passages that has perplexed some and agitated others. Some people have seized upon it to claim that it sanctions an employer doing whatever he wants with his property. They find it comforting for him to be saying: "Am I not allowed to do what I choose with what belongs to me?" It is easy to see why this should become the favorite Bible verse for some people.

Others are equally incensed because it purportedly undercuts the premise of equal pay for equal work. Women and ethnic workers already feel that they are victims of wage discrimination and are shocked that Jesus would tell a story that appears to justify the entrepreneur's right to pay anyone what he or she wishes.

The problem, however, is not with the parable but with the interpretation that people have placed upon it. When I was a boy I loved to put together picture puzzles, but sometimes I tried to force pieces into spaces where they did not quite fit. People do that with the Bible, too, forcing interpretations where they just don't fit

A Heavenly Household

Jesus was not talking about an earthly householder, but a heavenly one In our society much is based upon merit–being paid on the basis of productivity, time and effort. From that standpoint, the parable would appear to be unjust, someone getting the same pay for a lot less time and effort. But when we come to God's salvation, grace, not merit, is the basis. In the kingdom of God we are not claiming just wages but God's mercy. God forbid that he should give us what we have coming to us!

We may think that it is unjust for God to give salvation to the person who, after a lifetime of godlessness, becomes "converted" at the last minute. According to human judgment, it is unjust. That's the way the brother of the Prodigal Son felt. He had stayed home and worked hard for his father, while his brother went off into the far country and squandered his inheritance is licentious living. Now, however, the Prodigal Son returns and his father throws a party for him in celebration. Where's the justice in that?

Things Too Wonderful

It was much the same way with Job. He is best known to us as a man of great patience and he was–up to a point. After a while, however, Job became very impatient and he challenges God to come and explain himself. When God appears he responds in a way Job had not anticipated: "Who is this who darkens counsel by words without knowledge? Gird up your loins like a man, I will question you and you shall declare to me. Where were you when I laid the foundation of the earth? Tell me if you have understanding." God's answer to Job and to us is that the divine mind cannot be comprehended by mere mortals and Job confesses: "Therefore I have uttered what I did not understand, things too wonderful for me, which I did not know." So, the grace of God is often too divine for humans to comprehend.

Unfortunately, we who are totally dependent upon God's grace too often become resentful when others are its beneficiaries. As the George Arthur Buttrick asks, "Why did the earlier workers not rejoice that the man who had waited long in the market place was now at peace, with money to take home to his family? Why did not the elder brother rejoice that the prodigal was now restored, set free from the rags and hunger of the far country? If you and I are so dependent upon God's grace, why do we not rejoice when someone else finds that same mercy?

The RSV renders Matthew 20:15: "Or do you begrudge me my generosity?" A variant reading of this same verse is found in a footnote: "Or is your eye evil because I am good?" The evil eye of which you need to beware is the resentful, begrudging look that comes from your own eye!

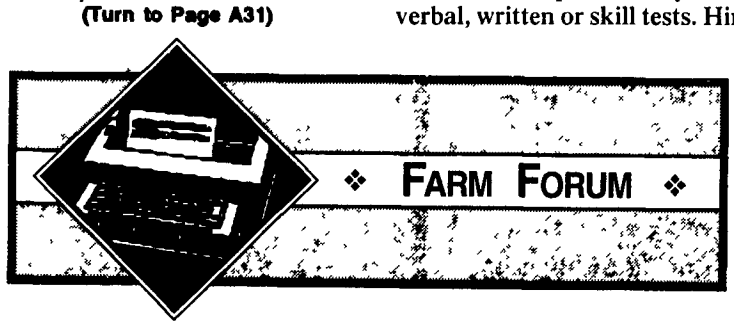
(Turn to Page A31)



Editor,

I am tired of hearing the same one-sided stories over and over again relating to the dairy business.

The first is efficiency. Efficiency is good, necessary and evident. The blend price for order 2 in January 1979 was $11.49 per hundred weight. According to the Consumer Price Index, $11 49 in January 1979 would be over $28.00 in current value. The fact that many can produce milk for 1/2 this amount indicates a great improvement in efficiency but certainly not in real profit. If farm owners and or grown children have to work on the farm for nothing while the wives work off the farm to provide an income to live on, this crosses the line from being effi-

Weekly Dairy Market Outlook

By Ken Bailey
Penn State University
January 21, 2000

Cheese Stocks Rising

--December cheese stocks up

--December butter stocks down

--CME butter and cheese prices are also down

--December milk up 3.8 percent

The near-term outlook for butter and cheese prices, and hence farm-level milk prices, does not look like it will improve anytime soon USDA's Cold Storage Report was released today and the numbers are disappointing

Natural American cheese as of December 31, 1999 was 446.612 million pounds, up 10 percent from a year ago and down just 1.638 million pounds from November 1999 levels. Other Natural cheese was 155.778 million pounds, up 59 percent from a year ago and up 21.381 million pounds from November 1999 levels. Total cheese stocks actually rose 19 million pounds from November to December 1999!

I had hoped that demand for cheese would have been strong enough the last quarter of 1999 to slowed down, or reduce the growth in cheese inventories

This report, however, indicates that cheese production is growing ahead ofdemand.

There was no strong market reaction from the Chicago Mercantile Exchange to the news since it came after the markets closed. Prices for block cheese fell from $1.1150 per pound on Tuesday, January 18 (markets were closed on Monday) to $1.11 by Friday, January 21. Barrel prices fell more strongly, from $1.1025 on Tuesday to $1.0925 by Friday.

It is possible that information in the stocks report has already been factored into current market prices. Nevertheless, cheese prices don't have much lower to fall.

Butter prices fell this week at the Chicago Mercantile Exchange. Grade A prices fell from $0.9450 per pound on Wednesday, January 19 to $0.8875 by Friday, January 21. Butter stocks for December 31, 1999 were reported to be 25.965 million pounds, about even with a year ago. Butter prices remain low due to more than adequate supplies of cream and fresh butter.

The Milk Production Report was also released this week. Milk production for 20 select states in December was 11.9 million pounds, up 3.8 percent from a year ago. Production per cow in December averaged 1,536 pounds, up 47 pounds or 3.2 percent. Cow numbers in December were 7.76 million head, 52,000 head more than December 1998 and 2,000 head more than November 1999.

States with the strongest growth in milk production were: Idaho (14.6 percent), California (11.1 percent), New Mexico (8.6 percent), Virginia (4.5 percent), Arizona (4.2 percent), Washington (3.6 percent), Michigan (3.3 percent), and Pennsylvania (3.2 percent).

The milk supply continued to grow in excess of demand in December. In addition, the number of cows on farms, which normally declines each month, continued to grow throughout 1999. Farmers have not yet received a really low milk price. That will happen by February 20th. Thus we may have one more month of growth in the milk supply. Short of a miracle on the demand side, milk prices will continue to be low as long as the milk supply continues to grow.

For more information on dairy outlook and federal order reform, see my web site at: http://www.aers.psu.edu/dairyoutlook/

USDA Seeks Nominations For National Fluid Milk Board

WASHINGTON, D.C. — The USDA is asking dairy processors to nominate candidates for the National Fluid Milk Processor Promotion Board.

USDA's Agricultural Marketing Service oversees the fluid milk program as well as other research and promotion programs. The secretary of agriculture will appoint seven members to replace six members and one vacancy position with terms expiring May 31, 2000. Newly appointed or reappointed members will serve 3-year terms.

Kathleen A. Merrigan, AMS Administrator, said, "AMS encourages all eligible women, minorities, and persons with disabilities to serve on its committee and board activities. It is USDA's policy that membership on industry-governed boards and committees accurately reflect the diversity of individuals served by the programs."

The 20-member board was established by the Fluid Milk Promotion Act of 1990 to develop and administer a coordinated program of advertising and education to promote fluid milk products. Of the 20 members, 15 represent geographic regions and five are at-large members of the board. The at-large members must include at least three fluid milk processors and at least one member from the general public. There are two members from the general public.

USDA will accept nominations for board representation in five geographic regions and for two at-large positions. Nominees for all regional positions and at least one at-large position must be active owners or employees of a fluid milk processor. The other at-large position may be filled by a member of the general public. The geographic regions are: Region 3 (Delaware, Maryland, Pennsylvania, Virginia, and the District of Columbia); Region 6 (Ohio and West Virginia); Region 9 (Alabama, Kentucky, Louisiana, Mississippi and Tennessee); Region 12 (Arizona, Colorado, New Mexico, Nevada, and Utah); and Region 15 (Southern California). No fluid milk processor shall be represented on the board by more than two members.

Fluid milk processors and others may submit nominations for regions in which they are located or market fluid milk and for the at-large members.

Nomination forms and background information forms can be obtained by calling (202) 720-6909. To nominate an individual, please submit a copy of the nomination form and a signed background form for each nominee by Feb. 11. Forms should be sent to Promotion and Research Branch, Dairy Programs, AMS, USDA, 1400 Independence Ave, SW, Stop 0233, Room 2958-S, Washington, DC 20250-0233.

Organic Certification Applications Available

PENNINGTON, N.J. – The Northeast Organic Farming Association of New Jersey (NOFA-NJ) has just released applications for the spring cycle organic certification during the 2000-2001 certification year.

Farmers, market gardeners, greenhouse operators, and livestock producers interested in becoming certified organic should contact Henry Krzewinski, NOFA-NJ Certification Administrator, at 609-737-6848 for program details and application ordering information.

Organic certification is available to growers with qualifying fields and practices. To qualify for certification, fields must have been free of synthetic fertilizers and pesticides or other prohibited substances for at least three years. Growing practices must meet organic standards that emphasize the restoration and maintenance of fertility and soil life. Additional requirements are found in the "NOFA-NJ Certification Standards and Procedures Guide," available from NOFA-NJ and included in all application packages.

Rapid growth in the organic field has fueled demand from consumers, wholesalers, and farmers' markets for independent, third party grower certification. NOFA-NJ offers area growers an opportunity to become certified by a local organization with a national reputation.

NOFA-NJ is a private, non-for-profit organization offering certification services to organic growers in New Jersey and eastern Pennsylvania. In addition to certification services, NOFA offers technical support to organic growers, publishes a quarterly newsletter, and conducts an annual conference.

Biotech Panel Appointed in D.C.

WASHINGTON, D.C.–A committee appointed recently to advise the government on development and use of genetically engineered crops will include organic farmers, critics of biotech food, consumer advocates, scientists, and executives of major seed companies.

"It is my hope that this group, which brings together people with a range of perspectives and experiences, will engage in the kind of thoughtful and civil debate on biotechnology that our country now needs," Agriculture Secretary Dan Glickman said.

Glickman appointed former Rep. Dennis Eckart, D-Ohio, as chairman of the 38-member panel. So diverse are the views of the committee's members that USDA plans to hire a professional facilitator to help Eckart manage the panel.

The committee includes representatives of the Monsanto Co., General Mills Inc., the Environmental Defense Fund, Organic Farming Research Foundation, Consumer Federation of America, Rural Advancement Foundation International, National Corn Growers Association, and the American Farm Bureau Federation.

The committee's first meetings will be March 29-30 in Washington. The panel is authorized to stay in operation for two years.

Glickman has also asked the National Academy of Sciences to review USDA's approval process for genetically engineered crops. Critics say the agency has approved new varieties without adequately testing their potential impact on the environment.

USDA is among several agencies involved in regulating biotech crops. Others include the Food and Drug Administration and the Environmental Protection Agency.

Extended-Season Produce Key To Keeping Customer Relations

(Continued from Page A1)

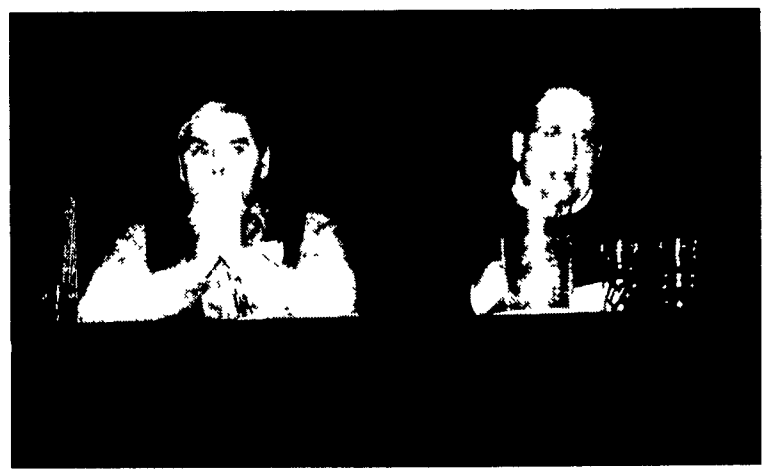
30-40 acre category (some grow as little as 5-10 acres of produce).

The cooperative chose Washington, D.C. since it proved to be the closest large metropolitan market. Growers, said Fullerton, faced an unreliable wholesale market for their produce.

In the first year the cooperative moved 1,500 cases of produce with modest success. The cooperative has experienced steady growth in the years since, at 30-50 percent per year. Last season the cooperative moved 35,000-40,000 cases to 50 different customers in the Washington, D.C. area, half restaurants and the rest retailers.

Fullerton, who joined the cooperative in 1993, has seen the main warehouse go through a few expansions. The cooperative, though, has "always been grower-driven, grower-directed," he said.

Neil Courtney, left, and Moses Sensenig at the farmers produce auction session of the fruit and vegetable convention in Hershey.



Paul Leinbach, left, and Mike Snyder spoke during a special farmers' market session of the fruit and vegetable convention.

Successful Produce Auctions

Each farmer creates their own reputation with individual buyers at a produce auction, according to Paul W. Leinbach of Leinbach Produce Auction in Shippensburg.

So it's important that the quality and packaging and overall presentation is right, and let the product "speak for itself," said Michael Snyder, manager of the Leola Produce Auction.

"The quality of the containers says something about the quality of what is in the container," said Neil Courtney, manager of the Buffalo Valley Produce Auction, Mifflinburg.

Leinbach said packaging is "definitely the key to sales at the produce auction."

Several regional produce auction managers spoke about their experiences during the season Wednesday afternoon at the farmers' market portion of the Mid-Atlantic Fruit and Vegetable Convention.

(Turn to Page A21)

The key for the cooperative — and perhaps any niche marketing enterprise — is to grow as much as possible throughout a longer season, lengthening it to stay in touch and work with the buyers as much as possible. Use of seasonal extension technology comes in handy for growers in the cooperative so they can stay "engaged with the customers," Fullerton said.

To ensure continuous supply of vegetables to the Washington markets, Fullerton said the co-op has developed a working relationship with a Vermont-based co-op to sell Vermont carrots through the winter season.

The co-op remains "desperate for anything that will provide fresh and green produce for the winter," he said.

Tuscarora Co-op supplies 20 different varieties of tomatoes in the season, besides flowers, mushrooms, carrots, organically grown tree fruit, garlic and storage onions, and others. Tomatoes are the number-one seller, but heirloom tomatoes, cherry tomatoes, and plum or Roma tomatoes are also important. The co-op also markets lettuces and other salad greens, head lettuce, and speciality salad greens. They also grow plenty of standards such as zucchini and yellow squash, green beans, eggplants, collards and kale, bell peppers, cucumbers, bets, and melons.

"Our growth has not come in finding more customers, but supplying existing customers with what they want over a long period of time," said Chris Fullerton, Tuscarora Organic Growers Cooperative, Hustontown. He spoke Wednesday afternoon during a special session on farmers' markets, auctions, and cooperatives at the 2000 Mid-Atlantic Fruit and Vegetable Convention at the Hershey Lodge and Convention Center.

Corn/Soy Confab to Focus on Ups, Downs In Agriculture

NEWARK,Del.–Robert Hutchison and his brothers run a choose-and-cut Christmas tree business on their farm in Cordova, Md. It's a good sideline on the farm that grows corn, soybeans, barley and wheat, he said, but it's "a lot of hard work." To stay afloat in the 21st century, he thinks farmers will have to be proactive and move toward strategies that take advantage of the needs of population around them, such as Christmas tree, turf or recreational farming.

Bruce Lambertson of Lambertson Farms, Inc. in Stockton, Md., would like to retire someday, "at least on paper," he said with a chuckle. In the meantime, he and his brother, Curtis, have no time for growing specialty crops, but he's very interested in learning more about GPS–global positioning systems–as a way to maximize his planting efforts and keep feed and fertilizer costs down.

Pat and Temple Rhodes already use GPS on their combines and tractors and credit new technologies with their ability to stay competitive in business. They're not ready to give up one particular low-tech practice, though: their whole family–four daughters, one son, 14 grandchildren and assorted in-laws–all pitch in when needed, which keeps labor costs down.

All three families are multi-generation farmers on Delmarva and all three agree: changes are coming quickly in agriculture, and with these changes, problems and challenges their parents and grandparents could never have imagined. It's not just drought, lack of markets or labor problems that face farmers in 2000. It's federal regulations, genetically enhanced crops and risk management that hold their attention as they are confronted with serious decisions, including the most serious of all: can we afford to continue farming?

Bruce Lambertson, Robert Hutchison, and Pat and Temple Rhodes will share their history, experiences and concerns on the future of farming in personal conversations with local farmers at the 20th Annual Delmarva Corn and Soybean Technology Conference. This year's theme is "Beyond 2000–Remaining Profitable in Agriculture in the New Century."

Using a new format featuring roundtable discussions on some of the questions and issues challenging farmers today, conference sessions will be held at three locations across the Delmarva peninsula

•Thursday, Feb 10: Asbury United Methodist Church, West Mount Vernon Street, Smyrna, Del. Guest speakers· Pat and Temple Rhodes

•Friday, Feb 11 Carolina County 4-H Park, Decatur Road off Highway 16, Denton, Md Guest speaker: Robert Hutchison

•Saturday, Feb 12: Pocomoke High School, off U.S. Route 13, Pocomoke City, Md. Guest speaker: Bruce Lambertson

All sessions will run from 9 a.m. to 3 p.m., with a one-hour break for lunch. Roundtable discussion topics are "Shaping the Farm Business Strategy"; "Grain Marketing–Adding To Your Bottom Line"; "Biotechnology and the Consumer"; and "Managing Risk Through Government Programs."

"We're planning a very interactive meeting this year so farmers can participate in the discussions as much as they like," said Gordon Johnson, cooperative extension agricultural agent for the University of Delaware and chair of the Corn and Soybean Conference planning committee. Instead of a trade show, the conference will center on roundtable discussions featuring guests from the farming community, agribusiness community and consumer groups as well as experts from the universities of Delaware and Maryland.

The conference is sponsored by Cooperative Extension at land-grant universities in Delaware, Maryland and Virginia and by agribusinesses serving the Delmarva peninsula. However, there will be no commercial or educational exhibits at this year's event.

The $5 registration charge for each meeting includes refreshments and lunch. For more information, contact your county cooperative extension office. Register early–seating is limited at each location.

Extended-Season

(Continued from Page A21)

But to be successful, the right kind of crops have to meet the needs for the right buyers, and the quality has to be high to compete with southern produce, noted Leinbach.

"Everything has to be done right, from A to Z," he said.

Most auctions, including Weaverland Auction in New Holland, begin the auction season in late March or early April with flowers, bedding plants, and baskets and operate until about Thanksgiving. Several auctions also have Christmas trees.

Neil A. Courtney, manager of Buffalo Valley Produce Auction in Mifflinburg, sells wreaths and Christmas trees. The Christmas tree auction is a "vital part" of the auction, and will be conducted over two days this year, he noted.

The auction has about 1,700 consignors from central Pennsylvania, Florida, Connecticut, and other areas. The auction hosts up to 900 buyers.

Courtney pointed out that growers should learn the concept of produce auction. The auctions are strictly a business of "averages," he pointed out in the convention's proceedings. Growers must use the auction consistently and not be concerned about day prices, but prices over a long term. "No price is too low and none too high at the auction," he said.

Most of the auctions use produce, including cantaloupes and watermelons, from southern growers.

Weaverland auction, according to spokesperson Moses Sensenig, has 400 regular growers and about 75-100 buyers, operating in its second year, located three miles north of New Holland.

Farmers in the area are gradually changing from growing tobacco to vegetables, according to the report supplied by Daniel Martin of the auction in the proceedings.

Commissions are the same at most, including eight percent at Leola, Weaverland, and Leinbach, and 10 percent at Buffalo Valley. Buffalo Valley charges an extra two percent for services, Courtney noted.

Leinbach said all charge about eight percent because "Leola and others charge eight percent," he said. But it's a lot cheaper than the terminal market, which charges 15 percent and additional service charges.

Though some of the auctions have handled organic produce, there was minimal success, mostly because organic produce remains an inconstant market.

Is Your Farming Operation Cut Out For Cut-Flower Production?

UNIVERSITY PARK (Centre Co.) — Producing cut flowers as a specialty crop can be a lucrative move for some farmers, but a Penn State Cooperative Extension agent said producers should be aware of the requirements for making the crop profitable.

"Increasing demand has made fresh cut flowers a growing market, but producing this crop is not for everyone," said Steve Bogash, horticultural extension agent in Blair County. "Flowers have special production methods, a short shelf life and a short field growth and marketing season in Pennsylvania."

Bogash said Pennsylvania growers can have a competitive advantage over foreign suppliers because of Pennsylvania's proximity to major eastern population centers. "Local growers can provide a 48-hour freshness advantage that can be a real marketing tool in a business where shelf life is so important," Bogash said.

"Farmers first should consider how to market their flowers," said Robert Berghage, assistant professor of horticulture in Penn State's College of Agricultural Sciences. "Cut flowers usually are sold by the bunch, in arranged bouquets or individually. Producers should research a marketing method that works for them."

Berghage lists several marketing alternatives.

• Wholesale. Wholesale distributors buy and resell flowers for a predetermined price. Prices vary by region and can be subject to large fluctuations in the market.

• Florists. Marketing surveys have shown that many florists are willing to buy locally grown flowers. "They will expect the same high quality and service they receive from their other suppliers," Berghage said.

•Pick-your-own, roadside markets, and farm markets. These markets provide higher prices per unit, but overhead costs such as advertising, facilities, and maintenance usually are borne by the producer.

Bogash also points out that producers should consider the following:

• Site. The site should be well-drained and have deep, fertile soil. "Raised beds with plastic mulch will give the best results and keep weeds down," Bogash said. "With raised beds, the sun can heat from the sides as well as the top, and the mounded soil improves drainage.

• Planting. Cut flowers are grown from transplants or plugs, Bogash explained. New growers, or those with small plots, can plant by hand, but mechanical planters will speed up the process. "Plant spacings will vary according to the species or cultivar," he said.

• Irrigation. A drip irrigation tape should be used for efficiency, to keep water off leaves and flowers and allow for easier fertilizer applications delivered by irrigation water.

• Wind protection and support. Cut flowers are easily damaged by winds. Producers can use live plants or fencing for windbreaks. Some flower species also require support. Bogash recommends plastic mesh products that provide a grid of support to encourage upright growth.

• Pest Control. Cut flower plants attract a wide range of pests. "Keep careful records and scout your plants often to discover pests early," Bogash said.

Insects that can be a problem in flower plots include aphids, thrips, spider mites, leafhoppers, beetles and caterpillars. "They often can be controlled by natural parasites and predators, which can be bought from biological control companies or maintained as on-site populations through careful management," Bogash said.

Natural sprays can be used, such as insecticidal soaps, horticultural oils, and extracts of neem oil. "You may have to use synthetic chemical sprays, but to protect beneficial insects, be sure to avoid sprays with a long residual life," Bogash said. "If you must use synthetic sprays, use products that are specifically suited to your needs and have the lowest toxicity for bees."

• Diseases. Fungal diseases such as botrytis, powdery mildew, damping off, leaf spots, and several viruses are a major problem for cut flowers. "Most fungal diseases do not kill the flowers, but they can drastically reduce salability and mar appearance," said Berghage. "Good crop rotation, effective weed and pest control, and careful selection of plantings will help rein in diseases."

• Weeds. Bogash said plastic mulches can be used for weed control. Using cereal rye as a cover crop helps build the soil, smother weeds through competition, and act as a natural herbicide on many weeds. "Only a handful of herbicides are labeled for flower production," Bogash explained. "Some products control grasses, but very few control broadleaf weeds. Whatever you use, read the product label carefully."

• Harvest. Flowers should be harvested in the morning just after the dew has dried. Remove dead leaves and spent flowers to prevent botrytis from infecting future crops.

"Flowers should be placed in water as quickly as possible after cutting," Bogash said. "They should be cooled rapidly to prevent water loss and aging.

"You should know the blooming habits and bloom life of each flower in your plot, so customers will get long-lasting flowers."

Forage Soybean Seed Production Successful

HALL, N.Y.–Seedway confirms seed production of the new Donegal forage soybean was successful in 1999. Seed supply was tight last year because of limited seed increase.

The successful 1999 commercial seed crop is expected to make Donegal available for general use in 2000.

The company notes interest in Donegal is developing in many parts of the U.S., Canada, and some international forage production areas as more is known of the special forage traits. This trend is expected to stress seed supplies. Growers who want to plant Donegal in bag quantities should make arrangements early.

Donegal was licensed exclusively by Seedway from the USDA–Agricultural Research Service, Beltsville, Md. The forage soybean has been performing well in straight stands and forage mixtures in the Mid-Atlantic, Northeast, Midwest, and eastern Canada.

Interest in Donegal stems from high forage yield potential, good forage quality, compatibility in mixtures, and as a productive annual rotation option.

Single-cut yield of Donegal will usually compare with three-cut alfalfa yield at a given location. Herbicide-free forage production is an added benefit. A conventional breeding history without transgenic alteration is noted (non-GMO).

High biomass yield and substantial nitrogen contribution make Donegal particularly interesting in organic farming and other operations where improvement of soil tilth and fertility is valued.

Foot Clinic Slated For February 4

BARABOO, Wisc. – Pennsylvania hoof trimmer and member of the Hoof Trimmers Association, Inc., Paul Neer from Belleville, is hosting a Foot Clinic Feb. 4, 2000, in State College, Pa., at the Penn State Ag. Arena Building, from 10 a.m. to 3 p.m. There will be coffee and donuts at 9:30 a.m. Dairy producers, hoof trimmers, veterinarians, nutritionists and anyone interested in hoof care is invited to attend. The clinic will include numerous guest speakers, live hoof trimming demonstrations and a complimentary chicken and ribs lunch at 12 p.m.

Extension veterinarian and hoof care specialist Dr. Jan Shearer of the University of Florida is the keynote speaker.

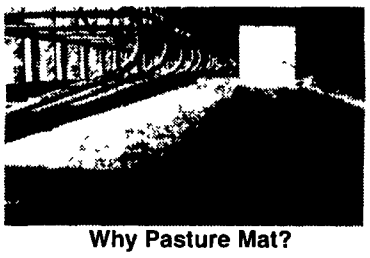
PastureMat®

The Golden Standard In Cow Comfort



Why Pasture Mat?

Pasture Mat is tightly stuffed with rubber and sewn every 4" to prevent shifting

Proven most durable top cover

Least abrasive top cover on the market

Fits any stall.

Proven performance.

The Rewards

- Better Cow Health
- Reduced Leg Injury
- Reduced Swollen Hocks
- More Lactation Per Cow - More Milk
- Reduced Bedding Costs
- Pasture Mats Often Pay For Themselves Within 6 Months.

For details and installation with over 6 years experience, call:

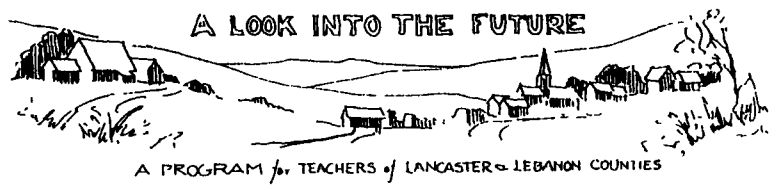
Attention, teachers!



Take a look into the future at a special 3-day Seminar.

How do we save the good and develop a vision for the future of Lancaster and Lebanon Counties?

Seminar dates:
March 1 • March 23 • April 13

Learn from experts at this workshop for master teachers. The seminar includes hands-on activities, a county-wide field trip to examine environmental concerns and an extensive packet of teaching materials.

Learn about these important issues:

Land use • Clean air • Waste management • Clean water

DEADLINE FOR APPLICATION IS JANUARY 28, 2000

To become the Master Teacher from your district, contact your school district superintendent.

For information about the seminar, contact Dawn L. Weaver, Lancaster Newspapers, Inc.
Phone: 717-291-8701; e-mail: dweaver@lnpnews.com

Sponsors of "A Look into the Future" include Financial support from Engle-Hambright and Davies, Inc., Insurance &Real Estate, Lancaster County Planning Commission, Lebanon County Planning Department, Lancaster-Lebanon I U. 13, Historic Preservation Trust of Lancaster County, The Hourglass Foundation,Citizens for Responsible Growth and Lancaster Newspapers, Inc

Mt. Joy Dairy Coop Increases Milk Handled

(Continued from Page A1)

last year. This in spite of, or because of, the 15 to 20 percent increase in milk handled. A total of 418,530,541 pounds of milk was sold with most of it going to Kemps and Turkey Hill in Lancaster County.

Membership in the Cooperative also increased by 15 to 20 percent. Officials noted that the investment in the Cooperative by the average patron decreased by 35 percent this year to only $2,384.

Lancaster County dairy princess, Elisa Ranck, spoke, and Dale Hershey, cooperative manager gave a report. Don Risser, president was in charge of the meeting. The election of directors will be reported next week.

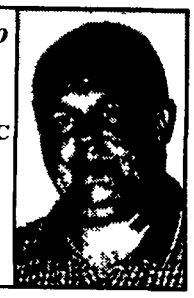
Dairyman



Question: We track MUN on a monthly basis and have been very successful at maintaining a 12-13 mg/dl average. Suddenly our September MUN test dropped to less than nine. What factors could contribute to this?

Fall feeding and new crops make this a common scenario. Most producers who test monthly for MUN see the correlation between constant MUN values and their success in maintaining a constant diet fed to their cows.

There are numerous things that can happen within the cow's diet that spoil the plan. One is so simple that we often overlook it. Moisture changes within the forage part of the diet can change more than the dry matter intake. Make sure diets are adjusted for this change but also consider this thought: typical Pennsylvania forage is some sort of hay crop silage. There are tremendous variations in moisture levels as the hay crop is ensiled in trenches, tower silos, bags, and wraps. Typically protein tests can be similar regardless of moisture level but often the soluble or degradable portion of that protein changes with moisture content. Moisture levels lower than 50 percent and those higher than 60 percent, even though crude protein remains the same, can be quite different depending on what rumen bugs are available. As a rule of thumb, when moisture levels decrease the soluble or degradable portions also decrease. Wet forages also show higher soluble or degradable portions.

This farm was advised to look at changes concerning this part of the diet and indeed haylage has dropped from 65 percent to 50 percent moisture as feed from their bunk. Soluble protein levels of the wetter feed were 64 percent and on the dryer feed, 56 percent. This change resulted in less available protein for use by rumen bugs, less milk produced, and drastically reduced MUN values.

Sometimes changes occur in our cows and we can only react to them. This dietary change was not planned but nevertheless had a large impact on the cows. We can use this situation to build a plan for the future that allows us to anticipate performance changes triggered by feed changes. Simply put, if I had haylage that remains top quality but changes occur in the protein fractions and moisture content, I would do what is necessary to head off performance changes in the cows.

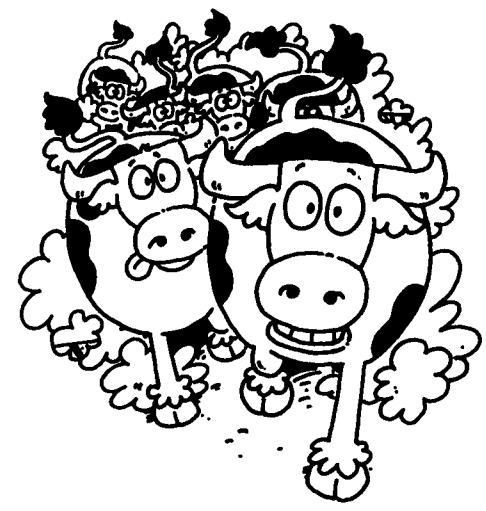
MUN, in this instance, not only gave us a diagnostic tool for today's production but we have found that by knowing what drives MUN in the diet can help us ward off potential negative trends in production. Do not be satisfied with acceptable MUN values but instead use constant testing and relate MUN with diet changes. By doing so, I believe the four-pound loss on 260 cows for an undetermined length of time could be avoided. Isn't the risk of losing $150 daily worth testing for and learning how to use MUN? I think it is. Use the tools available along with your farm advisors to help avoid a potential loss. Better yet, develop an aggressive attitude toward DHIA records and force yourself to act, not just react.

Average Farm Feed Costs for Handy Reference

To help farmers across the state to have handy reference of commodity input costs in their feeding operations for DHIA record sheets or to develop livestock feed cost data, here's last week's average costs of various ingredients as compiled from regional reports across the state of Pennsylvania.

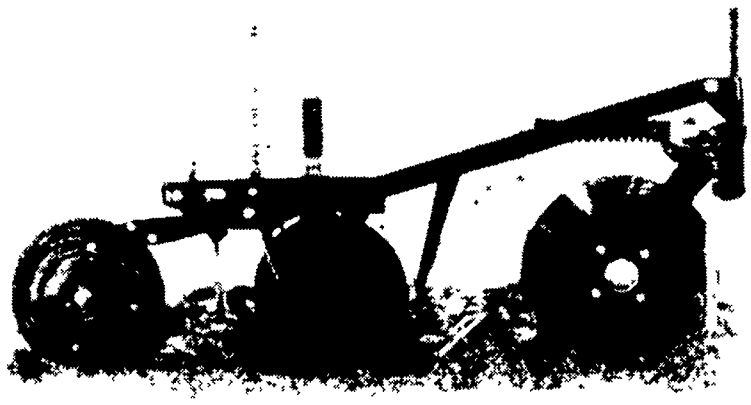
Remember, these are averages, so you will need to adjust your figures up or down according to your location and the quality of your crop.

Corn, No.2y — 2.37 bu., 4.23 cwt.
Wheat, No.2 — 2.38 bu., 3.97 cwt.
Barley, No.3 — 1.62 bu., 3.46 cwt.
Oats, No.2 — 1.51 bu., 4.71 cwt.
Soybeans, No.1 — 4.41 bu., 7.36 cwt.
Ear Corn — 75.55 ton, 3.78 cwt.
Alfalfa Hay — 134.25 ton, 6.71 cwt.
Mixed Hay — 138.75 ton, 6.94 cwt.
Timothy Hay — 141.25 ton, 7.06 cwt.



ALL THE FEATURES... IN A COMPACT SIZE.

Introducing Great Plains no-till excellence in a 12' model.



- Utilizes proven coulter/opener no-till system
- New 12' size provides maximum productivity.
- Accurate planting in demanding no-till conditions.
- T-handle depth control system ensures accurate seed placement
- Opener and coulter stagger of 10 3/4" allows trash to flow evenly and freely
- Creates a mini-seedbed with no-till coulters
- Fluted seed cups and 4-speed gearbox provide accuracy in varying rates and seed sizes.

Great Plains

We lead because we listen.

The proven Great Plains no-till system utilizes a coulter to prepare a mini-conventional seedbed for the openers to place the seed ... at the precise depth selected.

Grazing Conference Feb. 28

CLARION (Clarion Co.) — The Natural Resources Conservation Service, Penn State Cooperative Extension Service, Headwaters Resource Conservation and Development, and The Jefferson County Conservation District are sponsoring the third annual Northwest Pennsylvania Grazing Conference Feb. 28 here at the Gemmell Student Center at Clarion University.

Registration begins at 9 a.m. The conference will start at 10 a.m.

Technology has brought dramatic improvements to crop production through innovations in equipment, plant varieties, and pest control. Most producers focus considerable attention on maximizing production on their cropland.

Pastureland often receives much less attention on many of our livestock and dairy farms. Improved management of this underutilized resource can often provide producers with an opportunity to reduce costs at their existing level of production or increase production with the same level of inputs. In addition, well-managed pastures with stream crossings, streambank fencing, riparian buffers, and watering facilities also reduce erosion, improve water quality, and enhance wildlife habitat.

The Northwest Grazing Conference was started three years ago as a way to bring the latest in grazing expertise to this area and to provide producers with an opportunity to share and exchange ideas.

This year's keynote speaker is Dr. Jim Gerrish. Gerrish is the principal agronomic researcher at the University of Missouri Forage Systems Research Center. His research centers on the interdependency among plants, the soil, and animals in a grazing environment. Specific research has involved factors that affect grazing distribution across the landscape, the relationship between the length of grazing periods and the harvest efficiency of forage crops, and the impact of grazing management systems on animal performance and economic returns.

Gerrish practices what he preaches on his 260-acre commercial cow/calf and stocker cattle operation. He is a nationally recognized grazing expert who speaks at 50-60 grazing events annually. His keynote address will be "Strategies for Improving Pasture Stands." He will also present a session on "Grazing Management for Stocker Cattle."

Other speakers will address including grazing in dairy rations, developing water systems, stabilizing cattle lanes and overwintering areas, and extending the grazing season. A farmer panel comprised of graziers from western Pennsylvania will round out the program.

Registration this year is $18 and includes a hot buffet lunch. Brochures and conference information can be obtained by calling Headwaters RC&D at (814) 375-1372, ext. 4.

For more information, call Gary Swope, Natural Resources Conservation Service, at (814) 375-2125.

Show Meeting Scheduled

STATE COLLEGE (Centre Co.)– The Northeast District of the Pennsylvania Holstein Association will hold a meeting on February 1, 2000 to plan the 2000 Northeast Championship Show. We will also discuss other issues as brought by the membership.

The meeting will be held beginning at 11:00 a.m. at the Edgewood Restaurant, Route 6, Troy PA.

All Holstein members from Northeast Pennsylvania are invited to this meeting set for February 1, 2000.

Beitzel Spraying is now distributing:
SAFECIDE® BRAND IC
For the control of darkling beetles, hide beetles and flies in poultry houses and for control of fire ants

Advantages:
- Efficacious–boron-based SafeCide® Brand IC kills larvae and adults. Breaks the beetle life cycle and reduces diseases carried by beetles
- Contains an extremely safe and effective pest control agent (99% orthoboric acid)– larvae and beetles die 3 to 5 days after contact and ingestion.
- Provides long-lasting residual results. Keeps on working up to 12 months – longer than most available products.
- Provides an effective barrier. Kills larvae and adults as they emerge.
- Cost effective – low cost based on per day of activity.
- Can be applied as a dust or spray. Flexible application options let SafeCide® Brand IC fit easily into your particular management program.
- EPA approved, ecologically friendly– non-carcinogenic, no toxic residues. Safe to be applied by humans.
- Is field proven. Field studies* show heavily infested farms treated with SafeCide® Brand IC have better feed conversion rates, increased weight gains, greater livability, and fewer condemnations than untreated farms.
- No insecticidal resistance reported.
- Retards the growth of Aspergillus in the litter.
- Approved for use in the control of fire ants and flies.

All-Dairy Antiques, Collectibles Show Held At All-American, Scheduled Again

DR. DARWIN G. BRAUND
Volunteer Curator
Past Agriculture Museum

HARRISBURG (Dauphin Co.) – If there is such a thing as a second year (sophomore) jinx, it certainly wasn't evident during the second annual Pennsylvania All-Dairy Antiques and Collectibles Show held September 18-23, 1999 in Harrisburg. Twenty-seven exhibitors from five states provided beautiful and educational exhibits of dairy antiques, collectibles and milk bottles in this highly successful event held at the PA Farm Show Complex in Harrisburg. This compares with fifteen exhibitors from three states at the inaugural show in 1998 and all but two returned for this second year. The first show was started to help celebrate the 35th anniversary of the Pennsylvania All American Dairy Show in 1998.

Driving all the way from Hayfield, MN, Gene Sander and his wife, Pam, provided a beautiful, realistic, and educational exhibit on *Butter Making in Minnesota*. Gene is president elect of the National Cream Separators and Dairy Collectors Association. The pretend but realistic molds of "butter" in various shapes and sizes added much interest to their exhibit.

Other members of the Cream Separators and Dairy Collectors Association exhibiting were Darwin Braund, State College, Martin and Diane Brumbaugh, Curryville; Leslie Firth, Mercer; David Morrow, State College; Michele and Jeff Reasner, Newburg; Jim and Martha Roberts, Scio, NY, and Margin and Ellie Stout, Tunkhannock.

Additional exhibitors included: W. Paul Anderson, State College, N. Alan Bair, Columbia; Charles Focht, Carlisle, Dennis Grumbine, Myerstown; Jan Harding, Clarion, Jeff and Cindy Harding, State College; Charles Itle, Lewisberry; Lolly and William Lesher, Bernville; Joe Meyer, State College; Willard Odenwelder, Myerstown; Lyall and Vivian Shaw, East Hartland, CT; Bill Smith, Landisville; Larry Specht, Boalsburg; Donald Swiger, Gettysburg and John Tutton, Front Royal, V.A.

In addition, the Pasto Agricultural Museum in Penn State's College of Agricultural Sciences exhibited 20 dairy antiques. Also, the Department of Dairy and Animal Science at Penn State provided three different early milking machines including the rare BLK (Burrell-Lawrence-Kennedy), considered the first successful commercial milking machine. Professor Emeritus Don Ace from State College again exhibited an eye-catching display of his wood carvings that included dairy cattle and farm animal scenes.

The accompanying photos show the wide variety of dairy antiques and exhibits much better than words can describe. The Sanders' *Butter Making in Minnesota* exhibit was a very popular attraction. Jim and Martha Roberts, Scio, NY, returned with *Martha's Milk House*. After exhibiting at Penn State's Ag Progress Days in August, two county fairs in Western Pennsylvania, and this show they deserve official Pennsylvania citizenship. Les Firth, Mercer returned with his display of beautiful advertising, milk, butter and cheese scales. One scale attracting much attention was the large platform creamery scale with seven brass bars that could weigh up to 1,000 pounds.

Another exhibit deserving special mention was that of Margin Stout, *Milk Testing Through the Years*. It traced the development of the Babcock milk test in 1890 and showed a wide variety of early centrifuges and related milk testing equipment.

In the total show nearly every aspect of a bygone era of dairy farming in the late 1800s and early 1900s was represented. That's when U.S. milk production was shifting from a few family cows to the commercial off-farm sale of cream and milk. The *Dawn of the Dairy Industry* and its continued development through the 1950s was described via a long wall of posters developed by Penn State's College of Agricultural Sciences and borrowed for its educational value with this dairy antiques show.

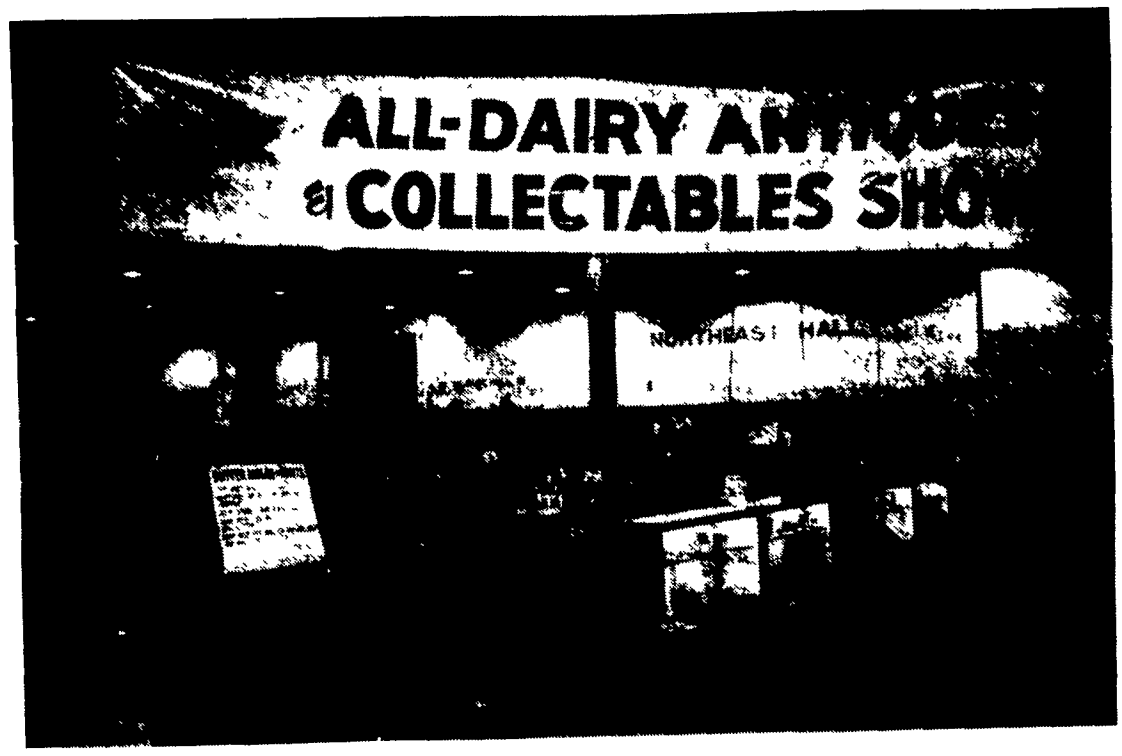
An unofficial survey conducted after several items had been sold, found butter and cheese related items well represented. A total of 61 butter churns included 21 wood, 26 glass, 9 metal and 5 ceramic. A complete set of Dazey Bull's Eye glass churns included the rare and increasingly valuable one-quart or no. 10 size. A very rare double dasher wood churn from the Pasto Agricultural Museum was dated 1859. Thirteen centrifuges of all ages and descriptions added to the history of milk testing.

Butter workers included both floor and table models. Forty-six butter prints and molds included 38 wood, four aluminum, and four glass. There were two lever-operated butter presses, one lever-operated cheese press, four lever-operated cheese cutters and one country store cheese safe (patented 1899, Madison Wisconsin). To help in selling the butter and cheese and feeding the cows which made it possible there were 20 butter, cheese, and milk scales. A dozen beautiful wood butter bowls ranging in size from six to twenty-three inches were well appreciated.

The critical piece of equipment so important in expanding early commercial milk production – the cream separator – was not forgotten. A dozen separators included seven mechanical and five gravity models. Among more than 60 milk pails, cans, and cream cans of all sizes was a very rare, oval shaped Guernsey milk pail. This unique shape helped keep it from tipping over as cows tethered in the fields on the Isle of Guernsey were milked directly into it.

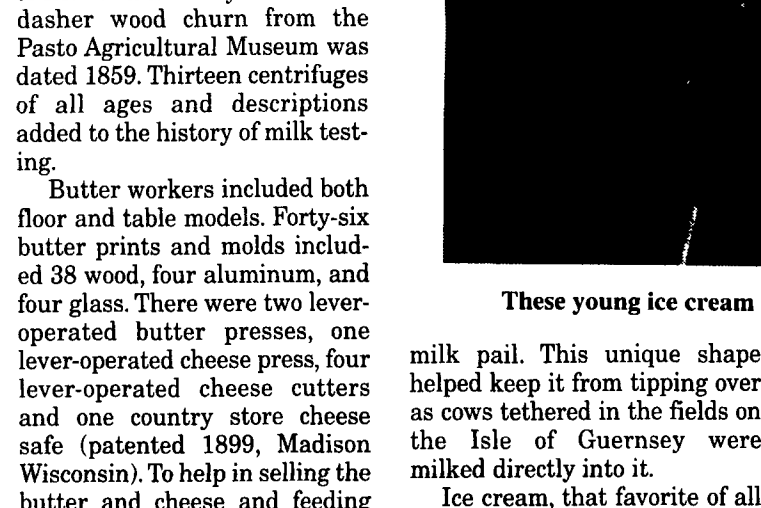
Ice cream, that favorite of all dairy products, wasn't overlooked. A dozen hand crank ice cream freezers (7 wood, 5 tin) ranged in size from a rare one pint to eight quart size. There were at least 70 dippers and scoops, seven cardboard ice cream containers, two signs, one 3-gallon metal ice cream can (State College Cry.), and an insulated two-can ice cream storage chest on casters and three tin one quart ice cream measures. Other items included 27 cow bells, 39 cow models and

(Turn to Page A36)



The All-Dairy Antiques and Collectibles Show was held at the All-American Dairy Show and is scheduled again for the year 2000.

These young ice cream eaters get ready to go with antique dippers from the show.



Of course, milk bottle collectors had a lot to show.

This platform creamery scale with seven brass bars that could weigh up to 1,000 pounds was a great attraction.

Southeast Pennsylvania Grazing Conference Set

QUARRYVILLE, (Lancaster Co.)-To learn how you can not only survive but thrive in today's farm economy, you may want to attend the 7th annual Southeast PA Grazing Conference to be held Monday and Tuesday, February 7 and 8 in the Hoffman Building at the Quarryville Solanco Fairgrounds. Officials say you don't need to be a grass farmer to benefit from this program. Five speakers with an understanding of the times we are in, will give numerous options and ideas that will help your farm's viability in the new millennium. This conference is about planning a profitable future for your farm.

Gerald Fry from Bovine Engineering and Consulting, will discuss from 30 years of experience what can be done with breeding to influence profit in the cattle industry. You can breed for reproduction and maintenance efficiency and avoid common breeding pitfalls. His simple but precise methods are working for cattle breeders all over the world. He has experience with his own cattle and does some direct marketing.

A University of Wisconsin extension agent from Lafeyette CO., John Cockrell, has 20 years experience in setting up low-cost, low labor, low input grazing systems. He will report what is being done on some mid-West dairy farms to maintain profitability. Learn why grass will make more net profit per acre than corn. Learn why production per cow is not the most important question you can ask about profit on a dairy farm.

Two experienced graziers Dale Nuefeld from Bradford Co. and Jeff Wolfe from Adams Co. will share from hands-on experience how to develop a grass dairy and what is possible and practical on the working model. Dale is a seasonal producer and has 15 years experience. Seven of those years he has been doing seasonal calving and is excited about the increased profitability. He will point out why some graziers fail.

Jeff has experience working on one of the largest dairies in the state so he brings along a unique perspective that can be helpful to any serious dairy farmer. He too is seasonal and will share about the profitability and challenges of having all the cows dry at once. He will outline the advantage of variety in grass species.

John Thyssen, plant breeder originally from Holland, will talk about what is being done to ensure the best possible grass species for the grazier. He will showcase the Kramer trial in Wisconsin. This trial showed side by side that ryegrass can survive tough winters and make a diffence in milk production and enhance, the bottom-line.

There will be exhibits related to the grass business giving you an opportunity to meet some of the progressive, forward thinking, supporters of Lancaster Co. graziers. On Tuesday, you will be served a full course meal catered by Yoders Delicatessen. Don't miss this opportunity to learn and trade ideas with farmers that are serious and upbeat about the future of agriculture in this area.

7th Annual

Southeast PA Grazing Conference

Monday Tuesday, February 7 & 8, 2000
Quarryville Pennsylvania, Solanco Fairgrounds, Hoffman Building
Route 472 South

Sponsored by Lancaster County Graziers

THEME: Gold Is In The Grass

Monday - February 7, 2000

12:00 Noon	**Registration** - Visit With Exhibitors
12 30 P M	**Dale Nuefeld** - *Update on Profitability of Seasonal Grazing Should I Do It?*
1 30 P.M	**John Cockrell** - *Grass Management (Part 1)*
3 00 P M	**Jeff Wolfe** - *Grazing from a Wolfe's Point of View*
4 00 P M	**Open Forum** Question And Answer Session With Speakers

Tuesday - February 8, 2000

7 30 A M	**Registration** - Visit With Exhibitors
8 00 A M.	**Gerald Fry**- *Breeding for a Profitable Grazing Cow (Part 1)*
9.30 A M	**Break** for coffee, milk, and doughnuts Visit with speakers
10 30 A M	**John Thyssen** *Choosing the Right Grass Species for your Farm*
12 00 Noon	**Lunch** - Visit With Exhibitors
1 30 P M	**Gerald Fry**- *Breeding for a Profitable Grazing Cow (Part 2)*
2 30 P M.	**John Cockrell** - *Grass Management (Part 2)*
3 30 P M	**Workshop With Speakers**

Tapes available of all sessions from Cocalico Cassettes (717) 336-4179

Cost: Preregistered - $25 00 per person, $15 00 per additional person(s) from the same household (registration below **must** be postmarked by February 1, 2000) Late registration and walk-ins $40 00 per person Lunch included **Sorry no refunds; no one day discounts** Use the form below to insure your place at the conference (*space is limited*) and save $15 00 For more information, contact **Arden Landis - (717) 529-6644.**

National Highway-Rail

HARRISBURG (Dauphin Co.) — Crossing train tracks safely with bulky farming equipment can be a dangerous seasonal challenge, according to Operation Lifesaver (OL), a nonprofit safety education organization.

That's why OL and safety partners at the Pennsylvania Departments of agriculture, transportation, the National Transportation Safety Board (NTSB), the Federal Railroad Administration, and the National Education Center for Agriculture Safety joined together for an important safety launch Saturday at the Pennsylvania State Farm Show.

Pennsylvania Agriculture Secretary Samuel E. Hayes Jr. and Pennsylvania Transportation Secretary Brad Mallory participated with Operation Lifesaver President Gerri Hall and NTSB Member George Black in the unveiling of a new safety decal (Field to Field: Yield to Trains) to be place as a reminder on farming equipment.

❖ FARM FORUM ❖

(Continued from Page A10)

cient to being exploited. If large farms hire Mexicans with green cards in order to profit, this crosses the line from efficiency to exploitation. Efficiency is always rammed down the farmer's throat, but never seems to apply to the rest of the food chain. In 1980, dairy farmers received 52% of the consumer dollar now that figure is down to 30% or less. I suspect that processors have also become more efficient, leading to huge profits, which they use to consolidate their power over us.

The second one-sided story is the over production line. Our prices are low because milk production increased faster than the increase in dairy product use last year, right? Fact: the United States has not produced enough milk to meet domestic demand for several years. Has anyone said that this 1.6 billion-pound "surplus" last year was less than the INCREASE in dairy imports for fiscal year 1999? We are told that the world price is under $10 per hundred weight. We imported $1.57 billion worth of dairy products in fiscal year 1999 or about 16 billion pound milk equivalent. This represents at least a 7 billion-pound milk equivalent trade deficit in dairy products. Talking heads can talk until they are blue in the face about expanding export markets but the fact remains that imports are out pacing exports at an alarming rate.

We hear a lot about "Market Forces" as if these are uncontrollable, much like the weather. Hogwash. "Free Trade" is allowing foreign dairy products to flood our markets and hold down producer prices, causing untold suffering for farm families. This is abhorrent, unjust and immoral. WE MUST DEMAND A TRADE BALANCE FOR DAIRY PRODUCTS. Some will howl protectionism. Is there anything wrong with protecting America's ability to produce it's own food? I do not consider the destruction of America's farms to be "Progress."

Dairy of Distinction

Dairy Of Distinction Is Public Relations Tool For Farm And Industry

(Continued from Page A1)

does," said Zimmerman. "It's a good public relations tool — just the name means there's something special about the farm."

According to Hileman, the program's objective is not just to reward farmers for keeping their barns painted, it's to promote milk. "What better promotion for milk is there than keeping the farms neat and clean," said Hileman.

In Hileman's district, the committee hosts a banquet to honor the new Dairy of Distinction award winners. During the banquet, slides of each farm are shown and the entire family is recognized.

"The committee contacts local banks and businesses to sponsor the banquet," said Hileman. "Because of our fund raising efforts, we are able to provide four tickets for each winning family."

Past Dairy of Distinction winners are also invited to the banquet. Last year 88 people attended the banquet honoring the District 14 Dairy of Distinction winners.

The Northeast Dairy Farm Beautification Program oversees the Dairy of Distinction program for Pennsylvania, New Jersey, New York, and Vermont. Winners are presented with a Dairy of Distinction sign that they can post at their farm's entrance.

Pennsylvania winners of the Dairy of Distinction program are also honored during Ag Progress Days in State College and are featured in a special section of *Lancaster Farming*. The paper will also provide Pennsylvania winners with an 11x14 color photograph of their farm.

Zimmerman encourages fellow farmers to apply for the Dairy of Distinction award. "It shows people that we are proud to be farmers," said Zimmerman. "It's an honor and a privilege to display that sign."

'You don't have to have some big wonderful showplace. It's just about keeping your farm nice and clean," said Zimmerman. "Besides, as a farmer, when I see a farm that isn't kept up, it makes me wonder how their farming practices are."

Pennsylvania dairy farmers can apply for the Dairy of Distinction award by sending this application to Michael O'Conner, Penn State University, by April 15, 2000.

Sheep Series In February

YORK (York Co.) — Area sheep producers are invited to attend a three-part sheep series planned here for three Tuesday evenings beginning Tuesday, Feb. 15, from 7 p.m.-9 p.m., and continuing Feb. 15, 22, and 29.

The meetings will be conducted at the Penn State Cooperative Extension Office in East York in the county Annex Building.

Keeping up with health information when caring for livestock is always important. Dr. Tom Drake from Penn State's Veterinary Diagnostic Lab will discuss some of the most challenging sheep health concerns. These include Johne's disease in sheep, foot rot, ovine progressive pneumonia, Caseous Lymphadenitis, and scrapie. Tips for prevention and management interventions will be highlighted. This presentation will take place at the Feb. 15 meeting.

Specialization in the sheep enterprise may provide some excellent marketing opportunities. Producers may want to learn ways to process their wool into consumer products to add value to the commodity. Sheep producers Gretta Dise, Glen Rock, and Leslie Orndorff, Brodbecks, will provide tips on what producers can do with their wool. This will include ideas for having wool processed into consumer products or carded for hand spinning or quilt batts. The discussion will address ways to utilize wool from meat breeds. Crafty items made with wool will be shown at the Feb. 22 session.

Dealing with dead sheep is more challenging without rendering plants willing to process them. Building an on-farm composter for sheep disposal is an excellent way to handle this problem. David Greene, retired Carroll County extension director and sheep producer, will discuss how to construct a composter. Opportunities in the sheep industry are increasingly available in niche and specialty markets.

Advance registration is requested by the day of the first session on Feb. 15 to the customer service desk at the York Extension Office, (717) 840-7408. Cost for all three sessions is $5/farm operation to cover the cost of materials.

PENNSTATE College of Agricultural Sciences

From the Department of Dairy and Animal Science

This regular column from Penn State's Department of Dairy and Animal Science features the research findings, student opportunities, and resports on other important topics generated in the Department. The back issues of the column are archived on *Lancaster Farming's* Internet *www.lancasterfarming.com* home page. Look for them.

Induced Lactation as a Tool to Increase Dairy Farm Profitability

By Ronald S. Kensinger
Department of Dairy & Animal Science
Pennsylvania State University

Profitability on a dairy farm is defined by the simple equation:

Profit = (price/cwt of milk – cost/cwt of milk) X volume.

Reducing the cost of milk production offers the most promising opportunity for dairy producers to increase profitability, and has been the subject of recent research within Penn State's Department of Dairy and Animal Science in the College of Agricultural Sciences. Most dairy producers realize there are a limited number of strategies to increase the price they are paid for milk. The volume of milk produced per farm has steadily increased in recent decades, and will continue to increase as limited by land mass, nutrient management regulations, and the availability of cows, facilities and labor. Therefore, controlling the cost of producing milk plays a significant economic role at the farm.

One factor that increases cost of producing milk is the significant involuntary cull rate on the dairy farm. This often occurs when otherwise healthy cows do not conceive in a timely way, and need to be culled from the herd. Options include replacing them with heifers from the farm, or purchasing a pregnant heifer or cow that is near calving. This reduces profits on the farm, and it is our goal to reduce this cost.

Dairy producers are well aware that the primary reason to rebreed a cow is to gain the resulting calf, and to prepare the cow for another lactation It is the lactation that has the greatest impact on farm profitability, as most income results from sale of milk. The goal of our research is to treat those open cows in a manner that creates a brief "artificial pregnancy", in order to stimulate udder development and induce them to have another lactation.

The basic methods in this procedure were introduced 25 years ago by research at Ohio State University, but were not refined to the point of 100% success rate Furthermore, no company or organization attempted to take the method through the process of approval required by the U.S. Food and Drug Administration (FDA). FDA approval is essential if a technology like this is to be widely used in the industry.

Research at Penn State modified earlier methods in terms of estrogen and progesterone (the natural hormones of pregnancy) administration. In addition, we utilized bST after the cows began to produce milk. Results were very encouraging, as the induced cows produced an average of 60 pounds of milk/day for 305 days. Furthermore, most of these cows, which were problem breeders at the start of the trial, conceived during the induced lactation. Thus, they have returned to the regular herd, and continue to be profitable animals.

We then compared the profitability of retaining these cows in the herd to the alternative of raising replacement heifers. Results showed that the average dairy farm could increase profit by about $520 every time a cow is induced to lactate rather than replace her with a heifer. Depending upon the size of the farm, the impact could be very significant.

In addition, we hope to extend our studies to determine if these technologies can be applied to young heifers to get them producing milk earlier in their lives, and improve lifetime milk production. Since this procedure is not approved by FDA, we must ensure this technique is safe for animals and people. We hope that private industry will partner with us in our desire to ensure that dairying remains profitable.

Colleagues who have contributed significantly to this research include Drs Larry Muller, Mike O'Connor, and Steve Ford, research specialists Ann Magliaro and Dawn Sills, and students Adam Kauf, Emma Herscher, Shannon Beabes and Steve Blackburn

Donaldson Re-Elected To AFBF Board

CAMP HILL (Cumberland Co.)–Pennsylvania Farm Bureau president Guy Donaldson of Orrtanna has been re-elected to a two-year term on the American Farm Bureau Federation (AFBF) Board of Directors and appointed to its Executive Committee. He was re-elected during the nationwide farm organization's 81st annual meeting earlier this month in Houston, Texas. Donaldson attended the annual meeting as one of three Voting Delegates representing the Pennsylvania Farm Bureau. He has served one the American Farm Bureau board since January, 1998.

Donaldson was appointed to the AFBF Board's Executive Committee for the first time. He will represent the Northeast state farm bureaus as one of six members on the committee The Executive Committee's responsibilities include approval of the budget for the nearly five-million member organization and handling items of concern which need action before the next scheduled board meeting. The 32-member AFBF Board of Directors meets five times per year

Donaldson has been president of Pennsylvania Farm Bureau since April, 1996. Prior to that he had served as the organization's vice president since 1987 He and his wife, Betty, in partnership with their three children, operate a 550-acre fruit farm in Adams County They grow apples, peaches, cherries and vegetables and operate a retail farm market in season.

Pennsylvania Farm Bureau is a non-governmental voluntary farm organization which represents over 27,300 farm and rural families. It is one of 50 state farm bureaus plus Puerto Rico which comprises the nation's largest general farm organization, the American Farm Bureau.

Glickman Announces New Funding, Technical Assistance For Small Farmers

WASHINGTON, D.C.–Agriculture Secretary Dan Glickman announced two new steps to help small farmers and ranchers find better ways to market and export their products.

"There is no higher priority for USDA than working to ensure the long-term survival and economic well-being of America's small- and medium-size family farms," Glickman said. "Expanded export opportunities and improved marketing offer tremendous opportunities to boost small farm incomes during this time of depressed prices."

Glickman announced that USDA will provide $500,000 to help small farmers develop new ways to market their products, including direct selling to restaurants and institutions, agri-tourism, and pick-your-own farms. Under USDA's Sustainable Agriculture Research and Education Program, the University of Vermont, University of Nebraska, University of Georgia, and Utah State University will select and assist specific new marketing projects that will benefit smaller farms.

In addition, USDA will offer technical assistance to help small farmers and ranchers form cooperatives to export crops and livestock to international markets. Loans are available to help finance the development of value-added processing at existing cooperatives.

Glickman made the announcements at a meeting of USDA's Advisory Committee on Small Farms. The 19-member committee is composed of small-scale farmers, ranchers, and woodlot owners who advise the Secretary on policies and programs to assist America's smaller farms.

USDA has also assisted America's small- and medium-size farmers by targeting emergency assistance for hog, sheep, lamb, and dairy farms.

Feds Promise To Give Growers $8.8 Million To Fight Plum Pox

HERSHEY (AP)–To fight an outbreak of plum pox virus in Pennsylvania orchards, federal officials are promising to spend $8.8 million, with $5.1 million designated for four affected orchard owners and two nurseries to replace income lost through destruction of infected trees.

Growers said the emergency money, together with plans that show less orchard destruction than first feared, leave them more hopeful about the future of Adams County peaches.

"We're only taking out blocks where we have a positive for plum pox virus," Welliver said Wednesday. Barring additional discoveries of the virus this spring, other fields in the two-township quarantine zone can stay.

"It could create a hardship . . but there's no question in my mind that we're going to get through this," said M. Everett Weiser, an affected grower who has been growing fruit and vegetables in Adams County since 1945.

"We're just not of a nature to give up."

"I think there's a chance to get through it," Jim Lott of Gardners said Wednesday, after an update on the virus at the State Horticultural Association of Pennsylvania meeting in Hershey.

The money is to be released under a declaration of extraordinary emergency signed by U.S. Secretary of Agriculture Dan Glickman last week. It is intended to make up years of lost peach sales for affected growers.

Lott and others also caution that not enough is known about the unusual disease's spread to say they've beaten it.

The virus poses no threat to people. But it causes deformities on stone fruits, such as peaches and nectarines, and eventually saps production from those trees.

Last fall, the virus was discovered in 18 Adams County fields belonging to four growers in the first recorded outbreak of plum pox in North America.

There has been no evidence of the virus at orchards in Lancaster County.

In the middle of spring, federal inspectors plan to begin a round of tree surveys to determine how far plum pox has spread. The fall tests, while helpful in getting an early handle on the infestation, are widely believed to have been too cursory for officials to state for sure that the virus is contained.

Lott said he expects to take a bulldozer to the affected fields.

State Plant Virologist Ruth Welliver said most of the 18 infected fields must be destroyed.

Tioga County Native Wins Fair Person Of The Year

JAYNE SEBRIGHT
Lancaster Farming Staff

HERSHEY (Dauphin Co.) — Anne Clark from the Tioga County Fair was named fair person of the year last Friday night during the Pennsylvania State Association of County Fair's Annual Convention. The convention was held in conjunction with the Pennsylvania State Showmen's Association's Annual Convention.

The Tioga County Fair Board nominated Clark for the prestigious honor. Clark has been active in both her local fair board and the state association for many years. 2000 marked her 26th year at the Annual Convention.

Kevin Houghtaling, President of the Tioga County Fair Board, congratulates Anne Clark for winning the prestigious Fair Person of the Year award at the PSACF state convention last week.

"I was really surprised and honored to have been chosen as fair person of the year," said Clark. "There are 114 fairs, and anyone from any of those fairs can be nominated."

In 1972, Clark was the first woman to be elected to the state executive board, and she has served on several committees since then. Some of the committees she has served on include convention registration and planning, seminar, roundtable, and PSACF promotion at the Pennsylvania Farm Show.

In 1984, she was elected secretary for her county fair board and still holds that position today. While serving on the county board, she helped to increase fair attendance, raise the premiums paid to exhibitors, and increase the size of the Tioga County fairgrounds.

"It's a real honor to think that my own committee thought enough of me to nominate me for this award," said Clark. "But it's just a reflection of the entire fair board. One person doesn't do these things. It takes the entire committee doing things together to make a fair a success."

In addition to serving on her fair board, Clark is also active in her church, serving as youth leader, church pianist, choir director, women's fellowship president, and helping with both bible school and Sunday school. She is also a 4-H leader and serves on the Cooperative Extension executive committee as secretary.

In 1995, Clark was honored by the International Association of Fairs and Exhibitions with the prestigious Hardee's American Heritage Award given for her volunteer efforts in the fair industry. She was also honored in 1997 with the state honorary FFA award.

During the convention, the association also awarded winners of the communications competition. Each fair had the opportunity to enter in the following categories — premium book, premium tabloid, non-premium tabloid, promotional materials, website, scrapbook, fair display, and both amateur and professional videotapes.

The Best of Show award went to Westmoreland County Fair. Winners in the premium book category included Cambria County, Elizabethtown, and Butler Farm Show. Westmoreland won the premium tabloid category, with Montour Delong & Hookstown Fair and Elizabethtown Fair taking second and third place.

In the non-premium tabloid category, Oley Valley, West End, and Greene-Dreher-Sterling were all winners. Centre County Grange won the promotional materials category, with Westmoreland and Elizabethtown taking second and third.

Green-Dreher-Sterling won first place in the website category. Westmoreland and Bedford were awarded second and third place respectively. Scrapbook honors went to Elizabethtown, Spartansburg, and Kimberton. Fair Display prizes were awarded to Jacktown, Oley, and Kimberton.

In the amateur videotape category, Crawford County took first, while Clinton County and Hookstown were awarded second and third place respectively. In the commercial division of the videotapes, Washington County took first, with Fayette County winning second.

1,750 people attended the convention, which was held at the Hershey Lodge and Convention Center last Thursday through Saturday.

USDA Announces Aid For Dairy Farmers

WASHINGTON, D.C.–The USDA recently announced $125 million in direct cash payments to dairy farmers hurt by low prices, and $500,000 to help small farmers and ranchers market and export their products.

"Dairy farmers are being squeezed by market conditions that don't allow them a fair price for their product," said Agriculture Secretary Dan Glickman. "This assistance is sorely needed to help keep many small- and medium-size dairy producers in business until prices stabilize."

The money is in addition to $200 million distributed last summer.

The Dairy Market Loss Assistance program provides payments based on an operation's milk production in 1997 or 1998. Eligible dairy farmers who did not participate in the program last summer must sign up at their local Farm Service Agency offices or USDA Service Centers from Jan. 24 to Feb. 28, 2000.

The USDA also announced it would provide $500,000 to help small farmers develop new ways to market their products.

Under USDA's Sustainable Agriculture Research and Education Program, the University of Vermont, University of Nebraska, University of Georgia, and Utah State University will select and assist new marketing projects such as direct selling to restaurants and institutions, agri-tourism and pick-your-own farms

The USDA will also provide technical assistance to help small farmers and ranchers form cooperatives to export crops and livestock to international markets.

All-Dairy Antiques, Collectibles Show Held At All-American, Scheduled Again

(Continued from Page A28)

figurines, six milk stools (3 wood, 3 metal), and four milk coolers/aerators.

A special feature loaned by the Pasto Agricultural Museum was a rare Mehring foot powered milking machine complete with all parts and original teat cups. A new exhibitor (W. Paul Anderson) exhibited his Ben H. Anderson (Madison, Wisconsin) two-unit milking machine used on his home farm in the early 1940s. In good running condition, it was turned on several times for visitors to hear and feel it operate.

Early advertising was in evidence with several equipment and breed signs. All dairy breeds were represented in a nice display of 35 tin and four cupboard DeLaval advertising cows and calves, five DeLaval match holders, and related items shown in lighted glass display cases.

The exhibits of eight milk bottles collectors added beauty, variety, and additional interest to the overall show. Bottle collectors coming the longest distance were Lyall and Vivian Shaw from East Hartland, CT. They stayed all six days with their beautiful display. Participation by the milk bottle collectors served as a warm-up for the joint tri-convention of the Cream Separator and Dairy Collectors Association with the National Milk Bottle Collectors and Divco Milk Truck Collectors in nearby Hershey, June 2-4, 2000.

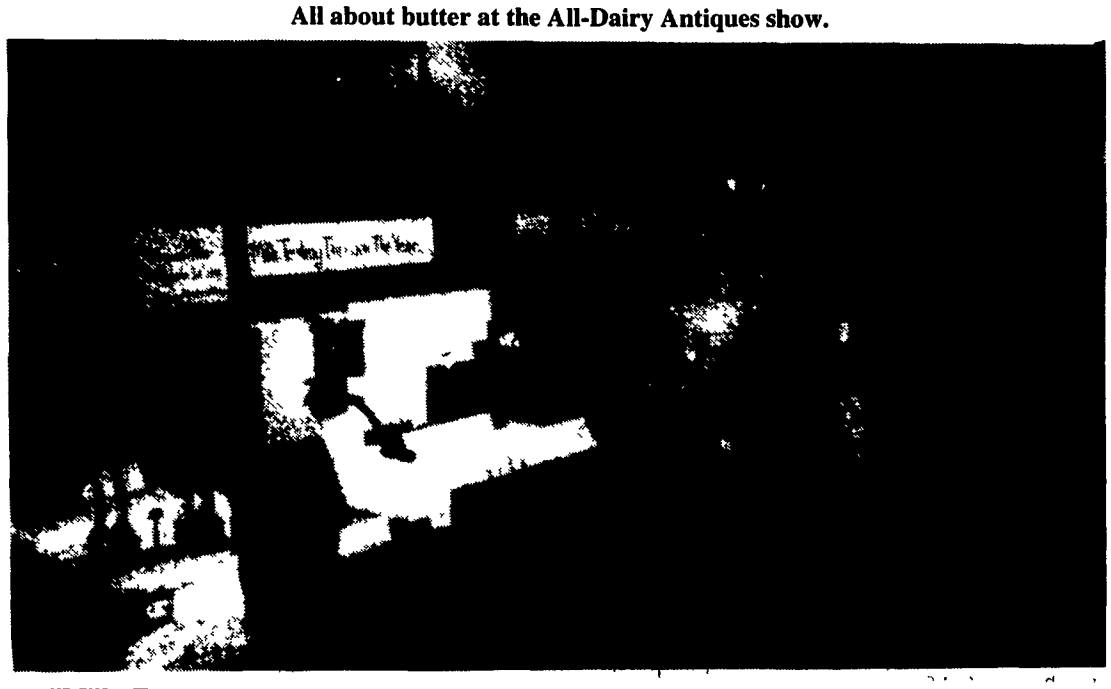
Personal visits with exhibitors during the show indicated all were pleased with this second year show with increased attendance and number of exhibitors. They hoped it would be continued again in 2000.

Well guess what? It will be held in 2000! Management personnel and directors of the Pennsylvania All American Dairy Show have unanimously requested the Dairy Antiques Show to be repeated next year. It will open at 10:00 a.m. on Saturday, September 23 and run until Thursday 12:00 noon, September 28, 2000. Exhibitors are encouraged to stay as long as possible, but are not required to stay all six days.

A new feature for the 2000 show will be DeLaval antiques, collectibles, and equipment. Show management, responding to suggestions from exhibitors and visitors, has decided to designate DeLaval to be the first of several subsequent features in future years. This will be a grand opportunity for the many collectors of DeLaval memorabilia to exhibit, trade, barter, buy and sell at the only all-dairy antiques and collectibles show in the East.

Readers are encouraged to put these dates (September 23-28, 2000) on their calendars right now. Plan to be in Harrisburg, either as an exhibitor or visitor. For more information call or write to Darwin Braund, 238 Agricultural Administration Building, University Park, PA 16802-2600, phone 814-863-1383, e-mail dgb12@psu.edu; or Lolly Lesher, PA Farm Show Complex, 2301 North Cameron Street, Harrisburg, PA 17710-9408, phone 717-787-2905.

All about butter at the All-Dairy Antiques show.



"Milk Testing Through the Years" was an educational exhibit at the collectibles show.

Multiple Peril Crop Insurance

JOHN BERRY
Ag Marketing Agent
Lehigh Co. Extension

Multiple Peril Crop Insurance (MPCI) is a broad-based crop insurance program regulated by the U.S. Department of Agriculture and subsidized by the Federal Crop Insurance Corporation (FCIC).

What causes of yield losses are covered?

For most crops, MPCI covers unavoidable production losses caused by drought, excessive moisture, hail, wind, frost/freeze, tornado, lightning, flood, insect infestation, plant disease, excessive temperature during pollination, wildlife damage, fire, and earthquake. MPCI does not cover losses resulting from poor farming practices, low commodity prices, theft, and specified perils that are excluded in some policies. There are specific restrictions on some crops based on acceptable farming practices.

How much coverage can I purchase?

There are two decisions that determine the amount of protection obtained from MPCI:

• the level of yield coverage chosen

• the level of price coverage chosen

Your insurance yield is based on your actual production history (APH), which is an estimate of your average yield on the insured unit for four to ten consecutive years.

You can insure from the 75 percent of your insurance yield (25 percent deductible) to 50 percent of your insurance yield (50 percent deductible) coverage levels:

Your yield guarantee per acre is equal to your APH insurance yield multiplied by the level of coverage you choose.

Example 1. Guaranteed yield

Assume: 130 bu. APH insurance yield

65% level of coverage

Yield guarantee equals:

130 bu. x 65% = 84.5 bu. per acre

For what price is my crop insured?

You must select an indemnity price level at which yield losses are converted into cash. For example, 1999 maximum price elections set by the Risk Management Agency (RMA) for selected crops were: corn $2.10/bu., wheat $3.30/bu., soybeans $5.25/bu., oats $1.25/bu., grain sorghum $1.95/bu. You can choose an indemnity price between 55

and 100 percent of these maximum elections.

How are indemnity payments calculated?

If your actual average yield (adjusted for quality) is equal to or greater than your yield guarantee, no indemnity is paid. If your average yield per acre is less that your yield guarantee, the indemnity paid is equal to the yield difference times the indemnity price, times the number of acres insured.

Example 2. Indemnity payment Assume:

84.5 bu. yield guarantee

$2.45 price election

300 acres insured

61 bu. actual yield

Indemnity payment:

84.5 bu. - 61 bu. = 23.5 bu.

23.5 bu. x $2.45 = $57.58

$57.58 x 300 acres = $17,273

To encourage broader participation, Congress authorized FCIC to subsidize MPCI premiums. The percent of the premium that is paid from this subsidy is about 23 percent for the highest levels of coverage. This year, the Commonwealth of Pennsylvania will be offering a premium subsidy up to 10% that is being added to the federal subsidy.

Other decisions about MPCI

• Consider companion hail and fire insurance. It's your choice, in any given year, whether to include hail and fire protection in the MPCI policy or insure against these specific risks under a separate policy.

• Consider optional insurance units. If certain location, farming practice, and record keeping criteria are met, then your acreage can be divided into separate insurance units This means you could collect for a loss on one unit even if production on other units is more than the guarantee. For most field crops, producers who elect to insure their acreage as a single unit will receive a 10 percent premium discount.

• Consider increasing the yield coverage level or the price coverage level with supplemental policy options. These are available for an additional premium cost to borrowers who wish to have higher levels of protection.

• Consider supplemental replacement cost insurance. If market prices at harvest are higher than the RMA insurable price, replacement cost insurance will pay you the difference on all bushels for which a regular MPCI indemnity is paid.

Multiple Peril Crop Insurance offers many combinations of coverage levels, unit designations, and add-on features. See your local insurance agent to get details about coverage and premiums available for your own farm.

Tobacco Prices Up Average 3 Cents Per Pound

NEW HOLLAND (Lancaster Co.) — The Pennsylvania Tobacco Marketing Association Auction reported late Thursday that the sale of tobacco at the day's auction had some improved prices, up an average 3 cents per pound.

According to Dennis Hess, auction manager, there were about 71,200 pounds of tobacco on the floor Thursday, of which about 51,000 pounds sold. For the old Pa. 41 tobacco, the average price was 47 cents a pound. The new Pa. 41 tobacco averaged 44 cents a pound.

For the old 609 tobacco, the average price was 48 cents a pound. New 609 averaged 52 cents per pound.

There were three buyers at the sale Thursday. Hess noted that more tobacco other than the 20,000 pounds remaining on the floor is needed. Another auction is planned next Thursday and will continue through about mid-March, according to Hess.

IS IT TIME TO QUIT FARMING?
Roland P. Freund
Penn State Farm Management Extension Agent

With the combination of the effects of the 1999 drought and the present low commodity prices, many farmers are under financial stress. It is important now to take a critical and honest look at the operation to help us decide if there is a future for this farm. To do this, let's look at the process and the questions to be asked and the factors that we need to check.

Can This Farm Survive?

That depends upon many factors, which include the history of the business, the equity situation, profitability, management decisions, and good fortune, blessings or luck, depending on our viewpoint.

How Do We Decide to Continue Or Not?

1. Check Family satisfaction.

Is everybody happy with the situation?

Is each member achieving his/her goals?

Are temper outbursts under control?

Are you resolving all major differences?

Is this the way you want to live the rest of your lives?

If you say "no" more than twice, consider change.

2. Check the history of the business.

Is there a regular pattern of setbacks?

Has it been refinanced one or more times?

Are operations often untimely?

Are you a victim of circumstances?

If you say "yes" more than twice, consider change.

3. Check profitability.

Has Schedule F been negative regularly?

Have accounts payable grown most years?

Are you working away to support the farm?

Are you accumulating operating losses?

If you say "yes" more than twice, consider change.

4. Check equity.

Is it growing over time? If so, you are better able to handle a setback. Is it eroding? (Inherited farm free and clear, now you have very little equity.)

Remember "the first law of holes." When you are in the hole, stop digging!

Three example farms will help us to examine equity. To the casual observer they all appear to be the same:

	Farm A	Farm B	Farm C
Assets:	$,000	$,000	$,000
Current	50	50	50
Intermediate	300	300	300
Long-term	600	600	600
Total Assets	950	950	950

The banker can see some differences

	Farm A	Farm B	Farm C
Liabilities:	$,000	$,000	$,000
-Bills	60	60	60
-Line of Credit	50	50	50
-Credit Cards	40	40	40
Current total	150	150	150
Intermediate	300	200	200
Long-term	400	400	200
Total Liabilities	850	750	550

We see that all three farms enjoy the same level of assets, and all have the same problem of current liabilities. But there is considerable difference in term debt. This can make a big difference to their chances of survival.

Three example farms summary.

	Farm A	Farm B	Farm C
	$,000	$,000	$,000
Total Assets	950	950	950
Total Debt	850	750	550
Equity	100	200	400
Debt.Asset	89.5%	79%	58%
Suggests:	Hang it up	Maybe?	Room?

Farm A has already taken on more debt than the farm should be carrying. Either they purchased real estate before the cattle and machinery were paid down, or they have already been forced to refinance.

Farm B is still in the "red light" zone, but they might be able to survive a refinance, however they should seriously consider partial liquidation to reduce the debt burden, or complete liquidation to preserve the equity they still have.

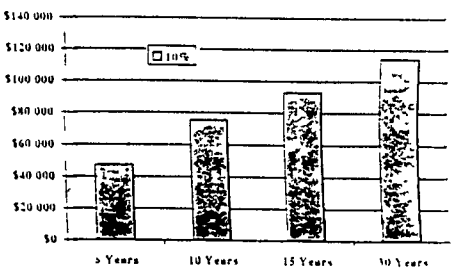
Farm C has some options, but they are not out of the woods. They can not survive many more bad years.

When we look at debt, there is a danger that we just look at the advantages of refinancing obligations into longer repayment periods to give us "breathing room."

The charts below illustrate the credit we can get for a payment of $1,000 per month at 10 percent interest.

4. Cont. Check Equity - Growth

Loan for $1,000 / mo. payment



We must also check on the long-term impact of stretching payments. The chart below shows that if we keep our term of debt to 10 years, then in 30 years we can retire three 10-year obligations of $76,000 each, a total of $227,000 and pay $133,000 in interest.

If we stretch our debt out to 30 years, we can only retire one "dose" of $114,000 and pay $256,000 in interest for the privilege. Stretching out payments kills our chance of enjoying healthy equity growth.

7. Check liquidation.

1. Consider partial liquidation if there is valuable equipment, livestock and even land.

2. Try to keep any asset sale voluntary–you control it.

3. Avoid forced sales where banks, and creditors control things. These result in bargain priced auctions and serious loss of your equity.

8. Check bankruptcy

This is never desirable, but it may preserve a little equity and it may provide some tax protection. It is important to consult a CPA and consult an attorney.

Consider the future consequences–can you live with these.

9. Check alternatives.

Sell out and start over. Perhaps the definition of insanity applies–doing the same thing and expecting a different outcome.

Off-farm employment may be a mixed blessing. How long do you want to subsidize an unprofitable farm?

New career opportunities do exist in our present economy. Remember, there is life after farming!

10. Check heroes.

Abraham Lincoln continued to pursue his goals despite numerous setbacks. Milton Hershey failed at several businesses before he made a success of the last one.

Summary

Use the checklist and discuss matters with the family. Don't rush the decision. Seek the help of a financial and business adviser, and talk to your trusted friend or family member.

Don't try to do it alone–seek support. Take time to be objective and realistic. Try not to let emotions make the decision.

Call us if there is anything we can do to help at your local Penn State Extension Service Office.

Glickman Names Three Producer-Members to Mushroom Council

WASHINGTON, D.C.–Agriculture Secretary Dan Glickman appointed three mushroom producers to the Mushroom Council, which administers the national mushroom promotion and research program.

Newly appointed to serve three-year terms are Christopher P. Alonzo of Kennett Square, Pa., Region 2; Clark R. Smith of Soquel, Calif., Region 3; and Darrell G. McLain of Gonzales, Texas, Region 4.

The Mushroom Council is composed of a minimum of four and a maximum of nine members representing producers and importers in four regions throughout the United States. Region 1 encompasses 23 New England, midwestern, and western states. Region 2 covers six Middle Atlantic states plus the District of Columbia. Region 3 is composed of seven western states, Alaska, and Hawaii. Region 4 covers 12 southwestern and southeastern states.

The total volume of mushroom sales in the United States during the 1997-98 production year was over 871 million pounds. Per capita consumption of mushrooms in the United States has increased from 3.7 pounds in 1993 to 4.0 pounds in 1998.

NCFC Council Urges Administration to Strengthen U.S. Farm Economy

NEW ORLEANS, La.–National Council of Farmer Cooperatives' (NCFC) Council passed a number of resolutions during the trade association's annual meeting, calling on the Clinton Administration to take specific action on initiatives that will help meet the current challenges facing U.S. agriculture.

"We believe it is critical that action be taken that will lead to a sustained economic recovery, improved farm income and risk management, increased market opportunities, and growth in exports for U.S. agriculture," said NCFC Chairman Don Schriver, executive vice president of Dairy Farmers of America, on behalf of the council. "It is within this framework that current farm policies and related programs should be reviewed and evaluated, as well as strengthened."

Resolutions passed by the Council include:

•Maintain support for the Capper-Volstead Act

•Strengthen programs relating to cooperative research, education, and technical assistance

•Eliminate regulations that discourage cooperative self-help efforts, including those relating to commodity purchase and federal crop insurance programs

•Ensure access to capital and credit through support for the cooperative Farm Credit System

•Provide adequate tax incentives to encourage investment, attract capital, and strengthen efforts by farmers and their cooperatives to become more involved in value-added production and processing, capitalize on new market opportunities, and meet global competition.

In addition, the Council also resolved its support for strengthening trade and export programs, including:

•Approve permanent normal trade relation (NTR) for China and its entry into the WTO

•Eliminate unilateral trade sanctions and embargoes relating to agriculture

•Support approval of Fast Track trade negotiating authority

Farming Forecast

A storm approaching the state this weekend promises to bring snow throughout the mid-Atlantic states later Sunday into Monday. There is the potential for a few inches of snow locally, even if some sleet mixes in as well. It should remain cold behind this storm later Monday and Tuesday, but warmer air is set to make a return to the region later next week

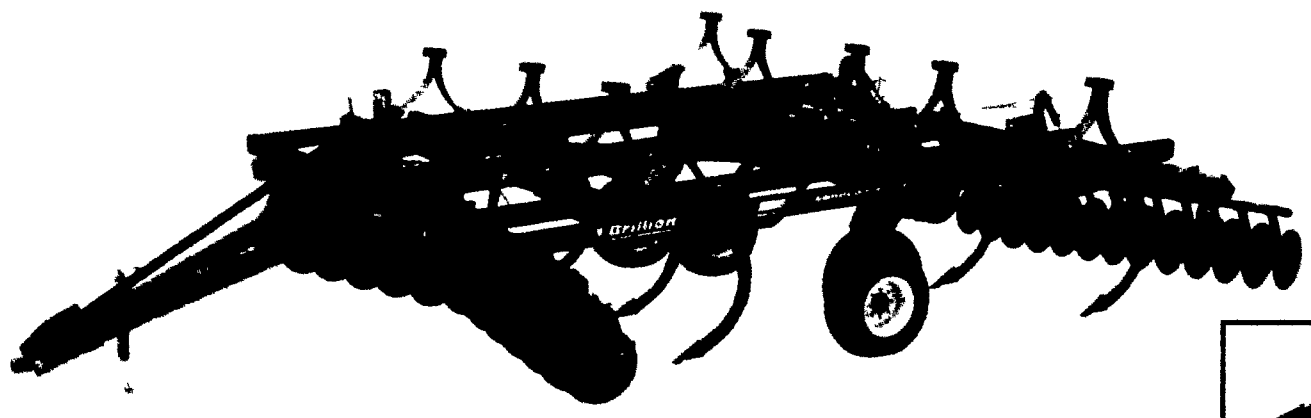
Brillion

Land Commander II



THE MOST VERSATILE CONSERVATION TILLAGE TOOL AVAILABLE.

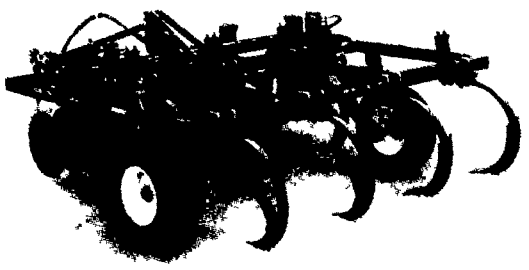
- Cut through heavy residue with ease
- New, longer heavy duty "A" frame drawbar with self-leveling hitch.
- 39 inch under frame clearance for easy trash flow.
- Auto-reset shanks work the ground down to 18" deep to break up hard pan and improve water holding capacity and root growth.
- Brillion durability and dependability for long, trouble-free operation.

Super Soil Builder

SELF LEVELING - EXPANDED FRAME

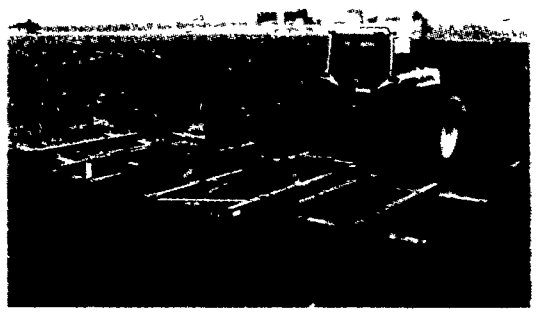
The Super Soil Builder has an expanded frame

1. 139" front to back;
2. with three ranks of chisel shanks for smooth and easy flow of residue through the machine. The Super Soil Builder is self-leveling, regardless of working depth
3. Optional hydraulic coulter control allows the oprator to adjust the cutting depth of the coulters or to raise them completely out of the ground on the go, from the tractor seat



Pulvi-Mulchers

THE IDEAL ONE-PASS SECONDARY TILLAGE TOOL TO PROVIDE THE PERFECT CLOD-FREE SEEDBED FOR HIGHER YIELDS.



- Available in widths from 7'4" to 30' to accommodate any size operation
- High-clearance frame allows free flow of trash through the machine
- Choice of 20" notched or crowfoot ductile iron roller wheels with five year limited warranty against breakage
- Heavier duty, longer drawbar to accommodate dual wheeled tractors

Contact your local Brillion dealer for details.

Breakfast and Beyond

(Clockwise from top left) White sandwich bread, lowfat crumb cake, toast, bagels, Quick and Fun Soda Cracker Bars, Cream Cheese Scrambled Eggs in Toast Cups, or Tortilla Hash can provide a great start to your day.

PUFFY FRENCH TOAST

1 cup flour
¼ cup sugar
1½ teaspoons baking powder
½ teaspoon salt
¼ teaspoon nutmeg
¼ teaspoon cinnamon
1 cup milk
1 egg, beaten
8 slices bread

Blend egg and milk together. Add to dry ingredients in bowl. Dip each slice of bread in mixture to coat both sides. Place on lightly greased griddle and brown on both sides. Serve with butter and syrup.

Doris Adams
Windber

BROWNED CREAMED DRIED BEEF

½ cup butter
½ cup flour
4 cups milk
½ ound smoked dried beef, very thinly sliced
Salt, freshly ground pepper

Melt butter in heavy skillet and stir in flour with wooden spoon. Cook over medium-high heat, stirring constantly, until it turns golden brown. Experiment with the degree of browness you like. Some like it light, some medium, and some dark.

When flour is browned, gradually add milk and simmer on low heat for five minutes. Taste for seasoning. The amount of salt needed depends on the saltiness of the beef.

Elisa Ranck
Lancaster Co.
Dairy Princess

BANANA BREAD

½ cup butter
1 cup brown sugar or less
2 eggs
2 large bananas, mashed
1 teaspoon baking soda
¼ teaspoon salt
1 cup white flour
1 cup whole wheat flour
½ cup yogurt or buttermilk
1 teaspoon vanilla or lemon extract
½ cup chopped pecans

Cream together butter, sugar, and eggs. Stir in mashed bananas.

Mix together dry ingredients and add to banana mixture, alternating with yogurt or buttermilk. Add vanilla or lemon extract. Fold in chopped nuts. Put in greased loaf pan.

Bake at 350 degrees for 50 minutes or until it tests done.

Serves 12.

Elisa Ranck
Lancaster Co.
Dairy Princess

BANANA BREAKFAST DRINK

3 ripe bananas
3 cups milk
3 tablespoons honey
1 teaspoon vanilla extract

Place all ingredients in blended; cover. Blend until smooth and frothy. Serve immediately.

Amanda Martin
Lebanon Co.
Dairy Princess

Featured Recipe

Mornings are hectic.

Despite busy schedules, a healthful breakfast can be quick and convenient. Studies show that children and adults who eat breakfast may realize benefits such as increased concentration, improved attitude, increased energy, improved overall diet, and the ability to work or study more efficiently.

Weight control might actually be more difficult for people who skip breakfast. Research shows that breakfast skippers have metabolic rates that are four to five percent below normal. Even if caloric intake remains constant, this can result in weight gain of one pound every seven weeks or about eight pounds a year.

Eating breakfasts of breads and complex carbohydrates can help increase energy levels throughout the day. Breakfast means "to break the fast" after anywhere from eight to 12 hours without food during the night. During that time energy levels drop. Breakfast helps the body regain glucose levels and increase energy levels.

When you consider how long it's been since you've had a meal, it's obvious that refueling at breakfast will make you feel and perform better during the day.

CREAM CHEESE SCRAMBLED EGGS IN TOAST CUPS

3-ounces lowfat cream cheese, softened
¼cup lowfat milk
3 whole eggs plus 3 egg whites
2 teaspoons chopped chives, more for garnish
½ teaspoon salt
2 tablespoons butter
8 slices white sandwich bread, crusts removed, optional

Beat cream cheese with hand mixer until smooth. Gradually add milk. Add eggs, egg whites, chives, and salt; mix well.

Melt butter in skillet. When sizzling, pour in egg mixture. Cook over medium heat, stirring until eggs are thick and creamy. Serve in toast cups and garnish with additional chives. Toast Cups: Lightly butter both sides of bread. Push bread into lightly buttered muffin cups so that the corners form points. Bake at 350 degrees for 8 to 10 minutes or until golden brown.

BREAKFAST WAFFLE CLUB SANDWICH WITH HONEY APPLE SYRUP

¾ cup honey, divided
¼ cup apple juice
2 tablespoons butter
2 crisp, red apples, cored, sliced
8 frozen waffles, toasted
8 thin slices ham

To prepare syrup, place a half cup honey and apple juice in small saucepan over medium heat; heat throughly. Set aside and keep warm. Melt butter with remaining ¼ cup honey in large nonstick skillet over medium-high heat. Add apples; cook and stir about four minutes or until apples are lightly caramelized and crisp-tender. For each serving, place two waffles on plate, overlapping slightly. Top each waffle with one slice ham. Top with ¼ apple mixture and drizzle with ¼ cup syrup.

Renee Blatt
PA Honey Queen

HAM, EGG, AND CHEESE CASSEROLE

8 slices stale bread, torn in bite-sized pieces
6 eggs
1 teaspoon dry mustard
2 cups milk
½ pound ham, cubed
2 cup cheddar cheese, shredded

Arrange bread in greased 9x13-inch baking pan. Beat eggs in mixing bowl until foamy. Add mustard, milk, ham and cheese, mix well. Pour over bread. Chill seven hours or overnight. Bake at 350 degrees for one hour or until firm. Let stand 5-10 minutes before serving.

Stefanie Long
Tioga Co.
Dairy Princess

BUTTERMILK PANCAKES

2 cups flour
2 tablespoons sugar
2 teaspoons baking powder
1 teaspoon baking soda
1 teaspoon salt
2¾ cups buttermilk
2 eggs
¼ cup butter

Stir together flour, sugar, baking poweder, baking soda, and salt. Add remaining ingredients. Stir until batter is fairly smooth. Using a ¼ cup measure, pour batter onto 400-degree lightly buttered griddle. Turn when tops are covered with bubbles. Turn only once.

Amanda Martin
Lebanon Co.
Dairy Princess

QUCK AND FUN SODA CRACKER BARS

1½ cups sugar
⅔ cup evaporated skim milk
1 teaspoon vanilla extract
6 tablespoons peanut butter
⅔ cup shredded coconut
38 soda crackers, crushed

In a large saucepan, combine sugar and evaporated milk. Bring to a boil over medium heat and boil for 3 minutes; remove from heat. Add vanilla and peanut butter to sugar mixture; mix well. Add coconut and crushed soda crackers; stir well. Cool slightly. Press mixture into lightly buttered 8x8-inch glass baking dish. Refrigerate for at least two hours. Cut into small squares.

EASY RAISIN BREAD FRENCH TOAST

2 eggs, plus 2 egg whites
½ cup lowfat milk
½ teaspoon vanilla extract
⅛ teaspoon nutmeg
8 slices raisin bread
Cooking spray, optional

Combine eggs, egg whites, milk, vanilla extract, and nutmeg in a shallow dish. Whisk together until well combined

Heat electric grill to medium heat. (Spray with cooking spray if griddle is not nonstick). Dip each slice raisin bread in egg mixture and place onto heated griddle. Brown each side for several minutes until golden brown. Serve hot with favorite jelly, jam, or syrup.

HONEY FRENCH TOAST

2 eggs, slightly beaten
¼ teaspoon salt
¼ cup honey
8 slices bread
¼ cup milk

Combine first four ingredients. Dip bread slices in mixture and fry in butter until golden brown. Serve with honey, sprinkled with cinnamon.

Renee Blatt
PA Honey Queen

FLAP JACKS

1 cup flour
2 teaspoons baking powder
½ teaspoon salt
1 cup milk

Combine ingredients. Fry like pancakes in hot skillet.

The January fog has rolled in.

Within moments, the damp, swirling white cloud has so thickened that one can barely see more than a dozen yards away. Suddenly emerging from the milling mass of moisture comes an apparition, four-legged, black-and-white. The shadowy shape is headed directly for us, coming at a clumsy gallop, with no apparent plans to halt.

At the last moment, as I turn to head off the trotting cow, she hops up into a stall and begins nibbling feed. A small stampede of herdmates follows, slowing as they near the end of the stalls, peeling off, left and right, each staking claim to a spot.

With all the girls inside, the wide doors at the distant end of the dairy barn are quickly slammed shut, closing off the howling wind and drifting snow. With its source of cold-air fuel cut off, the dense fog inside the warm dairy barn dissipates almost as quickly as it formed. Even before all the neck chains have been snapped to the stalls, several of the girls are stretched out on the rubber mats bedded with dry sawdust.

Never mind that cattle are actually more comfortable in colder weather than in excessive heat, so long as they have a dry place, out of the wet and the wind. Never mind that they have access to similar, soft dry beds of sawdust in the overflow housing area of the old dairy barn. The "switch" group of cows, usually the younger heifers and cows milking less because they are farther along in their lactations, still come barreling in through the fog when the doors are thrown open for them to take their turn in the enclosed milking barn.

Always on the lookout for creature comfort.

A quick ski tour through the meadow and fields telltale a host of wildlife also out in search of creature comfort. Birdsongs fill the yard, the number of feathered visitors suddenly swelled with the bitter weather and the easy pickins' at the bird feeders. Blue jays shriek from the pine tree, the titmice titter overhead, two nuthatches parade headfirst down a tree trunk to the feeder and a single, but noisy, crow alights with great flapping and cawing onto a tiptop twig of one old maple tree.

Derrah Dog leads the way, ecstatic at this uncommon, mid-morning jaunt, rejoicing and rolling in the powdery dry snow cover. A creature comfort for her is an adventure walk. So excited she barely knows which way to start, Derrah lopes toward the pond, does an about-face toward the stash of round bales, pausing only briefly to investigate a brush pile. Ahhhh, where to start sniffing first?

Down through the meadow and into the woodlot, an array of wildlife has been calling, leaving tracks so distinctive it's as though each signed a visitor guest book. Meandering trails of dainty paw prints mark the passage of at least one neighborhood fox, whose habits are easily discernible from the stopping points. The fox trail pokes along the edge of the row of round bales, known habitat of a sizeable mouse population, takes an abrupt turn at the wheel of a wagon parked nearby, then heads up over the hill toward the bunker silo, habitat of still more field mice.

Pointy-toed hoof markings bely a deer emerging from the wood to drink at the stream. Squirrel trails crisscross the path, evidence of numerous bushytails busy being busybodies–as only squirrels can be.

Interspersed with neat, stealthily-left wildlife trails are the broad paw prints being joyously scattered across the landscape by Derrah, bounding about as she tries to sniff and sort out this vast, delicious array of intriguing animal scents. Long, straight scrapes along the erratic paw-print trail, left by her sharp toenails, add a distinctive flourish. Combined with my ragged ski marks, we, too, leave signature prints of our passing.

Headed back to the house through the garden, our path crosses the irregular, hopping marks left by our backyard bunny. And, in the meadow, a redtail hawk sweeps down from the sky and plunges between two rows of big hay bales, another creature seeking a morsel of mouse for its dinnertable.

Back in the kitchen, I spy telltale mouse droppings when I open a drawer, and promptly head for the attic to set out rodent bait.

I know that mice must hide, so as not to be eaten. And, mice need creature comfort, too.

But they can go look for it somewhere besides our house.

In the Year 2049, this Morton Building will still be Warranted Against Snow-Load Damage!

Todd & Cecil Irvin
Cecil J. Irvin and Son
State College, Pennsylvania

"Past winter we had at least 2½ feet

of wet snow on our Morton Building with no damage.
In our area numerous farm buildings collapsed under the load.
It's very reassuring to know that Morton's 50 year snow load warranty will be here for my son's future investment."

After more than 250,000 satisfied customers and over 90 years of business experience, we've learned what our customers need. We use that extensive knowledge and expertise to continually refine and improve our designs.

Your building will be backed by the strongest written warranty in the building industry. Morton Buildings non pro rated warranties that include materials & labor offer peace of mind.

Owning a Morton Building. . . its value will last for generations to come!

Cleaning Up Those Credit Card Bills!

Are you starting to hyperventilate at the sight of your mail carrier putting "bills" in your mail box?

Do you break into a cold sweat when you open credit card bill envelopes?

Did you give up keeping track of the amount of money you spend over the holidays using your credit card?

If you answered "Yes" to any of these questions, then you really need to come up with a sensible credit card payment plan. It's time now to get yourself out of credit card debt!

First of all, make a list of all your credit cards. Not all credit cards are created equal. They may all have different interest rates. Rates of interest may range from 9 percent to as much as 24 percent. Do you know the interest rate of your credit cards? In a second column beside each credit card name, write the interest rate.

What's the big deal about having different interest rates? Credit is not free money. If you owe $1,000 at 14 percent, your monthly interest charge will be $11.67. If you owe $1,000 at 22 percent, your monthly interest charge will be $18.33–that's $79.92 more you will be paying by the end of the year.

In a third column, write down the balance you owe for each card Beside that amount in column four, write the minimum amount due. If you are only paying the minimum monthly payment each month, you may be keeping yourself in debt for years For example, if you are paying $20 per month on a $1,000 balance, it will take you approximately 2.7 years to pay it off. Paying more than your minimum balance is the only way to get it paid off as soon as possible. Of course, the best deal is paying the full amount within the first month's grace period.

How do you decide which bill to pay first, and how much do you pay?

If you cannot pay the full balance when the bill arrives, start paying off the credit card which has the highest interest rate. In other words, this credit card will most likely cost you the most money. Next, try to pay off the credit card which has the lowest balance. Always pay more than the minimum payment, even if it is just an additional $10.

When one credit card is paid off, put that same payment amount on the next card in addition to the amount you have been paying. For example, you have been paying $50 per month on credit card A and $75 per month on credit card B. You pay credit card A off this month with a $50 payment. Next month pay $50 plus the $75 ($125.00 total) on credit card B. You'll now pay off credit card B much more quickly which saves you money in the long run.

As each credit card gets paid off, continue to put those additional funds into the cards with which you still have a balance. It will take a few months of watching where all your money is being spent as well as a personal commitment to not get into further credit card debt. The important thing is to always pay at least the minimum on each card and preferable more than the minimum.

Just because you've paid one credit card off, don't fool yourself into thinking you can go out and start charging all over again. Rewarding yourself by accruing new debt is not a good idea. You will only get yourself in credit debt trouble all over again.

Setting financial goals is the key to cleaning up your holiday credit card spending. It will take a full family commitment to accomplish this task. Open communication about everyone's spending habits should also be the topic at your next family meeting. If you would like materials or additional information on setting up a family financial budget, contact your local county Cooperative Extension Office.

ADADC Works To Sell Milk In Schools

SYRACUSE, N.Y.–School beverage choices were once limited to milk and perhaps 100% fruit juice. Now students can choose among a variety of sodas, flavored iced teas, fancy waters, and "juice drinks"; whose advertising and marketing budgets far exceed those of milk. To keep milk competitive, ADADC works with school food service directors to improve milk's image as well as its quality and variety.

This fall, the largest school districts in ADADCs' marketing area–including New York City, Long Island, Yonkers, Newark and Jersey City, Syracuse City, Rochester, Buffalo and Greece–received special "got milk?" menu marketing kits, consisting of a "got milk?" menu board with erasable markers, "Cold Milk Served Here" inflatable cow, milk temperature charts, and a "got milk?" banner.

ADADC also worked with their local advertising agency to create colorful posters to hang in school cafeterias. Designed by Disney style illustrator Chris Dellorco, the *"School Breakfast is Out of This World"* posters are a colorful, fresh adaptation of the milk message for the upcoming millennium. These posters were sent to more than 2,100 top schools and districts throughout the marketing area.

In its 6th year, the ADADC annual milk temperature study continues to help identify and correct barriers to storing and serving milk cold. This year, ADADC received data from 284 districts and 1,643 schools for the total market area (a return rate of 70% of registered schools). Twenty-one-percent of schools fell into the "problem" temperature range: at or above 40.5°F. After working with those schools to correct temperature problems, retesting showed that number declined to 13%.

ADADC worked with Milk-PEP, the processor education program, to test milk vending machines in several Upstate New York schools. Offering a variety of flavors, like iced cappuccino, strawberry and orange creamsicle, and featuring colorful milk mustache celebrities, the machines were tested in key high schools like Corcoran, Liverpool, Oswego, Sweet Home, and West Seneca High Schools. Testing is still underway, but early results show the machines were most successful in the larger suburban districts, with reported sales of 105 units daily. The most popular flavor has been chocolate.

Increasing participation in the underutilized School Breakfast Program boosts milk sales to those schools. ADADC placed Department of Agriculture Chairman, Art Brown, on News 12 NJ, to discuss the importance of school breakfast, what programs current exist, and how parents can find out more. ADADC also arranged for New Jersey School Food Service Association President, Carolyn DeCarbo, to appear in a public service announcement on UPN 9 (a top-rated television station reaching the tri-state area) to encourage students to eat breakfast at school.

In addition, ADADC is targeting New Jersey school districts, which have some of the lowest participation rates in the country, by coordinating promotions in schools in Jersey City, Paterson, and Newark. Items like "got milk?" T-shirts, bookmarks, and rulers will be offered as incentives for children to visit their school breakfast programs.

Paul B. Zimmerman Inc.
WB95PZ Zimmerman Water Bowl
The Unlimited Water Supply For Your Cows!
All New! PBZ-98 Valve
Low maintenance noncorrosive Delrin valve is self cleaning & simple to operate!
Now you can give your cows the water they need to produce more milk. With the Zimmerman Water Bowl, you can do it at no extra cost!
The bowls are designed to comply with known federal and local requirements when installed properly.*
Cows are not designed to push a paddle when they need a drink. This unique watering system provides a continuous supply of fresh water in the way nature intended cows to drink. With a large capacity, fast recovery and a guarantee against breakage, the Zimmerman Water Bowl will revolutionize the way you water your herd.
*All bottom fill bowls require that approved back flow prevention devices be installed in potable water supply lines
Install in new or remodeled facilities or in most existing barns on manger or stall side!
• 12" in diameter & 8" deep.
• 3 gallon capacity- 6 times that of other bowls!
• Fast recovery- 3 gallons per minute at 40 psi.
• PVC construction- guaranteed unbreakable, inhibits bacterial growth.
• With nonrestrictive splash guard.
• Cleaner- water fill located at bottom.
• Bottom drain- for easy cleaning.
• Adjustable water level.
MORE WATER MEANS MORE MILK...NATURALLY!
Heavy duty steel clamp & mounting bracket totally supports bowl.
Two Coat Process!
Added Value With Our 2 Coat Process!
1 Five step metal preparation, including iron phosphate conversion coating, to enhance adhesion & prevent undercoat corrosion.
2. Zinc rich epoxy powder undercoat
3 TGIC polyester powder top coat, baked at 400° to fuse costs, forming a cross link molecular bond

Mexico Students Find Hershey Tour, Garden Spot Enticing

ANDY ANDREWS
Lancaster Farming Staff

NEW HOLLAND (Lancaster Co.) — Three teen-agers from Mexico have some memorable experiences to take back with them, eventually, to their home country.

Part of a cultural exchange arranged by the Pennsylvania Department of Agriculture through the Honorable Guillermo Gonzalez Zamacona, municipal president (mayor) of Capulhuac, Mexico, several students continue as guests of Lancaster County residents.

In return, three Lancaster County students, all FFA members, will experience life in Mexico for 10 weeks.

All three Mexican students are from Capulhuac, a small town west of Mexico City.

Traveling to the states has proved memorable for one guest, Gabriela Rodriguez. Gabriela, 15, in the 10th grade, smiles when she thinks of her favorite experience so far — taking a tour of the Hershey Chocolate Factory. With her friends Rosa Maria Rodriguez and Esthela Ramirez, some happy memories will be the sweet smell of cocoa and sugar and watching Hershey Kisses arrive on the conveyor belts.

Gabriela said it was a "neat experience." Her parents, fluent in English, will host Rachel Day, daughter of Cliff and Anna Day, New Holland, during the next 70 days.

Amanda Sauder will be hosted by the parents of Rosa Maria Rodriguez. Rosa Maria is being hosted by Kathy and Karl Zellefrow and their three children in Narvon.

Esthela Ramirez said the experience has been "good for me." Esthela, 16, is the daughter of Esthela and Thomas Ramirez and in the 11th grade at the high school in Capulhuac. Sabrina Hoffner, daughter of Roger and Bonny Hoffner of New Holland, will be hosted by Esthela's parents in Capulhuac, Mexico.

Rosa Maria found tours of Pennsylvania Amish country around Intercourse "interesting." Rosa Maria, 17, is a senior at Capulhuac and the daughter of Georgina and Albino Rodriguez.

Gabriela's mother is a teacher and her father is an engineer with Pemex, on the border of U.S. and Mexico.

Rosa Maria's parents are candy factory workers in Mexico.

Esthela's father is a medical doctor and her mother is a homemaker. Esthela is staying with Joan and Pablo Perez Padilla and their two daughters in New Holland.

The three will visit Penn State and Philadelphia.

Late last week was the first time they saw snow in their lives, according to Sam Hayes Jr., state secretary of agriculture. The students will be also touring the New Holland plant in New Holland. Also, the three students from Lancaster County, all Garden Spot students and Grassland FFA members, will tour New Holland in Queretaro, northwest of Mexico City.

Hayes said the students were invited to the United States because of an ongoing trade mission. Part of the mission, Hayes noted, was to build relationships with youth, because we "live in a global marketplace," he said. "These six people will define the 21st Century."

Teen-agers from Mexico and Lancaster County were at Garden Spot High School to speak about their experiences recently. From left, Chris Herr, deputy secretary of ag; Don Reed, Garden Spot High School principal; Sabrina Hoffner; Esthela Ramirez; Rosa Maria Rodriguez; Amanda Sauder; Gabriela Rodriguez; Rachel Day; Cliff Day; and Sam Hayes Jr., state secretary of agriculture.

The area where the three students live in Mexico is a valley surrounded by a lot of mountaints, dry most of the year, with temperatures consistently in the 70s. There are many small farms with a few goats and sheep, pigs, and some donkeys in Capulhuac.

There are slaughter plants for the sheep and lamb industry nearby.

Gabriela and friends noted how different the food is. They eat beans, quesadillas (tortilla-like bread rolled up with chicken and cheese), mole (sliced cactus that is fried or boiled), nopales (cactus, eaten like tomatoes), tortillas, gorditas, barbacoa, and others. They drink water that is boiled with fruits, including lemons and oranges.

Beans are eaten ground up, a mashed-potato like "chocolate pudding," noted Gabriela.

Most visitors to Mexico have to be aware, though, of the "candies" served. The candies, known as "Tamarind," are not what you think, according to Kathy Zellefro, one of the host parents. Tamarind are fruits made of salt and hot chili pepper, though they consider them a candy. To Westerners, Tamarinds can really "water the eyes" with their high seasoning.

Barbacoa is sheep or goat meat.

But Gabriela assures the visitors that there are plenty of fast food places, including McDonald's, Burger King, Pizza Hut, and others, in Mexico.

The visiting students from Lancaster County will help present the ideologies of the largest rural youth organization in the world — FFA — to Mexican families.

And they will also tour cultural exhibits, the slaughter plants, Mexico City, and of course El Toro — "the bull" — the traditional bull fights, of which many rings exist.

Gabriela noted she would be willing to come back, simply because of the uniqueness of the area and the families, whom she considers so friendly.

"In only three weeks of using the Chi Machine I lost 15 pounds effortlessly - and hospital lab tests showed that my blood cholesterol level dropped from 225 to 160 mg"

How do I use my Chi Machine?

* Place the machine on a rug Lie on your back and put your ankles in the grooves of the footrest on top of the machine
* Set the timer switch to activate the machine for the number of minutes you desire First time users should start with 2-5 minutes
* The footrest will begin to move back and forth, carrying your feet briskly from side to side This movement will carry up through your legs and torso, throuthout your entire body, causing you to wiggle back and forth - that's right like a fish swimming in water
* All you do now is relax and breathe deeply, letting the machine rock you gently but firmly for a maximum of 15 minutes
* When the time is up and the machine stops, remain lying down for another two to five minutes, relaxing and breathing deeply, enjoying the remarkable afterglow - chi - as it moves throughout your body

"In two months of using the Chi Machine, my thighs, hips, stomach and buttocks now look as good as they did when I was in my 20's - and I'm almost 52"

Introducing
The Chi Machine

Does your body get the oxygen it needs?
(Adapted from a quiz by Dr Eiji Noguchi)
Check all the boxes which apply to you -

- ☐ I wake up tired, even after eight hours of sleep
- ☐ I sleep restlessly, waking up frequently
- ☐ I suffer from chronic fatigue
- ☐ I have poor physical endurance
- ☐ I tend to be moody and irritable
- ☐ I am susceptible to colds and flu
- ☐ I suffer from allergies
- ☐ I frequently feel tense and on edge
- ☐ I am frequently constipated
- ☐ I have frequent pain in my shoulder and/or back
- ☐ I have weight problems
- ☐ I crave sweets, alcohol or soda

If you checked more than three boxes, your body might not be assimilating sufficient oxygen Please consult your physician You may wish to have your blood oxygen levels tested - before and after you begin to use the Chi Machine

Lamb And Wool Queen Promotes Sheep For New 'Woolennium'

LOU ANN GOOD
Lancaster Farming Staff

HARRISBURG (Dauphin Co.) —— Sheep have been around since the beginning of time, but Pennsylvania Lamb and Wool Queen Laurie Bero believes sheep today are exactly what is needed for the new "woolennium."

Sheep find adequate nourishment on marginal land and replenish the soil that feeds them. Sheep offer both meat and fabric for consumers' needs.

Wool, unlike synthetic fabrics, is a natural and renewable resource. Shear a sheep today, and a year from now, when the fleece has long since become fabric, the same sheep is ready again for shearing.

Twenty-one-year-old Laurie touted the goodness of lamb and wool's oustanding qualities long before being crowned industry queen during the state Farm Show.

"If people taste lamb, they like it," Laurie said.

The dilemma the industry faces is overcoming preconceived prejudices against lamb.

When entertaining, Laurie serves lamb to her guests.

"I often don't tell them it's lamb until after they taste it," Laurie admitted. She has no qualms about upsetting people because, she said, "I haven't found anyone yet who has tasted it and not liked it."

Guests' positive reaction to lamb sampling is probably due to Laurie's expertise in knowing proper cooking methods for preparing lamb. But the best secret lies in using American lamb instead of imported product.

Americans breed lamb for tenderness and process them under one year of age, unlike mang countries where sheep are only processed after they are no longer agile.

Many Americans, especially those who served in the armed forces, associate lamb with aged mutton because that is what was available during World War II. Those who tasted it didn't like the tough, strong flavor of the aged mutton, and therefore don't include lamb in their diets.

American lamb is available in most upscale restaurants where chefs are trained on proper cooking methods and the clientle enjoys good tasting lamb.

Lamb is best cooked to medium or medium-rare doneness. Lamb provides high quality protein and all the essential amino acids needed to build, maintain, and repair body tissue.

Lamb is also high in B-vitamins, iron, and zinc. Lamb is considered a high nutrient density food (ratio of nutrients to calories). A 3-ounce serving of cooked, lean lamb contains about 221 calories, yet provides 40 percent of the protein reqirements, 17 percent of iron, and 31 percent of required zinc for adult males.

The best market for lamb are the ethnic markets, which are growing the United States. The industry is especially targeting ethnic populations primarily in cities, according to Laurie. Many of these groups have grown up preferring lamb and goat more than other meats.

The industry faces another obstacle. Some people believe wool is too itchy to wear.

"Wool is not itchy if it is processed properly," Laurie said.

Some processing methods use acid to clean wool and remove the natural lanolin to use for other products.

"Wool that is cleaned with an acid process can irritate skin because some of the acid remains in the wool," Laurie said.

That problem can be eliminated if people buy wool directly from the grower.

Many people who raise sheep have wool to sell.

An expert shearer, using a shearer similiar to a barber's clippers, can shear a sheep in less than five minutes. The fleece is rolled off with long smooth strokes, beginning at the legs and belly.

Laurie excells in fitting and shearing sheep. She said, "I have a whole wall of trophies."

She grew up around sheep, learned to show, shear and spin the wool from her Tunis and Border Leiscester sheep, and also raises market sheep on the family's Alum Bank farm. Her parents are Edward and Rosemary Bero. Laurie also has an older brother Steven.

In addition to her homestate, Laurie has showed sheep in Maryland, Virginia, New Jersey, and Ohio. During these shows, Laurie often met the reigning wool queen.

"I wanted to be queen ever since I was a little girl," Laurie said.

Pennsylvania Lamb and Wool Queen Laurie Bero sheared, spun, and dyed the wool from her registered Tunis and Border Leister flock for her mother to knit into the sweater Laurie is wearing.

Laurie didn't sit back and wait for her dream to unfold. Instead she immersed herself in the industry and participated in every aspect of competition such as lead line, where contestants lead a sheep and are judged on their wool outfits, the lamb's appearance, and the shepherd's control of the lamb in the show ring.

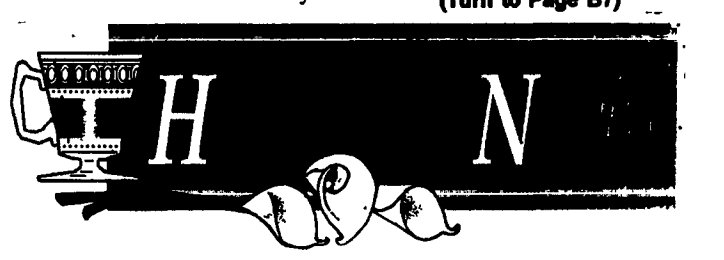
Contestants for the state lamb and wool queen crown needed to first compete at the local level. Laurie won the title in Bedford County. In fact, Laurie had won the same title when she was only 15 years old. According to state rules, she needed to be 16 years old to compete for the state crown. Now 21 years old, this is the last year Laurie is eligible for the position. She won the Bedford County crown to become eligible to compete for the state crown during the state Farm Show.

Contestants needed to create a display on the industry, give a speech, write an article, and be interviewed by a panel of four judges for five minutes. Each segment was worth 25 points.

The following day, the six contestants needed to present their prepared speeches to the

(Turn to Page B7)

Helping Pennsylvania Lamb and Wool Queen Laurie Bero, center, with promotional events are Runnerup Amanda Darr, Somerset County; right, and Princess Amanda Wilson, Cambria County.



Laurie shows her reserve champion Tunis ram yearling, one of the lambs from her flock in Bedford County.

Lamb And Wool Queen

(Continued from Page B6)

audience watching the Sheep to Shawl competition.

Laurie spoke on the wall wool growers face because the market is flooded with imported wool rather than processors using Pennsylvania wool.

The average fleece weighs 6.8 pounds. Three men's wool suits can be made from one fleece, according to Laurie.

The market is extremely frustrating for growers who received only 10 cents per pound for highest quality wool last year.

Most factories refuse to buy wool from U.S. wool growers because they can't compete with market prices of other synthetic fabrics.

"We need to push wool in today's fashion world, even if is blended wool," Laurie said.

Those who wear wool know that nothing feels warmer in frigid weather than 100 percent wool outfits. Many consumers are unaware that blended wools are available in many surprising textures and weights. Even summertime blends of wool, most commonly known as wool crepes, are comfortable for hot weather.

Many wools can be machine washed and machine dried using ordinary household detergents.

Wool is self-cleaning because stains shed off. It is rainproof, and fire resistant. Compared to synthetics, wool provides longer wear, resists snags, tears, fading, and does not pill or snag easily. It resists wrinkling and springs back to original shape.

After contestants had presented their speeches, Laurie was crowned queen. The court includes Andrea Sholtis, first runner-up; Amanda Darr, second runner-up; and Amanda Wilson, princess.

Although Laurie is studying animal science at Penn State where she also works in the college's sheep barns, she will travel throughout the state to represent the lamb and wool industry. Most of her appearances will be at county fairs and at agriculture events, where she hopes to entice more people to eat lamb and wear wool.

One of the ways Laurie encourages people to try lamb is handing out recipes. Here are some of Laurie's favorite lamb dishes.

BOSTON LAMB CHOPS

12 loin or rib lamb chops
2 tablespoons fresh, chopped oregano or 2 teaspoons dried oregano
Salt and pepper to taste
4 tablespoons olive oil
3 small zucchini, sliced
2 medium red onions, sliced
1 clove garlic, minced
3 medium tomatoes, cut into wedges
¾ teaspoon dried basil or 1 tablespoon chopped fresh basil
Linguine pasta, cooked, drained

Sprinkle lamb chops with oregano, salt and pepper. Brown chops in 3 tablespoons olive oil, 4-5 minutes, each side. Remove and keep hot. Heat remaining tablespoon oil. Saute zucchini, onion, and garlic until tender. Add tomatoes and basil; cook 2 minutes more. Toss together with pasta. Arrange on platter with lamb chops. Makes six servings.

GYRO-BURGER

1 pound ground American lamb
½ teaspoon garlic powder
¼ teaspoon onion powder
¼ teaspoon ground cumin
½ teaspoon pepper
¼ teaspoon salt

Mix seasonings and add lamb. Mix well and form into four patties about ¾-inches thick. Grill over moderate coals 5 to 6 minutes per side until medium doneness with the juice running clear. Serve on pita rounds or buns with yogurt cucumber sauce.

For yogurt cucumber sauce, combine:

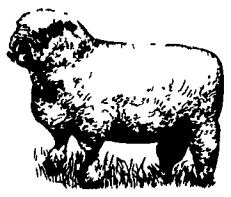
8-ounces plain nonfat yogurt
½ cup finely minced cucumber
2 sliced green onions
¼ teaspoon sugar
¼ teaspoon sugar
¼ teaspoon garlic salt

Refrigerate. Serves 4.

HERBED GRILLED LAMB

2-3 lamb leg steaks Herb Marinade:
¼ cup lemon juice
¼ cup olive oil
1 teaspoon dry basil leaves
1 teaspoon salt
½ teaspoon paprika
½ teaspoon onion powder
¼ teaspoon garlic powder

Combine marinade ingredients and pour over lamb. Refrigerate covered for 2-24 hours. Remove from marinade and grill or broil 4 inches from moderate heat for 10-15 minutes. Turn occasionally and baste with any remaining marinade. Serves 6.



Market Food For Profit

SCRANTON (Lackawanna Co.)–Are you a farmer who would like to improve your profits? Have you ever entertained the idea of selling your special spaghetti sauce or famous chocolate chip muffins? Do you want to improve your existing food related business? If so, then plan on attending "Marketing Food for Profit" on Saturday, February 26, at the National Institute for Environmental Renewal on Rt. 6 in Mayfield. The seminar runs from 9:00 a.m.–4:30 p.m.

The program is designed for agricultural producers and individuals interested in selling food for profit. It will provide information and examples of marketing strategies and opportunities, explore opportunities for new and expanded agricultural markets and food products, and help participants start or improve the operation of a small food product business.

The agenda will feature keynote speaker, Dr. Duncan Hilchey, senior extension associate and agriculture development specialist at Cornell University, Hilchey will share his vast experience and research on farmer's markets, value-added food processing, micro-enterprise development, agritourism, ethnic marketing opportunities, and farm cooperatives in his presentation, "Marketing Opportunities in the 21st Century."

Other topics covered will be packaging and presentation; developing a business plan; customer service; target and niche marketing, alternative marketing; adding value to produce; Pennsylvania Department of Agriculture licensing regulations; safe food handling; effective advertising; and financial matters.

The seminar is sponsored by Pocono Northeast R.C. & D., PENNTAP, the Lackawanna County Conservation District, and the Northeast region of Penn State Cooperative Extension. Cost is $20 per person and $10 for each additional family member or employee. The fee includes lunch, speaker fees, and materials. For more information or to register, contact Penn State Cooperative Extension at 963-4761 by February 18.

Cook's Question Corner

If you are looking for a recipe but can't find it, send your recipe request to Lou Ann Good, Cook's Question Corner, in care of Lancaster Farming, P.O. Box 609, Ephrata, PA 17522. There's no need to send an SASE. If we receive an answer to your question, we will publish it as soon as possible. Sometimes we receive numerous answers to the same request, but cannot print each one.

Answers to recipe requests should be sent to the same address. You may also e-mail questions and answers to lgood.eph@lnpnews.com

QUESTION — A New York reader wants a brownie mix recipe, made with baking cocoa, to store until ready to use. When ready to prepare, the mix needs the addition of only water, oil, and egg.

QUESTION — Donna Beyerbach, Oakdale, wants to know how to make garlic powder from homegrown garlic bulbs.

QUESTION — Carol Nunn, New Columbia, wants a recipe for banana butter, which does not contain butter but is similiar to apple butter but made with bananas.

QUESTION — A New York reader wants to know if regular flour can ever be used in a bread machine instead of bread flour.

QUESTION — Dale e-mailed that a recipe appeared in the paper for rye bread with caraway seeds. He tried it and thought it was the best he ever had, but has lost the recipe. Does anyone know to what recipe he is referring? He thinks it appeared in the paper around Christmas.

QUESTION — Kathi Taylor, Shickshinny, would like a recipe for peanut butter pie that does not contain chocolate, but between the peanut butter cream filling and crust is a layer of crunchy crumbs. The crust is pie pastry not graham cracker crumbs.

QUESTION — A reader is looking for the recipe for the ultimate cheese cake.

QUESTION — Thelma Boll, Harleysville, would like to know how to keep homebaked cookies from becoming hard when serving them on a plate and storing them for later use.

QUESTION — Mrs. Zimmerman, Manheim, would like recipes, hints, and cookbooks that teaches cheese and yogurt making. She also wants the name of a mailorder company where she can purchase cultures for cheesemaking.

QUESTION — K. Moyer, Summerville, is searching for recipes to make cracked wheat bread and for a meringue that gets high.

QUESTION — K. Moyer, Summerville, wants to know the difference between Sure Jel and Clear Jel, and where Clear Jel can be purchased since she can't find it in her area.

QUESTION — Madeline Van Leuven, Mantua, N.J., wants a recipe to make chocolate covered pretzels. She has dipped crackers and mini Ritz crackers into chocolate and asked if the same chocolate coating could be used or is a special chocolate to be used for the pretzels.

QUESTION — Carolyn Mack is looking for recipes to make fresh sausage before it goes in the casing.

ATTENTION — The American Dairy Association-Dairy Council Middle Atlantic immediately needs dairy farm familes to submit recipes for a new brochure to use in promotion. The recipes should include at least two dairy ingredients. All the entries will be printed in an upcoming issue of *Lancaster Farming.* Nutritionists from ADA/DC will select the winning entries. Winners will receive 'got milk?' prizes and have their recipes featured in the new brochure. Send your recipe with your name, address, and the number of cows on your farm to Kristen Campbell, American Dairy Association, 325 Chestnut St., Suite 600, Philadelphia, PA 19106. For more information, call Kristen Campbell at 1-800-220-6586.

QUESTION — Shirley Schwoerer, Wysox, wants a recipe for Italian Riccota Bread, not using yeast.

QUESTION — Beverly Findleiz, Holtwood, wants a recipe for pumpkin delight, a delicious dessert served at Hosses dessert bar.

QUESTION — Jody Applebee, Pratesburg, N.Y., wants a recipe that tastes similar to chow chow made at Kitchen Kettle Village.

QUESTION — Jody Applebee, Pratesburg, N.Y., wants a recipe her mom used to make. It is a sticky bun that has orange Tang as one of the ingredients.

QUESTION — Myrtle Sorge, Sicklerville, N.J., is searching for a recipe to make kidney pudding in casings.

QUESTION — Trina Boitnott, Boones Mill, Va., wants a recipe for pecan jelly and other nut-flavored jellies. She tasted pecan jelly in a specialty shop in Virginia. The jelly tasted exactly like pecan pie in a jar.

QUESTION — Sandy Truckner, Avonmore, is looking for a recipe that had been printed in a children's cookbook that was popular in the late 1950s or early 1960s, where she lived in northeast Ohio. Called Eskimo Cookies, the no bake chocolate cookie did not contain rolled oats.

QUESTION — Nancy Melinain, Dunstable, Mass., wants the recipe for pumpkin fudge that tastes like that sold at Green Dragon.

QUESTION — A reader wants a recipe to make chicken chow mein for 50-100 people.

QUESTION — A reader wants to know if it's possible to make puffed wheat or puffed rice without much financial investment.

QUESTION — G. Sweitzer, Airville, wanted recipes for using gray hubbard squash.

QUESTION — Phyllis Stauffer, Carlisle, wants a recipe that Little Caesar's used to have. It was a buttery dip with herbs that they served with breadsticks.

ANSWER — Mary Winters, Elizabethtown, wanted a recipe for hot wings or buffalo wings. Thanks to Catherine from Strasburg who writes that although she does not have a specific recipe for buffalo wings, she lived in Buffalo and knows that the natives used Frank's Louisiana Hot Sauce, which is also sold locally. The recipe is printed on the label. Don't forget to add celery and blue cheese.

ANSWER — Maria Sninsky, Dover, wanted a recipe for a very moist chocolate cake that had appeared in this paper last year. Thanks to Pamela Drake, Mathias, WV, for e-mailing the following recipe, which had been a third prize winner at the Farm Show one year.

Dark Chocolate Cake

2 cups sugar
1¾ cups flour
¾ cup baking cocoa
1½ teaspoons baking soda
1½ teaspoons baking powder
1 teaspoon salt
2 eggs
1 cup milk
½ cup oil
2 teaspoons vanilla
1 cup boiling water

Heat oven to 350 degrees. Grease and flour pans. Combine dry ingredients. Add eggs, milk, oil and vanilla; beat for two minutes on medium speed. Remove from mixer. Stir in boiling water. Bake in round pans for 30 to 35 minutes or rectangular pan for 35 to 40 minutes. Cool and frost.

Thanks to Ruth Aument, Peach Bottom, for sending a recipe that appeared in the article about 14-year-old Melissa Graeff who won first place at the Lebanon County Fair. Although it is called Hershey's Perfectly Chocolate Chocolate Cake, it is identical to the recipe above — so it must be a good one. She also sent in the recipe for the frosting.

Frosting:
½ cup butter
⅔ cup cocoa
3 cups powdered sugar
⅓ cup milk
1 teaspoon vanilla

Melt butter and stir in cocoa. Alternately add powdered sugar with milk, beating on medium speed to spreading consistency. Add more milk if needed. Add vanilla.

(Turn to Page B9)

Breakfast

(Continued from Page B2)

TORTILLA HASH

4 small flour tortillas, cut into tenths
2 tablespoons butter
2 tablespoons minced onion
3 medium-sized tomatoes, cubed
½ green pepper, seeded and diced
Salt and pepper, to taste
1-2 tablespoons grated parmesan cheese

In a large skillet, fry tortillas lightly in butter. Add onion, tomatoes, and green pepper; cook until onion is limp. Quickly add eggs, salt and pepper; cook until eggs are of desired consistency. Sprinkle with cheese and serve with salsa on the side.

Food Safety Certification

W. PITTSTON (Luzerne Co.)– June of 2001, the Pennsylvania Department of Agriculture will be requiring certified food handlers at each food service establishment. To meet this need, Penn State Cooperative Extension is offering a 17-hour food safety certification course on February 15, 22, and 29 from 9:30 a.m.–4:00 p.m. at the Convention Hall in Pittston.

Extension agents, Mary Ehret and Karen Thomas, will be using the National Restaurant Associations' ServSafe course as a basis for the program.

The program includes discussions on:

*foodborne bacterial and their diseases
*safe food preparation
*cooking temperatures
*handwashing techniques
*cross contamination
*thawing foods
*HACCP and HACCP-Based inspections

At the conclusion of the three-day training, participants take an 80 question exam to qualify for certified food handler status. Participants must attend all three days in order to sit for the exam.

Registration deadline is February 1. For more information or to register, contact Penn State Cooperative Extension at (717) 602-0600.

Cook's Question

(Continued from Page B8)

ANSWER — Mrs. Arthur Robbins, West Oneonta, N.Y., wanted a good recipe for penuche fudge. Her husband's grandmother made a wonderful fudge that was sugary but not hard. Thanks to Pat Elligson, Millers, Md., who sent a recipe that is from the early 1950s Karo Syrup Company.

Penuchi Fudge

3 cups brown sugar
½ cup Karo corn syrup
2 tablespoons butter
1 cup milk
1½ cup nut meats
1 teaspoon vanilla

Combine sugar, Karo, and milk in saucepan. Cook, stirring constantly until temperature reaches 235 degrees. Add butter, set aside without stirring to cool. When lukewarm, add flavoring, beat until thick and creamy. Stir in nuts, pour into oiled or buttered pan. Cut into squares when firm.

ANSWER — A. Reiff, Narvon, sent in a recipe for the request for pizza. She writes that it is easy and delicious.

Upside Down Pizza

1 pound ground beef, fried and drained
14-ounce can pizza sauce
4 cups shredded pizza cheese
2 cans refrigerated homestyle biscuits
Pizza toppings, desired
1 tablespoon melted butter
Parmesan cheese

Mix pizza sauce into hot ground beef. Spread into 9x13-inch pan. Top with any pizza toppings desired such as ham, pepperoni, mushrooms, etc. Layer cheese on top. Place biscuits on top of cheese and brush with melted butter. Sprinkle with parmesan cheese. Bake at 350 degrees approximately 30-40 minutes until bubbly. Serves 6 to 8.

Marilyn Adams To Share Farm Accident Story

LOU ANN GOOD
Lancaster Farming Staff

LANCASTER (Lancaster Co.) — Marilyn Adams knows the pain of losing a son from a farming accident. Her 11-year-old son suffocated in a gravity flow wagon of shelled corn on his family's Iowa farm.

After his death, Adams founded Farm Safety 4 Just Kids to help promote a safe farm environment to prevent health hazards, injuires, and fatalities to children and youth.

Adams will be the keynote speaker at the SAFE KIDS seminar, Feb. 10, from 9:30 a.m. to 2 p.m.

The daylong workshop at the Farm and Home Center, 1383 Arcadia Rd., Lancaster, is geared toward parents.

Adams continues to find purpose in sharing the story of her loss with others in the hopes of preventing farm tragedies. Her book, "Rhythm of the Seasons. . . A journey beyond loss," provides inspiration, strength, and hope for those suffering loss.

Marilyn Adams will speak at the Lancaster Farm and Home Center.

Dr. Albert Price, retired pediatrician, and Shari Keyser-Groff, former director of the county SAFE KIDS Coalition, said the seminar will focus on age appropriateness of farm tasks and an introduction to "First on the Scene for Farm Families" — what you need to do to increase chances loved ones will survive.

Keyser-Groff said, "We are not trying to tell parents how to run their farm or how to raise their family. But we offer guidelines for making tasks safer. We teach child developement principles to help parents determine appropriate tasks for their children."

Children often help with farm chores at an early age. It's a great way to teach responsibility and the satisfaction that comes from hard work. But too often, children are assigned tasks beyond their age ability.

"Many deaths and injuries could be prevented if parents understood how a child develops before they assign chores," Price said.

Other scheduled speakers at the seminar include city firefighters Brian Klugh and Lloyd Henry, county extension agent Bob Anderson and Dennis Murphy, professor of agriculture at Penn State.

SAFE KIDS Coalition is conducting the event in partnership with St. Joseph Hospital, Lancaster General Hospital, and the Penn State Extension. Financial supporters are Old Guard Insurance Company, Southern States Cooperative, and New Holland North America, Inc.

Cost is $10 for adults and $5 for high school students. Participants can be from any state to attend.

To register or for more information, call SAFE KIDS at (717) 390-3801.

ANSWER — Jane Sauble, Manheim, wanted a recipe for Moravian pie. Thanks to Judy Stuckey, Annville, for sending a recipe.

Moravian Pie

1 cup granulated sugar
1 cup coconut
1 cup table molasses
3 heaping tablespoons flour
½ cup milk
1 egg, beaten
9- or 10-inch pie shell

Mix together sugar, coconut, molasses, and flour. Add beaten egg and milk. Pour into pie shell. Bake 10 minutes at 425 degrees; reduce heat to 350 degrees and bake an additional 40 minutes.

WORKING FOR WOMEN'S RIGHTS

Encouraged by her dad to be useful, Lucretia Coffin Mott worked hard so women could have rights, including the right to vote

Born in January 1793 in Nantucket, Massachusetts, Mott worked against slavery and alcohol, and she played a role in starting the women's suffrage—right to vote—movement

Along with rearing six children, Mott was a teacher It was during her time as a teacher that Mott realized how unfair it was that women only made about half of what men made as teachers

At an 1840 meeting of the World Anti-Slavery Conference, Mott met Elizabeth Cady Stanton Because they were women, they were not allowed to be involved in the conference That led to the two women starting the women's rights movement in 1848 They wanted basic civil rights, like being able to vote and own property, for women, too

By 1880, the year Mott died, women could hold property in many states and could attend some colleges However, Mott did not get to see her hard work in the suffrage movement pay off Women were not allowed to vote until 1920

What's the difference between a cold and the flu?

'Tis the season for sniffles, coughs, aches and pains If you've been feeling under the weather, you might have a cold, or you might have influenza — the official term for the flu

Cold symptoms usually include coughing, sneezing, a runny nose and a sore throat People with the flu might show these symptoms, but they also will have a fever and headaches, and feel achy and extremely tired And, the flu strikes quickly — a person can go from feeling OK to icky in about two hours

Bacteria or viruses, which are microscopic germs, cause colds There are at least 200 different cold viruses The flu is caused by just two viruses, influenza A or influenza B

Both kinds of viruses spread through the air — like when someone sick coughs or sneezes Or, people can get sick by touching something that has the virus on it — such as shaking a person's hand or wiping a child's nose — then touching their own eyes or nose (That's why doctors say to help avoid flu and colds you should wash your hands frequently and avoid touching your face)

Influenza viruses are big problems in the winter These viruses travel more easily through the air than cold viruses, and they stay in the air longer too They also can make people so weak from the flu that they develop other illnesses, such as ear infections, bronchitis or pneumonia

Because people are crowded inside more often during cold weather the flu virus has a better chance to spread rapidly in one area When this happens, it's called an epidemic — and lots of people are really sick!

Struggling To Breath

Did you know that almost 5 million kids have asthma? And did you know that there are 10 million missed school days each year because of it?

Asthma is a disease in which the normal function of the lungs increases. The airways that lead to the lungs become sensitive, which in turn causes a person to have problems breathing

Wheezing, a squeaky sound when someone breaths, coughing and shortness of breath are symptoms of asthma. The disease can be triggered by a number of things:

Exercise—running or jumping
Infections—bronchitis or sinus problems
Allergies—reactions to dust or pets
Irritants—cigarette smoke or strong smells
Weather—cold air or wind
Emotions—crying, laughing or stress

Some asthma problems can be avoided by staying away from the things listed above that trigger the disease. Depending on how they suffer from it, children are given medication to help control asthma. For those who have allergies to things like cats or flowers, there are allergy shots to help with the sneezing and other symptoms.

Asthma should taken seriously. Whether you or someone you know has asthma, it's important that you know what triggers the disease and what to do if someone is having problems breathing.

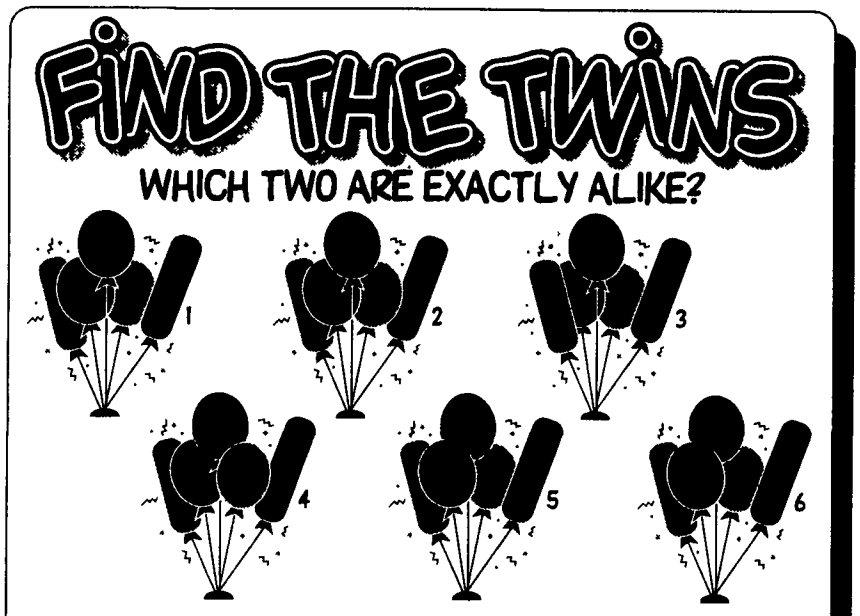
WHICH TWO ARE EXACTLY ALIKE?



ANSWER FIVE AND SIX

3-D Quilting Workshop

LANCASTER (Lancaster Co.)–Penn State Cooperative Extension is offering a quilting workshop making a 3-D Pinwheel Wall Hanging or Table Runner.

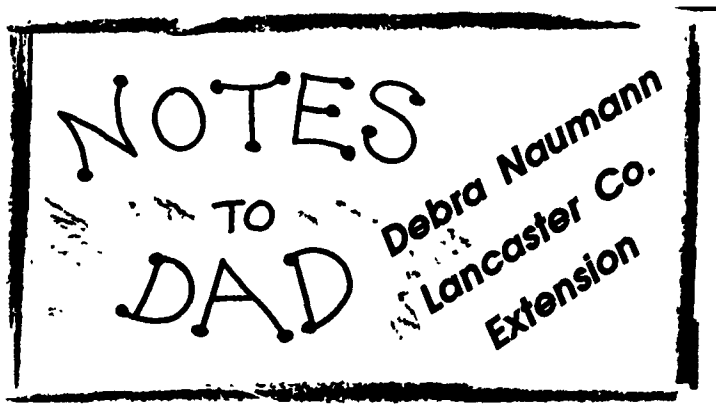
Join the fun and learn to make quilt designs without the worry of making matching points. By folding fabric you can make perfect points and create a 3-D patchwork with raised designs.

The project includes four different techniques for making pinwheel designs.

Classes will meet on Mondays, January 31, February 7, and 21 from7:00 to 9:00 p.m. OR Tuesdays, February 8, 15 and 22 from 9:30 to 11:30 a.m. at the Farm and Home Center, 1383 Arcadia Road, Lancaster.

The cost is $30 which covers instructor fees. Pre-registration is required. A supply list will be sent when registration is received.

Call Penn State Cooperative Extension at (717) 394-6851 for information.



Verbal Nurturance is Important

My 3-year old son Ben has hit a wonderful period in his development where he loves to tell my husband and I how much ne loves us. Throughout the day, especially after he's had a good peanut butter and marshmallow sandwich prepared by mom or an invigorating wrestling match with dad, he'll share the tender words "I love you," usually followed by ". . . and I like you too."

Of course my husband and I just bask in the glory of his verbal expressiveness. Most amazing to us is the ease with which is able to share his feelings of love and appreciation. (Never mind that he can change his mind in a heartbeat when things don't go his way!) It makes me wonder when my "little man" will lose this spontaneous ability to share his emotions with family members without the fear of seeming too vulnerable.

For some men, words–especially the three little words "I love you"–can be difficult to express. Some may fear appearing too "wimpy," while others may not recognize how important it is for their spouse or children to hear how much they are loved and appreciated. Many men may have grown up in a household where loving words were not openly shared. If you've never heard it from your father, it's even more difficult to realize that verbal nurturing is an important part of your role as husband and dad.

A wonderful article in *"Today's Father"* magazine describes a father's "Slumber Party Research" The author is the dad of a 12-year-old daughter who was enjoying a birthday sleepover party with 12 of her friends. He conducted his "highly-reliable" research by posing the following question to the girls: "What makes you feel special?"

Written responses by the girls included "I feel special when my dad compliments me on something I've done well," and "I feel special when my dad says he appreciates me." Another responded "When Dad tells me I'm beautiful."

The author goes on to share how important it is that fathers communicate their love for their children in words. He even goes on to say "If you don't get it out of your mouth, it hasn't truly been captured in your child's heart."

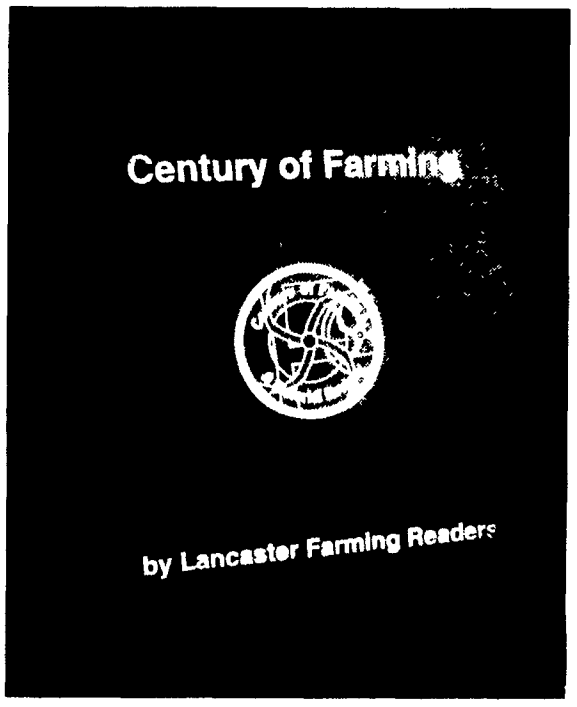
Many fathers rest in the security that their children will know how they feel by their actions. In other words, they assume that because they attend their child's school performance or are involved in other activities with their child, their child will automatically know that they are loved.

While this involvement is certainly a great way to show your love for your child, it is not enough. Children need to know that their fathers love them because of who they are, not because of their performance in school, athletics, music, or anything else. Children want, need, and deserve to hear it in words.

Verbal expressiveness may not come natural for many fathers. But for kid's sake, dads need to overcome whatever discomfort they may have and learn to verbalize their true feelings to their children as well as to their spouse. It may not come out of your mouth as easily as it does for an emotional and unassuming 3-year-old, but like anything else that is difficult, practice and a bit of courage will help. Our children need to hear it!

New shipment to be sent in about six weeks!

Century of Farming



A pictorial history of farming from 1900 to 1999 as presented by readers of *Lancaster Farming*.

Everett R. Newswanger, Editor

Lancaster Farming Publisher

The first shipment of *Century of Farming* has already sold out. *Century of Farming* is the book that recalls family involvement and the historic significance of agriculture's heritage in the last 100 years. This treasure chest of memories includes 120 pages of old photographs from the family albums of readers of *Lancaster Farming*. In addition, Editor Newswanger has written a preface that takes you from the "Golden Age" of agriculture as the 20th century began, through the Depression and on to the tremendous contrast of biotechnology.

The response in sales has been almost overwhelming. And after we ran out of the book, we still had a big stack of orders from disappointed people who really wanted a copy--especially after they saw it. Therefore we have arranged with the printer to do another run to fill the orders we have in hand and some extra for those who still would like to send in for a copy. We expect delivery to be in about six weeks.

If you have sent us a check, money order, or put your order on a credit card we will apply your order toward one from the next shipment, unless you tell us not to. If you want to still order a book(s) use this order form and send it to Lancaster Farming today. Orders will be taken on a first-come basis.

(Above) Spending most of his life on the farm, Russell Shopp loves the country and being outdoors. In his words, he's a true country boy at heart. (Right) Shopp parted with a treasure when he donated his Dunloggin dispersal catalog to the Holstein Convention auction. But he values the cause even more -- benefitting the scholarship foundation.

York Countain Donates Dunloggin Catalog

JAYNE SEBRIGHT
Lancaster Farming Staff

GLEN ROCK (York Co.) — When Russell Shopp of Glen Rock and his father went to a dispersal sale in 1943, he had no idea that the catalog he received would someday be used to help students pay for college.

For 57 years, 82-year-old Shopp has treasured the Dunloggin dispersal catalog he received that day. But this year he gave up his treasure when he donated the catalog to the Pennsylvania Holstein Association to auction off during the annual Holstein Convention in Carlisle.

Many Holstein breeders in Pennsylvania and throughout the world remember the Dunloggin farm, which was a 500-acre farm in Ellicott City, Md., owned by Joe Natwick. Natwick originally bought the farm for timber, but after he mined all the timber off the farm, he decided to start a dairy herd. Since he was done logging the farm, he used the prefix "Dunloggin" for his cattle.

According to Shopp, the Dunloggin breeding stock was spread out all over Pennsylvania and Maryland. It can still be traced to some of the prominent herds today. But few people any more can say that they actually attended the sale where more than 200 dairy animals from the Dunloggin herd were sold for prices unheard of in that day.

Russell Shopp can. "I didn't realize at the time that I was rubbing shoulders with many of the great breeders during that time," said Shopp.

He recalls that half interest in a bull from the Dunloggin herd was sold to the Backus family for $13,000. Dunloggin Farm owned a ½ interest in the bull named "Lochinbar" that came from Mt. Victoria Farms in Canada. The other half was owned by Osborn Dale Farm in Connecticut, probably most well known for their "Ivanhoe" bull.

Horace Backus of the Backus family has written a history on the Dunloggin herd, which encompasses two volumes and more than 1,000 pages. Only after reading that history did Shopp realize how precious his catalog was.

"Ellicott City was the place to be during that sale," said Shopp. "Holstein enthusiasts from around the country were there."

Shopp remembers full-page ads in The Holstein World that kept everyone informed of the Dunloggin show winnings and production records.

Shopp hopes the catalog brings a high amount at the auction because he thinks that the Scholarship Foundation is a very worthy cause. In fact, he has even contacted local businesses about supporting the Foundation.

Recently another copy of the Dunloggin dispersal catalog was sold during the 1999 Eastern National Sale. It brought $700.

Shopp has been very interest in the Holstein breed ever since he was a little boy.

"My father instilled in me a love for good cattle," said Shopp.

His father purchased Shopp's first three animals for him. Shopp's first dairy animal was purchased for $52.

Throughout the 1940s and early 1950s, Shopp milked 30 cows and had a total of 60 dairy animals on his farm. Growing up near Mechanicsburg, he started farming in 1940 on his father's farm but then moved to West York to milk in a stall barn.

Unlike most farmers, Shopp decided that bigger wasn't better and got out of the dairy business when prices were pushing him to expand. However, even now Shopp keeps up with the latest news in the Holstein breed and can talk for hours about some of the greatest Holstein breeders of all-time.

After retiring from the dairy business, Shopp purchased a 50-acre farm in Glen Rock, where he enjoyed raising horses. He still lives there today. As far as his attendance at the Convention, he still isn't certain as to whether he will make it.

"I would like to see the cattle be sold," said Shopp. "Everyone who is interested in cattle should realize that every good pedigree had to start with good breeding stock."

And Shopp feels honored to have seen some of the best breeding stock of the 1940s when he and his father went to the Dunloggin dispersal sale.

Outstanding features include:

- A center pivot-tongue design
- Independent modular cutterbar with ten small-diameter cutting discs
- 102" wide conditioning rolls
- A full range of vertical and lateral flotation
- A torsion-bar roll-pressure system
- A cutterbar driven from both ends

14th Pennsylvania State Fair Queen Is From Clearfield County

JAYNE SEBRIGHT
Lancaster Farming Staff

HERSHEY (Dauphin Co.) — Jana Duttry from Clearfield County Fair is the new Pennsylvania State Fair Queen. Dayton Fair's Katie Cornish was awarded first runner up during the coronation held last Saturday at the Hershey Lodge and Convention Center.

19-year-old Duttry is the daughter of Daniel and Marlene Duttry of DuBois. A freshman at the Pennsylvania State University, she is majoring in agricultural business management. She was a 1999 state finalist for the Outstanding Equine Member Award and the recipient of the Lewis Greene Memorial 4-H Scholarship.

While in high school, Jana was active in cheerleading, the drama club, Spanish club, and student council. She was also homecoming queen and vice-president of her senior class. She enjoys showing and riding her Arabian horses.

Seventeen-year-old Cornish is the daughter of Van and Marilyn Cornish, dairy farmers from Dayton. A senior at Shannock Valley High School, Cornish is a member of the National Honor Society, band, and chorus. She also is very active in the school's drama club and participated is summer theatre festivals.

Cornish is a member of Who's Who Among American High School Students and is an All-American Scholar. She plans to attend Indiana University of Pennsylvania, majoring in history.

For Duttry, being crowned Pennsylvania Fair Queen was overwhelming. "I was involved in the fair since I was a little girl," she said. "I always wanted to have the opportunity to visit more fairs, and I am looking forward to learning more about every county fair."

Duttry first ran for Clearfield County Fair Queen when she was 17. "I was first runner up in that contest, which usually has about 15 contestants," said Duttry. "The Clearfield County Queen usually finishes in the top ten at the state coronation, but we have never had a state queen. I am honored to be the first."

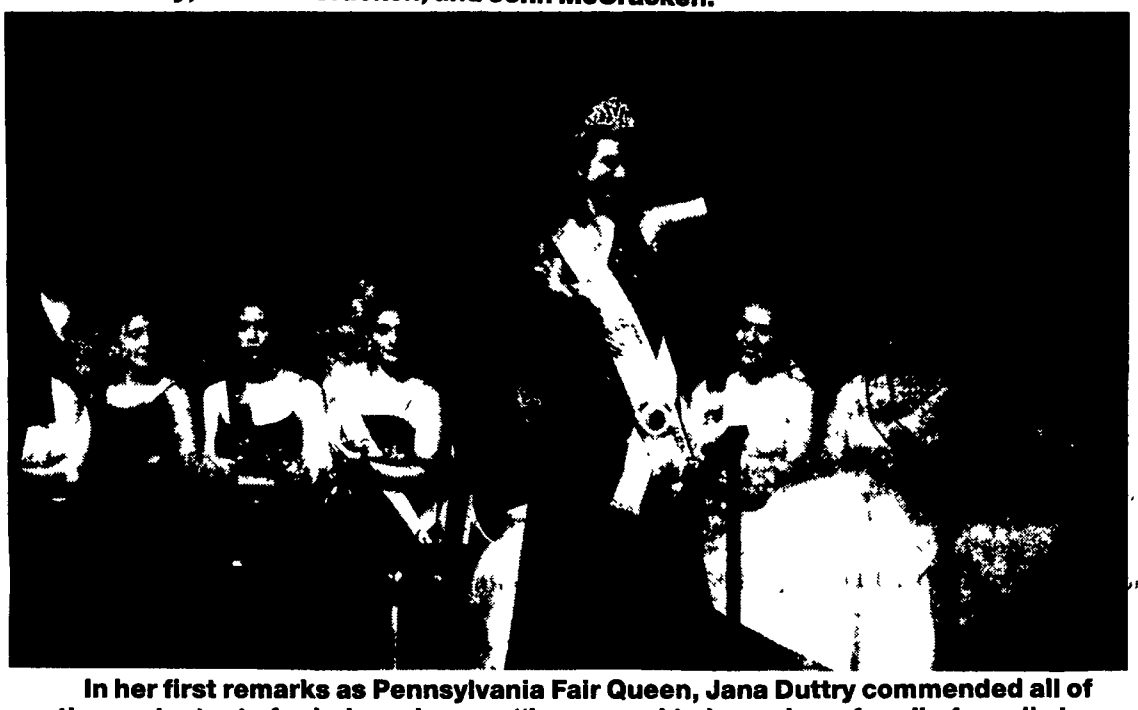
"It feels wonderful," she said. "I am so honored and shocked that I got first runner up."

Cornish is the twelfth Dayton Fair Queen, but the first to have finished as first runner up in the state. Cornish's role as first runner up is to fill in when Duttry can't attend a state fair queen activity, although the girls plan to attend events together.

"We're already talking about attending each other's fair," said Cornish. "And I am looking forward to helping Jana as

(Turn to Page B17)

The Clearfield County Fair Board congratulates its newly-crowned Pennsylvania Fair Queen, originally the Clearfield County Fair Queen. From left are Wade Cowder, Jason McCracken, Brenda Hunter, Jana Duttry, Jeff Williams, Allen Roseberry, Dave McCracken, and John McCracken.



In her first remarks as Pennsylvania Fair Queen, Jana Duttry commended all of the contestants for being winners. "I am proud to be up here for all of you," she said. "Because each one of you deserves to be state queen."

Nicknamed the "Queen Mother," State Fair Queen Committee co-chairperson Sarah Long poses with both the 1999 and 2000 Pennsylvania Fair Queens, Julie Sechler and Jana Duttry.

The newly-crowned Pennsylvania Fair Queen poses with her biggest supporters, her family. From left are Jana's father Daniel, Jana, her mother Marlene, and sister Kristen Duttry.

Five state finalists were named during the coronation. From left are 1999 Pennsylvania Fair Queen Julie Sechler, 2000 Fair Queen Jana Duttry, 2000 First Runner Up Katie Cornish, (top row from left) Charbi Anne Webb from Luzerne County Fair, Julie Polka from Westmoreland County Fair, and Natalie Foxwell from Somerset County Fair.

Pennsylvania Secretary of Agriculture Sam Hayes, Jr., congratulates the newly-crowned state fair royalty, Jana Duttry and Katie Cornish.

ATV Dangers

UNIVERSITY PARK (Centre Co.)–Many farmers are very aware of the dangers involved when children operate tractors and other large equipment, but a safety expert in Penn State's College of Agricultural Sciences says motorized vehicles such as all-terrain vehicles (ATV) can be just as risky.

"Many farmers use ATVs to perform loading and hauling chores in smaller spaces where a tractor would be inconvenient," said Dennis Murphy, professor of agricultural engineering. "The vehicles can range from three- and four-wheel vehicles that operate much like a motorcycle, to 4-wheel-drive vehicles that resemble golf carts."

Before allowing children to operative ATVs, adults must make sure that:

•children under age 12 are never allowed to operate a three-wheeled ATV;

•an approved helmet with eye protection is worn by the child;

•engine size is appropriate for children between 12 and 15 to drive;

•children do not operate the vehicle in bad weather or at night;

•the child wears long pants, non-skid boots, gloves and a long-sleeved shirt;

•the child can communicate with adults by cellular phone, walkie talkie or by other methods;

•the work area has no hazards, and the child knows a safe route to the work site.

"Adults also need to take time to test whether children can reach and operate all controls," Murphy said. "The child also should be strong enough to operate the vehicle's controls without straining."

Murphy says children operating ATVs must be able to recognize hazards, react quickly to solve problems and solve problems without getting upset.

"Before allowing a child to drive an ATV, an adult should demonstrate the farm chore on the site where it is to be done," Murphy said. "If the child shows he or she can do the job four or five times under supervision, then they can be allowed to work alone, although an adult should check back every 15 minutes.

Murphy says overturns in an ATV can cause death or disability, and inattentive drivers can suffer serious injuries by hitting fences, trees or structures. He emphasizes that children driving ATVs should have a high level of physical coordination.

"The child should be able to use their hands and feet at the same time," Murphy said, "A good test is dribbling a basketball under control while running."

Penn State offers a free publication, "Children and Safety on the Farm," that shows parents and others how to make farms safer for children. Single copies are available free of charge by contacting your county Penn State Cooperative Extension office, or by calling the College of Agricultural Sciences Publications Distribution Center at (814) 865-6713.

Parents or other interested professionals can buy booklets of six to 10 posters covering similar agricultural tasks or a professional resource manual by calling Gempler's, a Belleville, Wis., safety supply company, at 1-800-382-8473, or by visiting its Web site: http://www.gemplers.com.

Dairy Of Distinction Seeks Nice Looking Farms

STATE COLLEGE (Centre Co.) — Do you take pride in maintaining your dairy farm? Does your farm project an attractive, wholesome image to consumers? If so, the Dairy of Distinction Program of Pennsylvania, New York, New Jersey, and Vermont is looking for you.

The Northeast Dairy Farm Beautification Program that oversees the Distinction program was first started in 1983 in Pennsylvania. The Dairy of Distinction recognize the hard work and dedication of the farmers who maintain attractive farms.

The purpose of the program is to instill a greater sense of confidence in the wholesomeness of dairy products, thus increasing sales.

Farms that apply are judged on the roadside appearance of building, grounds, and surroundings, since this is what our dairy product consumers observe as they drive by the farm.

The cleanliness of the barnyard, feed areas, and manure management are all areas taken into consideration when a team of judges takes a look at your farm from the road. Your milk cooperative or handler will be contacted to approve your milk quality.

Judging is conducted during the month of May. Award winners are announced during local June Dairy Month activities. *To qualify for consideration, you must be actively dairy farming and shipping milk.*

Del-Jame Farm near Hamburg in Berks County is a 1999 Dairy of Distinction winner. Since the program began in 1987 in Pennsylvania, more than 700 farms have been given this farm beautification award. Entries are now being received for the year 2000 program. Take time to enter your farm now.

Applications are available for Pennsylvania dairy farms from Michael O'Conner, 324 Henning Building, Dept. of Dairy and Animal Science, Penn State University, University Park, PA 16802. Phone: (814) 863-3913.

New York State applications are available from Carol Keene-Ainsille, 3993 Jordonville Road, Jordonville, NY 13361. Phone: (315) 858-2770.

For New Jersey applications, contact Joy Ricker, 91 Beemer Road, Sussex, NJ 07461. Phone: (973) 875-4803.

For Vermont applications, send to Elisa Clancy, Vermont Department of Agriculture, 16 State Street, Drawer 20, Montpelier, VT 05620-2901. Phone: (802) 828-3835.

All applications must be completed and returned to your respective state secretary by April 15, 2000.

The Dairy of Distinction program is financed in Pennsylvania by dairy farmers through the American Dairy Association & Dairy Council Mid East and the Pennsylvania Dairy Promotion Program in cooperation with many local agribusiness organizations. The program is conducted with advice and help from the Penn State Cooperative Extension.

HOW IS YOUR FARM SCORED?

Northeast Dairy Farm Beautification Program Inc.

Awards will be based upon neatness, good maintenance, and other factors that can be controlled by the farmer. Attractive background scenery should not be weighted heavily in judging. All judging observations should be made from a vehicle at one or more points on an adjacent public highway. If the farm is off the road, the judging will take place from the nearest lane. Judging should give equal consideration to old wood construction and new construction of metal or concrete block.

The award program may be used for subsequent advertising or promotion activities for dairy products or dairy farming. Farmers who apply for the award agree that if selected they will cooperate with these promotion activities and make all reasonable efforts to maintain both the exterior and interior of heir properties in an acceptable manner.

HOW THE APPLICATION WORKS

The owner or operator of the dairy farm should sign the application and send it to the Dairy of Distinction state secretary by April 15.

HOW THE JUDGING WORKS

Judging teams will visit farms during the month of May. Farms will be judged each year as the award is presented on an annual basis. Any dairy failing to maintain appearance standards will be asked to remove their signs. The Dairy of Distinction signs remain the property of the committee, not the property of the dairy farmer. All farms must achieve a compliance score of 90 percent on their Dairy of Distinction score card. *Your cooperative or milk handler will be contacted to approve your milk quality.*

RULES FOR THE DAIRY OF DISTINCTION AWARD

1) The Dairy of Distinction sign remains property of the Northeast Dairy Farm Beautification Committee.
2) The post and bracket shall be supplied by and maintained by the dairy farmer. It is suggested that a wood post 4' x 4' x 12' or iron pipe 2' x 12' can be used. Posts or pipe should be installed and maintained in true vertical position with 8' above ground. Top of the bracket should be lower than six inches from the top of the post.
3) Signs shall be displayed in front of the dairy at roadside. An attractive post or bracket, or other frame, shall be used to display the sign. No more than three signs should be displayed from the sign frame or post, and all shall be of a style, general size, and quality comparable to the Dairy of Distinction sign. Sign should be secured on all sides to avoid wind damages.
4) Signs shall not be moved to other premises. New owners of a Dairy of Distinction farm must apply to retain the sign
5) Replacement of damaged signs is at the committee's discretion.
6) No producer shall be charged with scoring or sign expenses.
7) Judges' decisions will be final.
8) Judging will take place between May 1st and May 31st.
9) Farms awarded a Dairy of Distinction sign in previous years will be judged between April 1st and April 30th. If they do not qualify, they will be rejudged between May 1st and May 31st so they have the opportunity to keep the sign.
10) Farms that do not requalify will return the sign to their regional Dairy of Distinction committee.

Dairy of Distinction
2000 Pennsylvania Application

PURPOSE OF PROGRAM

Attractive dairy farms give the consumer greater confidence in the wholesomeness of milk and stimulate milk sales which encourages public support for the dairy industry The award gives recognition to the dairy farmer for maintaining a well-kept farmstead

ELIGIBILITY

All Northeast dairy farms producing milk for sale are invited to submit an application for the award Dairies receiving the 10 highest scores in each of the 21 districts will receive an 18" x 24" **Dairy of Distinction** sign to be displayed in front of their farm

You ask You answer

This column is for readers who have questions but don't know who to ask for answers.

"You Ask—You Answer" is for non-cooking questions. When a reader sends in a question, it will be printed in the paper. Readers who know the answer are asked to respond by mailing the answer, which will then be printed in the paper.

Questions and Answers to this column should be addressed to You Ask—You Answer, Lancaster Farming, P.O. Box 609, Ephrata, PA 17522. Attention: Lou Ann Good.

Or, you may e-mail questions and answers to lgood.eph@lnpnews.com

Please clarify what question you are answering when responding.

Do not send a self-addressed, stamped envelope for a reply. If we receive the answer, we will publish it as soon as possible. Please include your phone number because we sometimes need to contact the person to clarify details. We will not publish your phone number unless you request it.

QUESTION — A Schaefferstown family is looking for an old version of the "Candyland" game. Call (717) 949-2846.

QUESTION — A reader received a poinsettia for Christmas and wants to know how to care for it so that it will bloom again for next Christmas. Also what type of fertilizer works best for poinsettias.

QUESTION — A reader wants to know where to buy photo albums with fabric and lace covers.

QUESTION — A reader wants to know of gardening magazines, with a minimun of advertising, other than "Organic Gardening."

QUESTION — M. Musser, Lititz, would like the address for "Gardeners' Kitchen. She likes its canning lids better than any other but lost the address.

QUESTION — Ruth Boshnaugle, 202 Sylvan Retreat Rd., Columbia, PA 17512, would like to know if anyone has a Helen Barth cassette tape they would be willing to part with?

QUESTION — Lois Sollenberger, 2136 Hillview Dr. Fayetteville, PA 17222, would like to find one or more copies of the little Golden books called "The Rag Man's Sneeze."

QUESTION — Ed Craig, Newton Hamilton, writes that he heard that during the Depression years, people made a flower by using coal, ammonia, blueing, salt, and red dye or other coloring. Does anyone know the ingredients and instructions for making this?

QUESTION — W.V. Haagen wanted the words to the song, "There was a man who had a goat. There was a man, now please take note, he loved that goat just like a kid, etc."

QUESTION — Joyce Gable, York, wants to buy a cannister set in the folk art pattern by Pfaltzgraff. The pattern has been discontinued. If you have one, send in your name and address so she can contact you.

QUESTION — Susan Sensenig, Mount Joy, is looking for a white teddy bear dressed in blue with stars, moons, or a design that glows in the dark. These 12-inch bears had been sold in 1994, she thinks, by Furst McNess Co., Freeport, Il.

QUESTION — Mr. Serventi has a coal stove Lennox Furnace Co., Equator #QC 65/Q065. The center shaker is broken. The shaker number is 258-00. Does anyone know where he can purchase either new or old replacement part. He tried welding the broken piece but it did not hold.

QUESTION — Ann Hochenbury is looking for a pattern for an afgan called "The Night Before Christmas." The design is by Raymond Gustafan, photographed by Scott Little, and is a scenic portrayal of St. Nick's midnight ride, which captures many details mentioned in the poem. The central motif is the farewell scene, complete with miniature sleigh and eight tiny reindeer. The pattern appeared in the 1991 "Better Homes and Garden" magazine.

QUESTION — Mrs. Zimmerman, Manheim, needs a lid for an Imperial pasta maker. The address and phone number that came with the item are no longer current. Small Appliance Repair, Reading, could not help her.

QUESTION — A reader wants to know where to find Iris bulbs that bloom more than once and the name of a mail-order catalog where they are available.

QUESTION — Mary Haubrick writes that she has a box of beautiful broken Fenton art glass that was the result of a wall-shelf breaking accident. A lot of the glassware was hand painted cranberry as well as other colors. The pieces were shattered so badly that they can not be repaired; however, the glass is still beautiful. She is looking for someone who works in mosaic glassware made with a type of grouting to transform the unfortunate disaster into a work of art. Contact Mary at 25435 Great Cove Rd., McConnellsburg, PA 17233.

QUESTION — Pete Westover has a Clydesdale gelding, 18.2, which he wants to harness to pull logs. He is looking for some used but serviceable draft-size work harness for this horse to get started with and a source for a new work harness after he figures out what he's doing.

QUESTION — G. Sweitzer, Airville, wants information on converting five to ten horsepower gasoline engines to run on kerosene instead of gasoline. He understands you must decrease the compression ratio. What else must be done?

QUESTION — The Enos B. Stoltzfus family would like a set of "Boxcar" children's books to borrow or buy at a reasonable price. The family does not have a phone, but their address is 119 Lower Valley Rd., Christiana, PA 17509.

QUESTION — Virginia S. Horning wants a set of hardcover books, not soft cover books, by Thorton W. Burgess. Write to her at 151 S. Farmersville Rd., Leola, PA 17540.

QUESTION — Frank Cerami, Ottsville, is looking for the company that manufactures wood paving blocks like those used in the Philadelphia Historic District.

QUESTION — Calendars are needed to help mentally handicapped people with a project. They can be used calendars with notes on the dates, etc. Please send calendars to Gladys Stephens, R.1, Box 1069, Starrucca, PA 18462-9703.

QUESTION — Mary Ann Martin, 528 Reading Rd., East Earl, PA 17519, needs one-inch long bobbins to fit an old White sewing machine.

QUESTION — Yvonne I. Musser, Lancaster, is in search of a Christmas tree made from an aluminum during the 1960s-1970s. The larger the tree, the better, none smaller than 5 feet. Call her as soon as possible with size and price at (717) 871-9706.

QUESTION — Eva Marie Poliquin, 242 Pilgert St., Alburits, PA 18011, is looking for a reasonably priced wringer to do laundry. She does not need the washer part, only the wringer.

QUESTION — Bonnie Gibble, Annville, wants to locate a Dr. Yanick, who was a professor at Monmouth College in New Jersey during the 1980s. Anyone have information? Call Bonnie at (717) 865-6029.

QUESTION — Dave Stehman, 531 Power Rd., Manheim, PA 17545, wants to find a replacement chuck for his Black and Decker Super Service Valve Refacer, size 5/8 type N, set 664110.

QUESTION — Cindy Eshleman,, Jonestown, wants to know where to buy "Chicken Soup for the Soul" cards in the area of Lebanon or Dauphin counties.

QUESTION — Any reader collect old vacuum cleaners? A reader has a Commander Imperial, which looks like a torpedo Model #116.722 Serv. #29628. "I used to help mom 55 years ago. The vacuum still runs, bag is good, and is in good shape for the age. Free to a good home. Call (610) 827-7561.

QUESTION — Paul Dowie has what he believes is a Longrich brand musical instrument: 32 brass rods of increasing lengths, closely suspended with strings to a 15-inch long 1x2-inch board. Run a spoon up or down for a "tinkling" scale. If this is something you can play, call Paul at (610) 827-7561.

QUESTION — A reader wants to know if the cross stitch store, Stitch in Time, which had been at Brickerville, has moved elsewhere or if it went out of business?

QUESTION — C. Woods wants to know where to purchase a pan to make panettone, a traditional Italian Christmas bread.

QUESTION — Mike, Pottsville, wanted information on starting a broom making business. He also needs equipment and materials. Call him at (570) 544-6417.

QUESTION — Eva Marie Poliquin, Alburtis, is looking for a top rack that swings out to fit a 1963 Kitchen Aid portable dishwasher.

QUESTION — Becky Allgyer, Skiles Rd, wants to know where to find a French Fleur cannister set (stoneware).

QUESTION — Amos Petersheim, Lykens, wanted to know where to buy new and used paint rollers with rubber designs on them. He needs parts to go with the rollers and thought someone might have some stuck away in their attics. Write to Amos at 554 N. Crossroads, Lykens, PA 17048.

QUESTION — Harold R. Stoudt, Hamburg, is in search of a rust inhibitor for a Drain Back Solar Domestic Hot Water System. The inhibitor must be non-toxic so that the water would be suitable for human consumption in case of leaks and it must mix well with water.

QUESTION — Anna Bryan writes that years ago her mom had an angel food cake pan with a lid on top. She asks where she can find one with a lid.

QUESTION — A reader from Ephrata wants to know where to purchase rubber or plastic ends for croquet mallets. She has two good sets but the plastic ends are broken.

QUESTION — Janet Lawton, Wellsboro, is searching for the address and phone number for Tom Schell, who wrote "An Introduction to the Dried Floral and Woody Ornamental Business." She believes Schell lives in Illinois or Indiana.

ANSWER — A reader from southern Lancaster County requested a used view master set in good condition. She also wants a used sewing machine that contains buttonhole and fancy stitch abilities. Thanks to Beverly Fory, Palmyra, who has a used Sears Kenmore purchased in the 1970s. If interested, call her at (255)7671.

State Fair Queen

(Continued from Page B14)

much as I can."

More than 40 fair queens representing county and local fairs all over Pennsylvania competed for the state title. After an intensive three-day competition, including interviews, presentations, and an evening gown competition, five finalists were selected at Saturday's coronation.

The five finalists included Duttry, Cornish, Charbi Anne Webby from Luzerne County Fair, Natalie Foxwell from Somerset County Fair, and Julia Polka from Westmoreland County Agricultural Fair.

After being selected, the finalists were asked one last question before the judges made their final decision. The question was "what is the biggest problem facing agriculture today, and what would you do to remedy it?"

Polka and Webby both listed the lack of involvement and understanding from the youth as the number one problem facing agriculture. They suggested that the state queen and county queens visit local schools to teach students about agriculture.

Both Duttry and Foxwell identified the lack of knowledge as the number one problem. "People don't realize how important agriculture is to Pennsylvania," said Duttry. "It provides three basic needs: food, clothing, and shelter, and it is the number one industry in Pennsylvania."

Cornish named preservation of Pennsylvania's farmlands as the number one problem facing agriculture. "We need the wide open spaces, the recreational activities, and the people in agriculture. They're the backbone of our communities."

Also honored during the Coronation was Miss Congeniality. The contestants each voted on their fellow fair queens and selected Samantha Martin, Washington County Fair Queen, as this year's Miss Congeniality winner.

WGAL Channel Eight's news anchor Brad Hicks was the master of ceremonies. In his opening comments, Hicks commended the parents for their fantastic job as role models for the contestants.

1999 Pennsylvania Fair Queen Julie Sechler crowns the new 2000 Pennsylvania Fair Queen Jana Duttry from Clearfield County during last Saturday's coronation.

1999 Pennsylvania State Fair Queen Julie Sechler congratulates Miss Congeniality for the 2000 Coronation, Samantha Martin from Washington County Fair.

Both the Pennsylvania Attorney General Dean Michael Fisher and the Pennsylvania Secretary of Agriculture Samuel Hayes, Jr., attended the coronation.

In his opening remarks, Secretary Hayes congratulated the county and community fairs for allowing young people to experience this type of activity.

"The process of how they got here is life enriching," said Hayes. "These experiences will be very important for them as they go out into the world."

Attorney Fisher seconded Hayes' comments. "I am constantly telling people about the marvels and wonders of Pennsylvania," said Fisher. "I thank the local fairs for giving our society safe vehicles for community fun."

1999 Pennsylvania Fair Queen Julie Sechler from Somerset County gave her farewell remarks during the coronation. During her reign, Sechler visited local fairs, made 45 other appearances, and put more than 6,000 miles on her car traveling across the state.

"I am constantly speaking on behalf of Pennsylvania county fairs," said Sechler. She thanked the local fairs for giving her the opportunity to serve as queen, and she commended the contestants for all being winners in their own right.

State Fair Queen Committee co-chairperson Sarah Long said that Sechler was "an absolute gem" to work with throughout the year. "As co-chairperson, I can see improvement in the state queens and state coronation each year," said Long. "And the local fairs deserve all of the credit."

Almost 700 people attended the state fair queen coronation, which was held as part of the Pennsylvania State Association of County Fairs' Annual Convention last week. In it's fourteenth year, the state coronation has grown from 14 contestants at the crowning of the first state fair queen to this year's 44 contestants.

Win Prize For Favorite Dairy Recipe

PHILADELPHIA (Philadelphia Co.) — The American Dairy Association/Dairy Council Middle Atlantic is looking for dairy farm families to submit recipes for a new brochure. The brochure will be used by dairy promoters at local dairy promotions as a sampling of local dairy favorites.

The recipes can be in any category and should include at least two dairy ingredients. Entries will be judged on the following attributes -- easy to make, broad appeal, easy-to-access ingredients, and nutritionally sound.

The final selections to feature in the brochure will be judged by a panel of nutritionists from ADA/DC. Winners will be awarded 'got milk?' prizes and will have their recipes featured in the new brochure.

To enter the contest, send your recipes, along with your name, address, and the number of cows on your farm, to:

Kristen Campbell
American Dairy Association
325 Chestnut Street, Suite 600
Philadelphia, PA 19106

ADA/DC is looking for recipes from dairy farmers in Pennsylvania, Delaware, New Jersey, Maryland, Virginia and West Virginia. Send recipes to ADA/DC by February 4, 2000. For more information, call Kristen Campbell at 1-800-220-6586.

Strickler Elected

LEESPORT (Berks Co.)–Fay B. Strickler, Berks County Penn State Cooperative Extension family and consumer science agent was elected as second vice president and installed on the national board of Epsilon Sigma Phi (Cooperative Extension's Professional Organization) at the National Conference in Indianapolis, IN.

Epsilon Sigma Phi (ESP) is the national honorary extension fraternity which is dedicated to fostering standards of excellence in the extension system and developing the extension profession and the professional.

As ESP second vice president, she will serve as chairman of the Professional Development Committee to plan the 2000 National Conference in Salt Lake City, UT, Nov. 28-December 3. About 300 of the 9,000 members attend the conference and the keynote address is uplinked by satellite to members throughout the U.S.

Upon completion of this office, she will become president-elect in 2001 and national president in 2002.

You ask You answer

(Continued from Page B16)

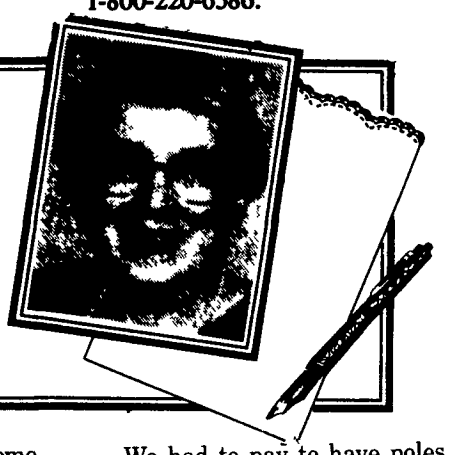
ANSWER — A used set of "Uncle Arthur's Bedtime Stories" and "My Bible Friends" were requested by Samuel Fisher, Nottingham. Thanks to a reader who writes that these books are available new at half price from Paul Ward at (717) 299-6022.

ANSWER — Marc Roberts, R.2, Box 800, Thomasville, PA 17364, wanted to buy an old bicycle built for two, any condition. Thanks to a Blain reader who writes that new four-wheeled bikes are available in one, two, or four passenger models. They range in cost from $1,119 to $1,786. They are not in stock but must be ordered six weeks in advance from they factory. Order from Hoover's Bike Shop, R.1, Box 80, Blain, PA 17006.

ANSWER — In response to readers who wanted to get rid of used bikes, the following will purchased them: Hoover's Bike Shop, R.1, Box 80, Blain, PA 17006.

Ida's Notebook

by *Ida Risser*



Now that we are almost homebound, the telephone is our lifeline to the outside world.

Our children check in every now and them to see how their father is doing. Slowly for sure, as he goes up and down the hallway with his walker. The first six weeks after hip surgery carry many restrictions.

One child in Georgia has 300 free minutes on his cell phone and either he uses them or he loses them. Our three girls call regularly and we are glad to hear from them. One son lives close enough that he can stop in every now and then.

For a long time we had no telephone on our farm. So when our barn caught fire, someone had to run into the village of Oregon to find a phone to call the fire engines. By that time, it was too late to save the barn.

We had to pay to have poles installed along a one-third mile road to get the phone. Then we ended up with ten people on our line. Often we had to wait hours to place a call as others needed the phone too.

Now we must become accustomed to making calls where a touch phone is needed to press the right button to reach a particular person. Even so we can hold for a long time, while we listen to music and recordings.

Our life will consist of many doctor's visits during the next few months. The best we can hope for is a good ending to the ordeal.

Everyone says, "A day at a time."

What else can we do? Maybe I'll bake a few desserts to make life more pleasant just now.

Attend Women In Ag Workshop

STATE COLLEGE (Centre Co.)–Learn how to tap into your creativity, hone your communication skills and master the art of mentoring at the Women in Ag Workshop scheduled for Feb. 3 at the Penn Stater Hotel and Conference Center.

Open to all women involved in agriculture–whether operating a farm business or working for an agriculture company or organization–the workshop is designed to help participants further develop their communications, leadership, and mentoring skills.

"We recognize the potential for women to lead agriculture into the next millennium," said Crystal Smithmyer, workshop coordinator and Fellow, Kellogg National Leadership Program. "We want to help them better develop their attributes and talents in serving the industry."

The Women in Ag Workshop, which begins with registration at noon, is being held in conjunction with the Pennsylvania Association of Sustainable Agriculture (PASA) annual conference. It features three workshops, including: 1) Honoring Women's Creativity: Coloring Outside the Lines in Our Own Lives; 2) The Courage to Communicate; and 3) Mentoring From the Kitchen to the Boardroom.

The workshop will conclude with a 6 p.m. reception featuring Vandana Shiva, a noted author and environmentalist and winner of a 1993 Right Livelihood Award, known as "the alternative Nobel Prize." Shiva, the director of the Research Foundation for Science, Technology and Ecology in New Delhi, India, is one of the keynote speakers for the PASA conference.

The cost of the full Women in Ag Workshop, including the reception, is $15 per person. The cost to attend the reception only is $10 per person. For a registration form or more information, contact Crystal Smithmyer, workshop coordinator, at (814) 674-2362 or send an e-mail to cmsmyer@aol.com.

The program is sponsored by the W. K. Kellogg Foundation, with the support of PASA and the Penn State University Women's Studies program.

Money 2000 Action

Adopt P.Y.F. as your new motto and Pay Yourself First.

Take 10 percent of your pretax income each month and save it. Begin this practice early in Y2K. The sooner you begin, the quicker saving 10 percent of pretax income will become a habit. P.Y.F. means before spending any income, a portion of it will be set aside for the future. The savings can grow into an investment fund in which money works for your future goals.

The Other Cards

Debit and "smartcards"–are they right for you?

Debit cards are not credit cards. Auto-mated Teller Machine or ATM cards are debit cards; they allow you to access money from your bank account. ATM cards with a MasterCard or Visa logo on them can be used to buy merchandise. As soon as you use a debit card, the money is withdrawn from your account to pay the vendor.

A number of consumers use debit cards if they are striving to cut down on credit card purchases and prefer making small purchases with plastic card rather than paying cash or charging items on their credit card. Others don't like carrying cash.

It's important to keep track of your bank balance if you're using a debit card because often transactions take place in a few days, unlike the 20 or so day's leeway with credit cards. With every purchase using a debit card, immediately enter the cost into your check register and deduct the sum from your balance. Using these precautions, you won't overdraw your account and have to pay penalties for bounced checks.

If a debit card sounds good to you, check with your bank first. Ask if it charges a fee every time you use the debit card. This practice increases your cost of doing business and it might not be worth the inconvenience of doing business at that bank.

Three types of smartcards are available: single purpose (telephone card), a prepaid disposable bankcard (bought from the bank and used for purchases anywhere there is a smartcard terminal); and a reloadable card (when your money runs out, you can add more to the balance).

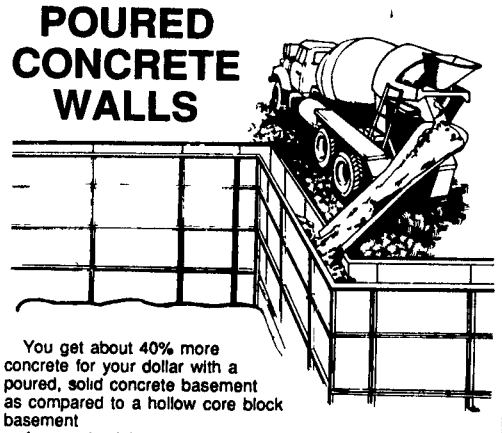
POURED SOLID CONCRETE
STORAGE SYSTEM SPECIALISTS
START WITH THE BEST!
POURED CONCRETE WALLS


You get about 40% more concrete for your dollar with a poured, solid concrete basement as compared to a hollow core block basement
A poured solid concrete basement weighs about 50 lbs more per cubic foot! Far denser What's more, poured solid concrete walls are monolithic ... there are no joints!
This is why laboratory tests show poured, solid concrete basements have many times the flexural and compressive strength to withstand the side and down pressures caused by earth, wind, water and building loads and the material density to resist water penetration
Best of all, thanks to modern and efficient construction techniques, poured, solid concrete basements are competitively priced
Solid Concrete For:
- Manure Pit Walls
- Hog House Walls
- Barnyard Walls
- Chicken House Walls
- Retaining Walls
- House Foundation Walls
- Silage Pit Walls
- Cistern Walls
- Concrete Decks
- Concrete Pit Tops

Steven Leid Farm Dispersal

Sat. Feb. 5, 2000 11:00 A.M.

4521 PULVER ROAD
Between Wayne-Weston And Dundee
SCHUYLER COUNTY
TOWNSHIP OF TYRONE, NEW YORK
(Blizzard Date Mon. Feb. 7)

From Dundee or Wayne take State Rte. 230 and turn south onto Ray Crosby Road, follow up to "Six corners", make right then immediate left onto Pulver Road.

From Tyrone or Hammondsport use Schuyler County Road 23 (Hammondsport to Watkins Glen Road) at Weston turn north onto DeCamp Road, follow short distance and make right (east) turn onto Pulver Road follow about 2 1/2 miles to sale site.

Selling will be:

69 Top Commercial Holsteins - without doubt the best herd we've sold since last August! This is a tie stall herd of 38 milking age animals either currently in their first or second lactation.Three head will be strictly fresh just before sale day and fourteen head are due for February/March, plus a fancy set of seven springing first calf heifers! Thirteen cows were fresh since the first of September. There are nine pen heifers right ready to greet the bull, a fancy pen of eight calves 9-10 months old, and seven well started hutch calves. Steven did a great job with his cattle! Cattle are interstate ready, inoculated with Horizon 9 and pregnancy examined by Dr. Roemmelt of Eastview Veterinary Clinic.

HORSES: Standard bred driving horse 6-7 yrs. old; General purpose horse to drive or work, 6 yr. old; Pair of work horses; 10 mo. old colt and a "coming 2 yr. old"; Plus a load from Noah Horst!

PUBLIC AUCTION

JOHN M. HESS
AUCTION SERVICE, INC.
61 ACRE FARM
12 ACRE PARCEL
FARM EQUIPMENT AND PERSONAL PROPERTY
Helen S. Epting Estate

Saturday, March 11, 2000

Personal Property: 9:00 AM--
Real Estate: 12:00 PM --
Farm Equipment immediately following Real Estate.

Location: 535 Virginville Road, Hamburg, PA, 19526, Perry Township, Berks County.

Directions: From Reading, take Route 61N to Schmeck's Restaurant, turn right onto Schappell Rd., Continue to stop sign at Windsor Castle Rd., turn right, proceed to third road on left. Follow sale signs!

Parcel One: 57.33 acres M/L of prime Berks County farmland. Buildings consist of a two-story frame farmhouse, four bedrooms (3 private, 1 walk through), full bath, dining room, living room, and large eat-in kitchen, full basement, oil fired hot water heat. Detached wash house and wood shed. A large well maintained bank barn with thirty eight freestalls and milkhouse. Large five bay concrete block shop and garage, pole barn currently set up for cattle, contains feed conveyor and is attached to 20'x50; concrete stave silo and new two and one-half ton feed bin. There are several other outbuildings. All roofs on the major buildings have recently been replaced. Buildings are in excellent repair! Easily accessible fenced-in meadow with scenic pond.

Parcel Two: 12.88 acres M/L currently being farmed-approximately 200' feet of read frontage, ground overlooks peaceful Berks County valley! Both parcels are currently in the Clean and Green Program.

A full listing of farm equipment and antiques and collectibles will follow at a future date.

Open House: Saturday, February 12, 2000, 9-12 Noon, Thursday, February 17, 2000, 4-6 PM, or by appointment! Call John - 717-664-5238.

Real Estate Terms and Conditions: 10% Down on day of sale. Balance at settlement on or before 45 days. Real Estate sold as-is. Any announcements made on the day of sale take precedence over any advertised information.

Auctioneer's Note: The Eptings took excellent care of their real estate, farm equipment and personal property. Come early-We have a full day planned! Cash or good PA check only! For more information, check our web page at www hess auction.com

Champions Paraded at National Western Super ROV Angus Show

ST. JOSEPH, Mo.–Angus exhibitors from across the country paraded 268 females and 96 bulls at the 2000 National Western Stock Show Super Roll of Victory (ROV) Angus Show Jan. 12-14 in Denver, Colo.

Lead judge Randy Daniel, Colbert, Ga., and his associate Quintin Smith, Lebanon, Tenn., evaluated the 364 entries before selecting champions during the two-day show.

Famous 7001 captured the grand champion bull title after first winning the senior division. Brockmere Farms Inc., Brookfield, Mo.; Summitcrest Farms, Summitville, Ohio; and Roth Angus, Freeman, S.D., own the January 1997 son of S A F Fame.

Northern Improvement 4480 GF captured reserve grand champion bull honors for Goldberg Farms, Moorhead, Minn.; Express Angus Ranches, Shawnee, Okla.; and Whitestone Krebs, Gordon, Neb. The March 1998 son of TC Stockman 365 first topped the junior division.

In the female show, BT Everelda Entense 166H claimed the grand champion title. Stewart Kincaid, Hardin, Mont., owns the February 1998 daughter of BT Ultima 75E that first won junior champion heifer.

T J Poppy T522, a March 1998 daughter of O G L Battle Cry 427 128, walked away with reserve grand champion female honors. Jamie Schroeder, Douglas, Wyo., owns the entry that first won reserve junior champion heifer.

A complete list of winners follows:

NPC/SFA Chipping Potato Seminar

BUFFALO, N.Y.–The National Potato Council and Snack Food Association invite potato growers to launch the chip industry into the new millennium, March 2-4, at the National Chipping Potato Seminar.

The conference headquarters will be the newly renovated Adam's Mark Hotel in downtown Buffalo, N.Y., a short drive from the airport, just minutes away from the magnificent Niagara Falls and a nightlife offering casinos and original Buffalo wings.

The National Potato Council, Snack Food Association, New York State growers, Cornell researchers, and many others are working to put together a conference that will enlighten, inform, and even entertain.

Thursday, March 2 will start with National Potato Council and Snack Food Association committee meetings, joint luncheon, and registration. Early arrivals will have time to take in the sites and sounds of nearby Niagara Falls or other Buffalo scenes. The first group get together will be the evening cocktail reception.

Friday, March 3 kicks off the daylong chipping potato program. Maintaining a winning attitude in today's fast paced, ever changing environment is key, especially when you are running your own business such as farming. Keith Harrell, reknown inspirational speaker, will motivate the group as he talks about the importance of loyalty, teamwork, and attitude.

Spouses hold a unique position in a farming enterprise, whether they are directly involved in the day-to-day operation or not, they are affected by the stress and pressure that comes with the territory. The planning committee has put together a spouses program that guarantees to recharge and re-energize both mentally and physically. Cindy Palmer, writer for Spudman magazine, Montana newspaper columnist, mother and farm wife will bring her humor and insight to a morning workshop dealing with the pressures and joys unique to farm wives. Others offer real-life solutions, strategies, and opportunities to share personal experiences during a morning workshop.

The entire group will get together for a joint lunch and session with motivational speaker Keith Harrell. The spouses' afternoon will offer spas, pampering, and a spectacular site-seeing tour of Buffalo's winter wonderland.

Much more than the Big Apple, New York is a smorgasbord of agricultural enterprises. In fact, agriculture is the number one industry in New York. A $2.9 billion value of agricultural products at the farm translates into more than $15 billion added to the states economy each year.

New York's potato industry is segmented into seed, tablestock, and chip growers. It has the benefit of plentiful water, variations in soil types, high quality transportation system, controlled storages, and partnerships with Cornell's researcher and farms.

The potato chip was born in 1853 in New York, the result of a dissatisfied diner and a volatile chef at Moon's Lake House in Saratoga Springs.

For more information, call 1-877-NY-SPUDS (877/697-7837) or visit the website, www.empirepotatogrowers.com.

The American Angus Association, along with the Angus exhibitors at the 2000 National Western Stock Show, recognized Tim Fitzgerald, Aldie, Va., right, as the Herdsman of the Year. Exhibitors in the barn cast their ballots for the person they feel is most deserving of the honor. Dean Hurlbut, director of activities for the American Angus Association, is pictured making the presentation at the annual herdsman banquet Jan. 10 in Denver, Colo.

The Reading Fair

Aug. 7–12, the fair will be held on the new fairgrounds adjacent to the 4-H Center, also including the large 4-H Building.

The Fairgrounds is located at Hilltop and County Welfare roads in Bern Township, off of Rt. 183 at the traffic light, one mile north of the Reading Airport.

The fair will be seven weeks earlier than in previous years, giving an opportunity to all school children and students to participate. Deadline for all cattle entries will be July 3.

The fair will again honor a farm family for the 45th year, two young people from 4-H, and two FFA students.

The names of the farm families must be submitted by May 1 to A. Wayne Readinger. The final date for the report and book, plus the four young people, will be July 3. The farm family banquet will be July 26.

The 2000 fair will inaugurate a flat admission of $6 which will include parking, amusements, rides, and musical entertainment.

The Henry T. Cole shows will be on the Midway as in previous years. Businesses interested in participation in the fair as exhibitors or food vendors can call Dave Souders at (610) 370-3473.

FORAGING AROUND

'Industry, Farmer, Scientist — Working Together Toward A Sounder Grassland Program'

Shunning Anything That 'Rots, Rusts, And Depreciates'

RANDY WELLS
Indiana Co. Correspondent

KITTANNING (Armstrong Co.) — Armstrong County cattleman George Kepple is advocating agricultural philosophies that would be regarded as heresy on most American farms.

Kepple tells other cattlemen not to buy lime and fertilizer instead of acquiring more of the latest, technologically-advanced farm machinery, he's selling the equipment he already has. And this fall he may even allow his cattle to eat his standing corn.

"My cattle are going to become the primary harvesters of my crops," Kepple said recently, adding that he's trying to shun anything that "rots, rusts, and depreciates."

His farming philosophy is winning him recognition. This spring he received one of five state pasture producer awards given by the Pennsylvania Forage and Grassland Council. And his 130-acre Kittanning Hollow Farm" in Sugarcreek Township won the 1999 Armstrong County Conservation District Rotational Grazier Award.

He presented his views on rotational and intensive grazing during a pasture seminar at the Pennsylvania Cattlemen's Association convention in State College late in July.

Kepple is striving to make his farm as labor independent as possible, because he has other interests. He's also an attorney and maintains a private law practice in Kittanning, a 20-minute drive from his farm. He was his county's district attorney from 1978 to 1998, and was the Republican nominee for state senator in the 41st District in 1996.

He also wants more time to spend with his wife and two college age children.

"The more I can take the cattle to

(Turn to Page 4)

Kepple's farming philosophy includes eliminating as much "heavy metal" — farm machinery — as possible. His most indispensable piece of equipment is his 5-year-old all-terrain vehicle. *Photo by Randy Wells*

Drought or too much rain causes many problems on our farm. With too much rain in the fall three years ago, we still have some hoof marks in several paddocks, and several bare spots have not reseeded.

(Turn to Page 3)

According to crop adviser Leland Miller, with the use of the nitrogen material stubble treatment, sometimes "you can get real response, but the quality falls on its face," he said. But the nitrogen, in a slow release form, forces the plant to "think" differently, altering its "expression." *Photo by Andy Andrews*

Alfalfa Stubble Application May Boost Yields, Nutrient Values

ANDY ANDREWS
Lancaster Farming Staff

LEOLA (Lancaster Co.) — Alfalfa producers can't control the weather. But with the spray application of ammine nitrogen stubble treatment, yields can be increased and, best of all, nutrient value of the crop can be improved.

After first cutting alfalfa late in the spring that year, Leola dairyman Paul Reiff applied the solution at a cost of $7.35 per acre to alfalfa fields and saw a corresponding increase in the quality of hay he cut on the farm.

Despite what some consider the worst Pennsylvania drought in history, with rainfall already at time of second cutting three inches below normal early on in the season, the cool weather produced what Reiff considered a bumper crop of alfalfa, which led to improved growth and a boost in protein levels of the crop.

And the same combination of good weather "where you hope for rain," he said, "that's the kind of weather I like for alfalfa," and use of the spray application worked some wonders on the

Conference Addresses Game Breeders, Hunting Preserves

UNIVERSITY PARK (Centre Co.)–For those interested in game birds or the operation of a hunting resort, Penn State's College of Agricultural Sciences will conduct a three-day conference, "Pennsylvania Game Breeders and Hunting Preserves," Feb. 20-22 here at The Nittany Lion Inn.

"Some of the most experienced individuals in game bird production and hunting resort management will lead the sessions," said Michael Hulet, associate professor of poultry science.

The conference covers tips for beginners on how to raise birds and establish a safe and successful hunting club. Presentations on game bird health will be of interest to industry veterans, as well as those just starting up. Participants also will have the chance to talk with presenters and other preserve owners.

Registration begins at 7 p.m., Sunday, Feb. 20, followed by a 7.30 p.m. reception. Training and information sessions begin at 8:40 a.m., Monday, Feb. 21.

Monday morning sessions will focus on hatchery management, brooding and rearing game birds, and training a young dog. Chris Chaffon of the National Shooting Sports Foundation will discuss the future of shooting sports.

Monday afternoon sessions will cover incubator conditions and their effect on post-hatch growth; coccidiosis in game birds, and available antimicrobials approved for game birds. Dr. Fred Metzger, a State College veterinarian, will discuss tick control for hunting dogs. Jim Brett, sportsmen advisor to the governor, will discuss getting youth involved in shooting sports.

A banquet will be conducted Monday at 7 p.m. The guest speaker, Duane Diefenbach of the Pennsylvania Cooperative Fish and Wildlife Research Unit, will discuss "Pennsylvania Game-Farm Pheasants: How Many Do Hunters Bring to the Dinner Table?" Attendees will hear the results of a large study conducted by the Pennsylvania Department of Agriculture–in which banded pheasants were released and hunters turned in bands for cash rewards–to determine the effectiveness of the Pennsylvania Game Commission's program for raising and placing birds.

Tuesday's sessions will cover global perspectives of the grain market, the use of computers in game bird production, and regulations on shipping live birds. Patty Dunn, Penn State research associate in veterinary science, will discuss the West Nile virus and other encephalitedes and their risk to game birds. The West Nile virus, seen for the first time in the Western hemisphere last year when it infected crows in New York City, has since infected pheasants and other birds.

A game bird production panel, "Everything You Wanted to Know About the Game Bird Business and Were Afraid to Ask," will feature panelists with experience raising a diversity of game birds. Panelists include Carl Riegner of the Pennsylvania Game Commission, Tom Crawford of the Hillendale Hunt Club, and Bob Wolfe of Wolfe's Game Farm.

The conference will end at 3:30 p.m., following a tour of the Department of Poultry Science and the Department of Veterinary Science's Diagnostic Lab. "The poultry science department has some of the newest research facilities in the nation, with a number of active projects that benefit game bird producers," Hulet said. "You'll see hatching facilities, growing facilities and an environmental chamber that allows researchers to control light, temperature and other factors to simulate any season of the year or weather condition."

To request registration materials and a detailed schedule, call (814) 865-8301. For more information on conference content, call Michael Hulet at (814) 863-8934. Registration will be accepted by mail or fax through Feb. 4.

The registration fee is $55. A second person from the same firm or a spouse can attend for $45. Tickets for Monday evening's banquet should be purchased with the preregistration form for an additional $25. Walk-in registrations will be accepted for $65 as space permits.

Pork Expo Feb. 9

NORTH CORNWALL (Lebanon Co.)–The 22nd annual Keystone Pork Expo will be Feb. 9 at the Lebanon Valley Expo Center at the Lebanon Fairgrounds on Cornwall and Rocherty roads. This year's meeting will feature a trade show with more than 35 exhibits and educational seminars for producers. The Expo will once again sponsor a "Pork Bowl" for competing FFA and 4-H members.

Steve Meyer, director of economics programs for the National Pork Producers Council, will be providing advice and tips on controlling risk in swine enterprises. Laura Cheney, assistant professor of agricultural economics at Michigan State University, will discuss marketing and production contracts. Both of these individuals are nationally known for their programs and their expertise.

Robert Mikesell, senior extension associate, and Leon Ressler, extension agent in Lancaster County, will update the audience on results from an odor-reduction field research project conducted on several swine operations throughout Pennsylvania.

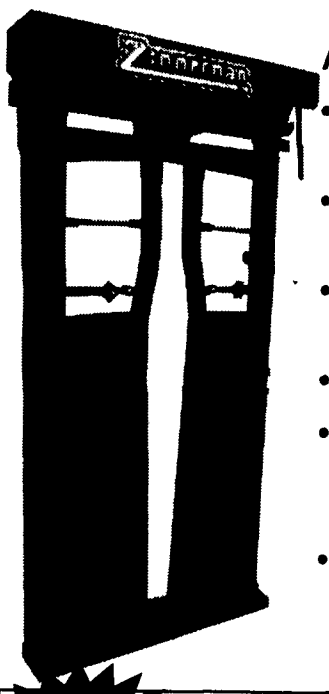
Lou Moore, Penn State professor of agricultural economics and continuing Pork Expo favorite, will be on hand to deliver his hog market outlook.

Keystone Pork Expo programs will be available in mid-January in most county extension offices.

Paul B Zimmerman INC

Automatic Headgate

Finished with a zinc rich undercoat & TGIC polyester topcoat



Advantages:

- Durable 2 coat finish that stands up to daily use.
- Full roof cover for outdoor protection.
- Heavy duty latch for positive locking.
- Double linkage for extra stability.
- Fast, easy adjustments to match animal size & neck size from 5" to 7"
- Handle for manual operation for slow or horned cattle.

Two Coat Process!

Added Value With Our 2 Coat Process!

1 Five step metal preparation, including iron phosphate conversion coating, to enhance adhesion & prevent undercoat corrosion

2 Zinc rich epoxy powder undercoat

3 TGIC polyester powder top coat, baked at 400° to fuse coats, forming a cross link molecular bond

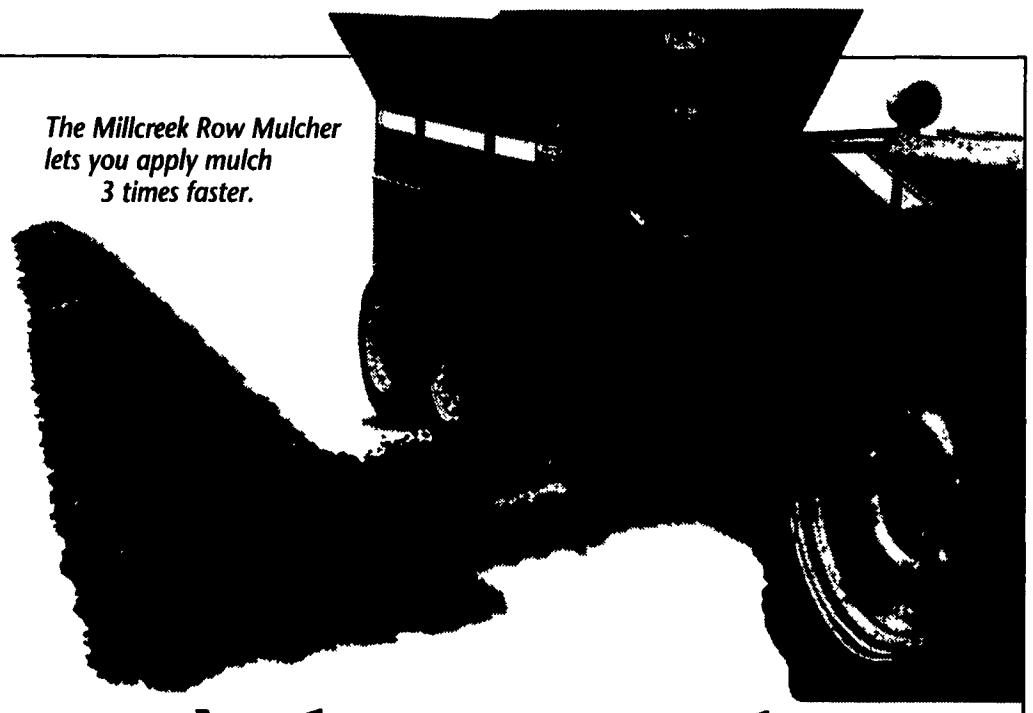
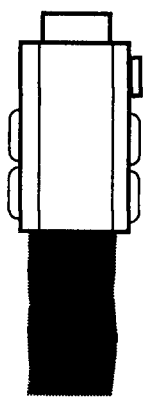
The Millcreek Row Mulcher lets you apply mulch 3 times faster.



Apply compost and organic mulch to any row crop automatically



YOUR CHOICE
Millcreek Row Mulchers also let you drop spread in the center of rows.

From tree fruit to vegetable beds, from bramble crops to vineyards, organic mulch and compost can reduce chemical input for weed suppression, retain soil moisture, and improve soil fertility by adding organic matter to sandy and clay soils.

Now Millcreek eliminates the costly labor needed for organic mulch and compost application. The remarkable new Millcreek Row Mulcher works with all types of organic material, and even lets you adjust the depth and width of the mulch rows from 12" to 120" wide, from 1/2" to 6" deep.

Starting under $6500, no other machine compares when it comes to capabilities, versatility, and cost effectiveness. Rugged construction. Six sizes, from 3.4 to 20 cubic yard capacity. Custom designs. Call today for a free color brochure, or to discuss your specific needs.

Cornell, USDA Prospect For 'Green Gold' In Turkey Mountains

GENEVA, N.Y. — Phil Forsline and Herb Aldwinckle work like Johnny Appleseed, collecting and sowing apple seeds for future generations.

In the last decade, they have traveled thousands of miles by bus, jeep, helicopter, and foot to bring back apple seeds for breeding and species preservation from wild apple forests in Central Asia and China.

"Prospecting for apple DNA is like prospecting for green gold," said Forsline. "The gold mine we brought back from our most recent trip to Turkey weighed less than a pound, took centuries to form, and over 3,500 miles to collect."

In the space of a small sack, they collected more than 30,000 wild apple seeds from 62 different wild specimens, containing DNA with enough genetic potential to improve the commercial apple for centuries to come.

"Wild germplasm is critical in maintaining diversity in the gene pool," explained Forsline, who is the curator of the apple collection at the USDA-ARS Plant Genetics Resources Unit (PGRU) in Geneva. If a new strain of disease or insect comes along that decimates current commercial varieties like McIntosh or Gala, for instance, germplasm that has evolved desirable traits through natural selection might provide genes for resistance that could be bred into future varieties.

"We don't know what the threats from diseases, insect pests and other biological or physical hazard will be in the future, but having as broad an array as possible of different apple genes to draw on is an excellent way of forearming us," said Aldwinckle, a Cornell University plant pathologist and apple rootstock breeder who works at the New York State Agricultural Experiment Station in Geneva.

The party of two Americans and five Turkish scientists took part in a three-week expedition through Turkey in September to expand the apple collection at Geneva. In particular they were looking for Malus orientalis. Present cultivars of the commercial apple (Malus x domestica) have a narrow genetic base, according to Forsline, and are more closely related to Malus sieversii which the group collected in Kazakstan and China.

In general, the quality of M. orientalis is not as good for eating as M. sieversii. The apples tend to be smaller — roughly one inch in diameter compared to sieversii which are an inch to three inches in diameter — and very sour to astringent in taste. But, some of the apples looked "very clean," said Forsline, "and may be a source of new disease or pest resistance." The scientists had not expected the diversity they found.

The group spent from two and one-half to three days in each of six provinces in northeast Turkey over a period of three weeks. The germplasm prospecting trek took them through primitive villages and wild forests in the mountains, at 3,000 to 7,000 feet above sea level, within 50 miles of the Black Sea. They traveled on the fringe of the area devasted in August's earthquake, and right through the area hit in November.

The trek roughly followed the Silk Route that linked China and Central Asia with the Middle East and Western Europe. Scientists believe apples originated in Central Asia, were brought to Europe by nomads, and spice and silk traders, and adopted by local farmers along the way. Various specimens then co-evolved over the ensuring centuries in response to local environmental stresses. By collecting samples from these remote regions, the researchers hope to expand the collection of wild genes-genes that may contain important new traits such as pest or disease resistance.

"Some of the trees we saw were 100 to 300 years old, three and one-half feet in diameter, and 40 feet tall," said Forsline.

He and Aldwinckle believe the gene pool in Turkey has diminished to one to two percent of the population that it was 50 years ago. Like many scientists, they believe the diversity of the world's gene pool is being lost to encroaching development andagriculture — "a depleted resource," said Forsline — and apple genes are no exception.

As is true in the other collecting sites in the former Soviet Union and China, villagers have intensified their land use for grazing and crops and have cut down much woodland for agricultural purposes or firewood. In Turkey, for instance, apple wood is a favorite among the native farmers who use it to make plows. The few trees that have been left were probably particularly prolific or good tasting fruit trees, said Forsline.

"We visited lots of little villages, where the populations ranged from 200 to 2000," said Forsline. Except for the satellite dishes outside their houses, the people lived a very primitive agricultural lifestyle. There were some tractors, but horses were still used to thresh beans and plow fields.

Collecting Wild Seeds

The scientists' methods of collection are based on past experience and capitalize on accumulated knowledge. They also rely on input from native researchers and guides.

Tim Momol, a former research associate of Aldwinckle's who is from Turkey, helped arrange the trip. The main guide was Dr. Hikmet Saygili, a bacteriologist from the Aegean University in Izmit.

Acquiring a critical mass of germplasm is deliberate and painstaking work. When the party found a likely prospect, they collected 200 fruit from the particular tree. Each night after dinner, they sat around a table with their pocket knives, carefully sliced open the apples theyhad collected that day, removed the 1 to 15 seeds contained in each fruit, and dried the seeds on a piece of newspaper overnight. They transported the seeds in carefully marked paper envelopes where they continued to "breathe," and opened them to the air for the next several evenings until they were dry. In the Turkish climate, drying took only two to three days. In addition, cuttings or scions of local varieties were collected.

"The biggest mistake most collectors make is keeping seeds and scions too moist," said Forsline. It is not a good idea to store scions in a damp paper towel, for instance.

The group had permits from the Turkish government and the USDA to bring seeds and scions back to the U.S. As part of the agreement with their hosts, the Turkish scientists took one-quarter of all the seeds for their own research purposes.

Evaluation

In addition to holding seeds in long-term cold storage at PGRU and Fort Collins, Colo. (at the National Seed Storage Laboratory), the seeds will be carefully germinated and then evaluated for disease and pest resistance, and vegetative traits such as growth habit and vigor. When the trees fruit, the apples will be evaluated for size, color, texture, aroma and flavor. More than 50 scientists and technicians in sites all over the world are involved in the project, as they have been with the seeds from the earlier collecting trips.

In Geneva, Aldwinckle will spearhead the effort to evaluate the seedlings for apple scab, cedar apple rust, fire blight, Phytophthora, and powdery mildew. Cornell entomologist Harvey Reissig will conduct studies to compare the seedlings for resistance to apple maggot and codling moth. In addition, cooperators will look at cold hardiness, tolerance to mild chilling for production areas with warm winters, late bloom, tolerance to drought, and sunburn resistance. Preliminary results should be available in about six years.

Through molecular tests, researchers are also now able to characterize the entire gene map of each apple to determine their particular genetic makeup and ensure that only "new" apples are selected for study, testing and eventual preservation.

The trip was paid for by the USDA Plant Exploration Fund, which funds about 12 germplasm collecting trips each year. This was the seventh germplasm expedition for apples."We have one of the most active collection programs in the system, along with that for potatoes," said Forsline.

Aldwinckle took the first trip to Central Asia in 1989. Forsline has been on the six subsequent trips; the most recent was the trip he and Aldwinckle took to China in 1997.

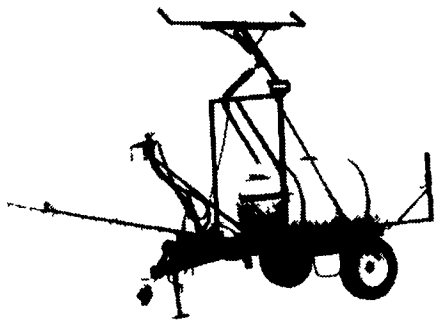
J & L Hay-Saver Feeds 20 Cattle

New, improved, round hay-bale feeder feeds large or small hay bales along with square bales. University proven hay savings. This feeder is built of heavy 1¼" pipe and heavy steel for ring.
Available with 3/4" plywood floors.
This feeder is built to last.

J&L Equipment
156 Pompey Hill Road, Stoystown, PA 15563
814-893-5086

At Last...



...a Boom Sprayer
for multi-crop ***produce farmer*** that is affordable and will ***do the job*** from sweet corn to melon crops.

With features like...

- 24 ft. one-side boom that allows for 50 ft. coverage between drive rows.
- Easy boom height adjustment from 2 ft to 7 1/2 ft for sweet corn
- Hydraulic leveling on the go allows uniform boom height from the crop.
- 280 PSI, 28 GPM 3 diaphragm pump with power shaft for quick hookup
- Adjustable wheel spacing and tongue height.
- NEW A-spring loaded hydraulic shock to control boom bounce.

Available with 300 or 400 Gallon Tanks

With the high cost of chemicals, the *right sprayer* is needed

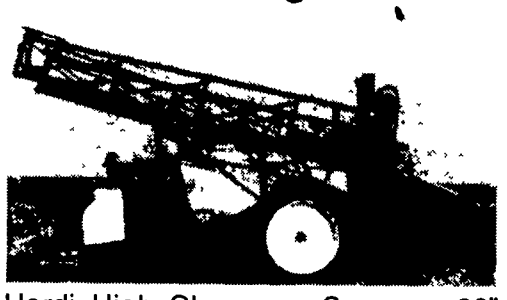
HARDI

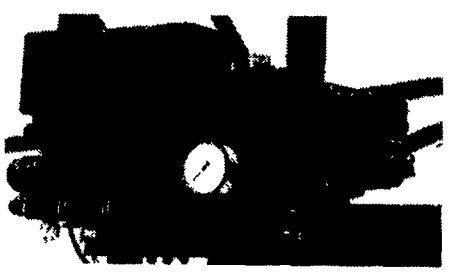
THE WORLD'S LEADING MANUFACTURER OF SPRAYERS AND SPRAYING EQUIPMENT

Hardi Eagle Hydraulic Fold Booms are the standard of the industry for stability, ride and durability.



Hardi High Clearance Sprayers 60" wheel track width that competitors can't match.

Hardi Diaphragm Pumps are the toughest and highest performing pumps. Centrifugal pumps can't compare!



Hardi Electric Controls are protected from corrosive chemicals and can be operated manually if power supply is lost.

Don't Be Fooled By Imitators!

It's a HARDI... Better design... Better accuracy... It's the best! Better reliability... HARDI!

$750.00 Factory Rebate on Hardi M Series Navigator Trailer Sprayers

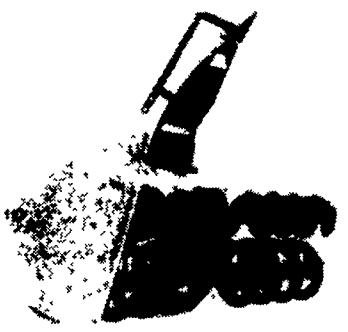
HARDI

ULTIMATE WINTER WEAPON



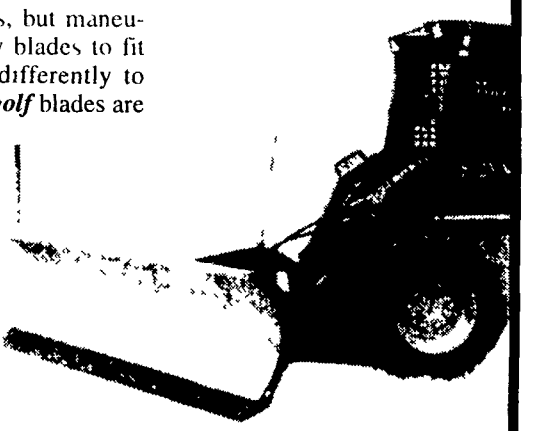
ERSKINE rotary snow blowers have been proven for 50 years by people who need to move snow fast after every snowfall or blizzard. **They Are Tough, Dependable and Built To Go - Day After Day!**

720 3 Point Mounted, 72" Cut, Single Auger **$2,595.00**

960 3 Point Mounted, 96" Cut, Double Auger **$3,895.00**

1812 Skid Steer Mounted, 73" Cut, Hydraulic Drive, DEMO **$3,450.00**

Snowwolf snow-removal systems A skid-steer's working speed is slower than that of pickup trucks, but maneuverability is greater Snow blades to fit them must be designed differently to perform efficiently. ***Snowwolf*** blades are a full 30" high, with a heavy moldboard curl and a sharp angle where the cutting edge meets the ground



ULTRA SERIES, JLM 96, 96" Cut **$2,650.00**

PRO SERIES, PS84, 84" Cut. **$1,975.00**

Nothing compares to a Super Boom™

Why choose a New Holland LS150 skid-steer?

- **Superior visibility**
- **Unbeatable stability**
- **Faster speeds**
- **Superior dump height & reach**
- **Greater bucket & lift capacity**
- **The most attachments**
- **Unmatched dependability**

NEW HOLLAND

Stop by today and see for yourself why no other skid steer can compare to the LS150.

GET PRECISE APPLICATION CONTROL

New Holland side-delivery spreaders provide the most material control. Whether you're light top dressing, laying down a heavy layer, or anything in between, the Model 3106 puts the right amount of material right where you need it.

- Handles a wide variety of material – slurry gutter material, cow manure, even poultry litter
- 1375 gallon capacity with side rails in place.
- V-tank design delivers material to the auger fast
- Heavy-duty round-core auger produces less drag
- Double-acting hydraulic cylinder moves auger up and down to keep material flowing
- Hydraulic gate and specially designed expeller give precise application control
- Backed by a 10-year warranty against tank rust-through

See us for all your spreader needs.

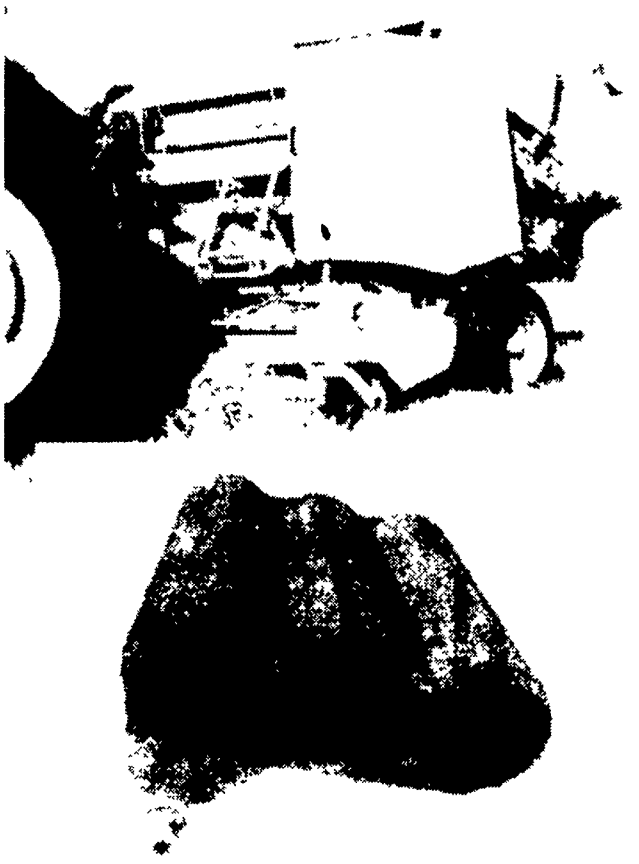
Forage Harvester Performance Redefined - by CLAAS

Here's a good way to get through wet spots and keep truck on high ground. Photo shows a Claas 880 Havester, owned by Paul Dotterer & Sons, Mill Hall, PA, working at Ag Progress Days this year. The truck drove 20 rows from the harvester.

INTRODUCING THE ROLLANT® 250 WITH MAXIMUM PRESSURE SYSTEM

• Hay or straw • Heavy duty, high capacity



FIXED CHAMBER ROUND BALER

- Dense 4' bales
- 83" wide pickup standard
- ROTO CUT® model available
- Double twine wrapping standard, ROLLATEX® net wrapping optional

CLAAS® Country
Meeting *all* your harvesting needs!

MPS

- Maximum pressure is achieved with the new hinged roller system

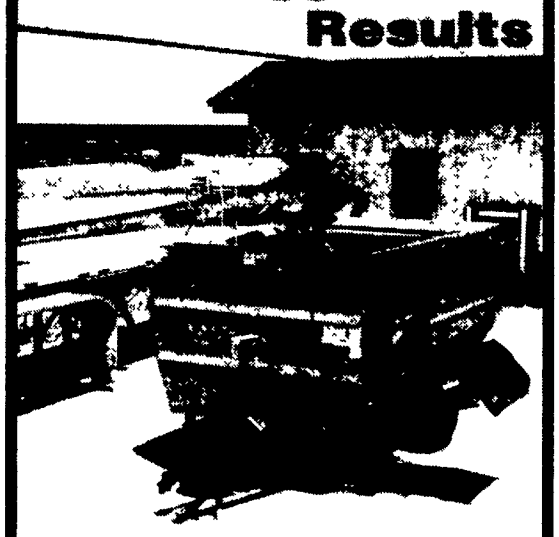
Reel Auggie = Results



The Reel Auggie Design provides a fluffy, more palatable ration that promotes feed consumption When your cows consume more high quality feed, they'll produce more milk.

MORE MILK IN THE TANK, THAT'S THE BOTTOM LINE!
To see results, ask for a Reel demonstration from your local Knight dealer today.

3000 SERIES REEL AUGGIE MIXER
TRUCK, TRAILER and STATIONARY MIXERS

GEHL

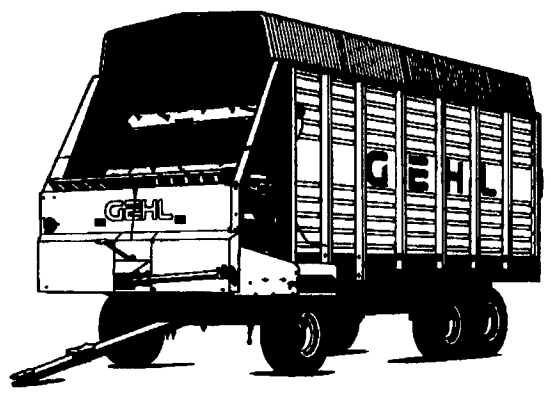
PROVEN PERFORMER

Scavenger® Spreader

Gehl's Scavenger® Spreader delivers the performance you need year after year, with increased durability and outstanding application control. All thanks to the following features.

- **Heavy-duty round core auger** with segmented paddles to blend manure. Powered both up and down to ram through heavy loads and break up bridging.
- **Special "V" tank design** to handle solid, heavy bedded, semi-solid, self-leveling and liquid manure.
- **Adjustable auger and expeller speeds** spread more types of manure
- **Variflow™ discharge** featuring square-tooth expeller paddles for smooth,e ven spreading at the rate you choose.
- **Improved drive system** with heavier final drive chains and enhanced idler system.

YOUR BEST FORAGE BOX VALUE



Gehl's new BU980 Self-unloading forage box has been redesigned for improved performance and durability. Features include:

- True variable-speed drive for infinite unloading speeds.
- Single lever control.
- Improved beater design.
- Stronger drive chain and reinforced roof.
- Standard highway light package.
- Optional folding 18-inch conveyor extension.

FREEDOM FINANCING

GEHL

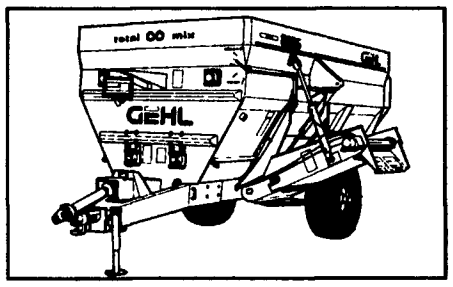
TMR "Total Mix Mixer Feeders

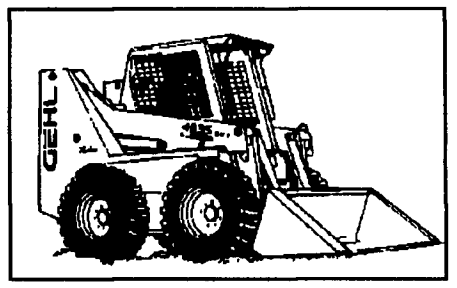


"Total Mix" TMR mixer feeders let you mix more long-stemmed hay into your ration - up to 30% by weight depending on hay type and moisture content.

- **"Hay - slicer auger"** Incorporates knife assemblies into the two bottom augers.
- **Better mixing auction** - Four-auger design creates a double figure - 8 mixing pattern for fast and complete mixing of all feed ingredients.
- **Five sizes** - 150 to 455 cubic feet capacities.

DEMO MODEL 8335 AVAILABLE - 340 BUSHEL

GEHL All New SL4635 & 4835



SL 4635
- Standard 44-HP Oil-Cooled Diesel (57-hp turbo-charged optional)
- SAE-Rated Lift Capacity of 1,425 Lbs. (counterweights increase lift to 1,575 lbs)
- 37-Inch Wheelbase

SL 4835
- Standard 57-HP Oil-Cooled Turbo Charged Diesel
- SAE-Rated Lift Capacity of 1,625 Lbs. (counterweights increase lift to 1,775 lbs.)
- 41-Inch Wheelbase

Highly maneuverable, extremely stable, and with increased lift and unsurpassed visibility, they get the job done in tight confines. Plus they offer built-in features for easy maintenance and user comfort.

New! PULL-TYPE Crop Processing Forage Harvester

Chop and process corn silage with one pass through the field High-speed grooved rolls crack kernels, break up the cob and smash the stalk. The results: 10 to 20 percent higher digestibility, higher milk production.
- **Huge harvesting capacity**
- **Eight-knife cutting cylinder**
- **Swing-away auger**
- **Removable roll assembly**
- **Adjustable processing roll gap**

2412 DISC CONDITIONER

Cut Your Fields Down to Size!

- **Nine disc cutterbar** delivers 11-foot 7-inch cut.
- **Wide conditioning rolls** for uniform, fast drying.
- **Full-width skid shoes** protect the cutterbar.
- **Simple drive system** for more reliability.
- **Easy change from windrow to swath.**

Announcing.. Open House 2000

We are holding our annual open house on February 10th and 11th. Everyone is invited to attend this event. Featured this year will be **10% cash discount specials** on all farm supply products and parts. We will also have a huge **truckload sale** on farm supplies as well as a **clearance item sale** at unbelievable prices. We will also be holding mini seminars each day by veterinary and state extension professionals. Topics will include mastitis causes and controls as well as milking system performance. Our recent parlor installations will be open these two days for self touring. You can see basement, herringbone, and parallel parlors from DeLaval, Universal and Germania.

Our feature this year will be the **introduction of the Universal robotic milker** to the US market. You will not want to miss this chance to be the first to view this machine and see the future of dairy farming. Our open house will be held at the Pleasant Hall Fire complex in Pleasant Hall, Pa. For directions and more complete information, please call us at 717-532-6139. Whether you are a local dairyman or an out of state one, this event is for you.

Claas Auctions 15,000th Jaguar On-Line

COLUMBUS, Ind. – Claas has marked the production of its 15,000th Jaguar Self-Propelled Forage Harvester.

This special edition Jaguar 880 features a unique airbrush paint finish, leather seats, and other special features highlighting this milestone in the company's history.

The machine, which will be on tour at major farm shows and events across North America, will be auctioned on the company's website. Bidders can log on to http://www.claasofamerica.com to place their bid or check on the current bidding price. The 15,000th Jaguar will be presented to the highest bidder at a major show in September of 2000.

Claas has more than two decades of experience in the design of self-propelled forage harvesters. In June 1972, the first prototype of the Jaguar was produced when a chopping unit from a trailed forager was installed into a very primitive chassis From those humble beginnings, the Jaguar family was born. The well-known forage harvesters are now available in four models, the Jaguar® 820, 840, 860 and 880 which can deliver up to 200 tons (corn) output per hour in the toughest field conditions.

Claas, the world's largest manufacturer of self-propelled forage harvesters, will be auctioning their 15,000th Jaguar Self-Propelled Forage Harvester on-line. To place a bid on this special edition harvester, log on to www.claasofamerica.com.

GVM Reorganizes, Expands Network

BIGLERVILLE (Adams Co.) — GVM Incorporated continues to consolidate its hold in the marketplace with new products, new distributorships, and new personnel.

"We here at GVM are committed to expanding our company so that we can serve our customers better," said Denny Stahl, the company's new vice president of operations. Service and customer support remain the number one priority at GVM.

GVM manufactures the powerful new "Prowler 2000," a year-round sprayer designed to drive effortlessly from field to road, at speeds up to 45 miles per hour. The GVM line also includes the HydraSpray F-550 and the Trans-Spread self-propelled as well as pull spreaders.

GVM is based in Biglerville, located near historic Gettysburg, with a second "GVM West" location in Bellevue, Ohio. The company employs about 85 people in Pennsylvania and Ohio.

GVM is expanding its national distribution, promoting key personnel, as well as adding new people to their winning team.

Denny Stahl has recently been promoted from national sales/marketing manager to vice president of operations for GVM, Inc. Denny, who has been with GVM for nine year, had owned his own company for 15 years, prior to his move to GVM.

Ed Maas has been promoted to the position of vice president of GVM West. He has been with GVM West as a partner since 1996 and manages the GVM West facility.

Mike Machek, who has been heading up the precision agriculture division of the GVM team, has been promoted to southern regional sales representative. His primary responsibilities will be to provide support in the expansion of the southern regional distributorship network.

In addition, Dennis Conrad has been promoted from controller to vice president of finance. Lee Money has moved up from territory sales to the position of sales manager for the wholegoods division of GVM, Inc. and GVM West.

GVM recently added to its sales staff two new sales representatives, including Don Swan, whose territory covers Illinois, and Jim Davis, who will be covering the states of Virginia, West Virginia, and North Carolina.

the Signature of FFA Success

Internet Business, Advertising Topics At Conference

COLUMBUS, Ohio – Internet marketing and e-commerce – the electronic exchange of money for products – are changing the way people do business, and direct farm marketers are in a good position to reap the benefits, said Nathan Watermeier, Ohio State University Extension technology specialist.

Direct marketers offer quality products often produced on family farms that fill a specific market niche and have a special appeal to many of today's consumers, Watermeier said. But the problem is many direct marketers are not taking advantage of the Internet because they do not know how to create a website, how to market their products on the Web or what to spend to get started.

"Even if direct marketers don't think they want to do Internet marketing or e-commerce, it's definitely something they should consider," he said. "If they're not selling a product over the Internet, they can at least advertise their business and try to get people out to their pumpkin farm or berry patch."

Watermeier will discuss advertising and doing business through the Internet during two technology sessions at the North American Farmers' Direct Marketing Conference held in Cincinnati, Feb. 10-12. The first session, "Marketing and Advertising Your Business through the Internet," will be on Friday, Feb. 11 from 1:30 p.m. to 3 p.m. The second session, "E-Commerce – Doing Business through the Internet," is scheduled for Saturday, Feb. 12, from 10:30 a.m. to noon.

Web advertising and business is rapidly expanding. According to eMarketer, an on-line resource for businesses interested in the Internet, United States Web advertising spending will grow from $3.1 billion this year to $4.8 billion in 2000 and $13.3 billion in 2003. The third most popular topic discussed during presidential debates is e-commerce, Watermeier said.

The benefit of Internet marketing and commerce is the ability to reach more people and increase sales, as long as it is advertised properly, he said. Plus, little to no additional labor help is needed, unless business really picks up, and creating a website could help direct marketers better organize their business.

"If you have 150 products scattered around in a small store on your farm, organizing them for an on-line catalog by category with prices and pictures gives you a quick, refined inventory," Watermeier said. "Anything that farm marketers can produce, package and ship is fair game for e-commerce, as long as it meets Federal Trade Commission regulations."

Frozen foods, a majority of fruits, and gift baskets that include packaged meats and cheeses, nuts, fruits and other products with a country feel are popular, especially during the Christmas season, he said.

It costs between $125 and $3,000 for a direct marketer to get started with a web page, with costs varying by location, Internet service provider, the extensiveness of the website and whether the direct marketer will create it or hire a professional help, Watermeier said.

During Watermeier's first session at the direct marketing conference, he will discuss creating and designing websites, the costs involved, their benefits for direct marketers, how they fit into a business plan, cooperating with other direct marketers to advertise each other's businesses on the Web, and who to contact for help creating a site.

"I was bombarded with requests following last year's session at the Ohio Direct Marketing Conference asking for recommendations on whom to call to help create websites," he said. "This year, I hope to have a list available of web development businesses who are reasonable and legitimate website creators. I'll also talk about what things you need to know before hiring somebody to help create a website, so you don't get ripped off."

Watermeier's second session will focus on the expenses of developing an e-commerce site, the basics and principles behind e-commerce, handling Internet transactions with credit cards, encrypting sites for security purposes, tracking hits and products sold with Web statistics, potential Internet taxes and other issues that could impact small businesses down the road, the Federal Trade Commission and the rules and regulations of international trade, and shipping and transportation issues.

"We'll look at and go over several commercial e-commerce pages during the session," he said. "I'll actually purchase something on-line to show people how Internet transactions work."

The North American Farmers' Direct Marketing Association Conference is in conjunction with the Ohio Fruit and Vegetable Growers' Congress at the Cincinnati Convention Center. The joint meeting will include 42 direct marketing workshops, 75 sessions focusing on crop production and management, and about 200 trade show exhibits.

For more detailed program and registration information, contact the Ohio Fruit and Vegetable Growers' Congress staff at (614) 249-2424.

MX Series Magnum Tractors Improve Comfort, Productivity

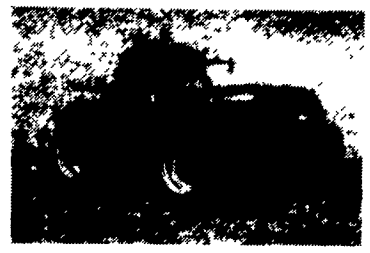
RACINE, Wis. – Case IH has announced new productivity-enhancing features for its MX Series Magnum™ tractors.

Farmers can select a Surveyor™ Luxury cab option, a factory-installed front three-point hitch, as well as new tire options to better meet the needs of their operations.

A 160-gallon fuel tank is also available for the MX 180, MX 200, and MX 220 models to extend continuous operation to more than 20 hours without refueling.

"These tractors were designed with input from more than 1,200 customers worldwide to meet their power, performance, and productivity needs," said Mitch Kaiser, Case IH manager of product development. "With the new options, producers can further customize their MX Series Magnum tractors to meet their on-farm demands."

The Surveyor cab, already the quietest and most spacious cab in its class, now offers options to further improve operator environment and efficiency. Customers can choose a new luxury cab option featuring a heated, red leather Optima™ seat for maximum comfort. The luxury cab also includes a dark tinted rear window to reduce glare and heat from the sun; additional sound absorption material; a carpeted floor mat; and a leather-wrapped steering wheel, armrest, and throttle. A deluxe radio and six disc CD changer is also available with the luxury cab package.



Growers can customize their Case IH MX Series Magnum tractors with new productivity-enhancing features. New options for model year 2000 include a luxury cab, a front mounted three-point hitch, new tire choices, and high capacity fuel tank.

Creating a comfortable and practical cab environment was a top priority Kaiser points out.

All new cabs feature a combination wheat color interior, replacing the previous gray combination. A new door frame design, featuring no top cross bar assembly, improves visibility. The deluxe and luxury cab packages also include standard Auto Temperature Control that automatically maintains the cab temperature at the operator-selected level.

Case IH engineers created an industry exclusive - a factory-installed, front-mounted three-point hitch to further extend the versatility of MX Series Magnum MFD models. The close coupling of the hitch increases transport stability, improves visibility when used with front mounted implements, and reduces swaying of front implements with steering corrections.

"With the availability of the new front hitch, farmers will be able to increase the versatility of their MX Series Magnum tractors," Kaiser noted. "The front hitch can be used for sprayers, row crop cultivators, chemical tanks, and ballast weights. Plus, it only needs one cylinder and one remote valve to operate."

Producers also can choose from a number of new factory-installed tire options from Michelin, Firestone, and Goodyear to match their cropping practices.

New York Farm Show Beats Winter Blahs

SYRACUSE, N.Y.–One of the larger Northeast indoor farm shows will brighten up the lingering days of winter.

The New York Farm Show is scheduled Feb. 24-26, Thursday through Saturday, at the state fairgrounds in Syracuse, and offers more than 215,000 square feet of exhibits.

More than 400 companies and manufacturers display the newest equipment,supplies, technology, inputs, and services. Farmers can tour five buildings at the fairgrounds, meet with company representatives, and comparison shop.

"Farmers who want to keep up on the latest piece of equipment, tillage management, or whatever their operation needs can find it at the New York Farm Show," said Scott Grigor, New York Farm Show manager.

Discover software packages to use for financial and production records, advantages of yield monitors and global positioning, and advancements in corn hybrids and crop protestants.

Dairy farmers can check out the latest developments in parlor designs, and crop farmers can explore tillage options, including zone tillage.

Rounding out the farm show will be several highlights, including antique tractor displays, farm toys, and a farm toy auction. Proceeds from the popular auction, Friday, Feb. 25 at 6 p.m. in the Empire Room of the Arts and Homes Center, benefit the FFA Alumni Scholarship Fund and New York FFA.

New York Farm Show is sponspored by the Northeast Equipment Dealers Association and American Agriculturist Magazine. Tickets are available free from New York state farm equipment dealers or by writing New York Farm Show, P.O. Box 3470, Syracuse, NY 13220. Include a self-addressed, stamped legal envelope with your request.

Landscaping Mini-Conference

WESTMINSTER, Md.–The Carroll County Cooperative Extension and the Carroll County Master Gardeners have announced the third annual Landscaping Mini-Conference, from 8:30 a.m.–3:45 p.m. on Saturday, March 4.

The conference is designed to help homeowners with basic gardening and landscape management. The mini-conference will begin with a one-hour presentation entitled "Beautiful Underused Landscape Plants" by landscape designer and horticulturist Brian Lewis of Snell's Nursery. The rest of the day will be divided up into four one-hour sessions where participants can choose from a wide variety of classes.

Topics for the breakout sessions are deer management, ground covers, garden design, color and theme gardens, winter interest, waterwise gardening, native perennials, color and drama with fabulous foliage, great perennials, the joy of daylilies, organic vegetables, building soil, lawn care, planting ornamentals, pretty annuals, herb gardening, and butterflies in your garden.

All classes are taught by Carroll County Master Gardeners. The cost for the program is $12 per person with a discounted rate of $18 for two members of one household and will be at the Carroll County Cooperative Extension in Westminster An optional boxed lunch from Maggie's Restaurant is available for an additional $6.75.

Participation is limited, so call early. Participants must register in advance. Registration closes Feb. 25. Registration materials can be obtained by calling Lisa Spence on Mondays or Thursdays at the extension office, (410) 386-2760.

Winter Horticulture Classes

The Carroll County Cooperative Extension office announces the winter 2000 horticulture program schedule:

•Feb. 17, 7-9 p.m., growing orchids, $5. The Carroll County Cooperative Extension will host noted orchid expert Dr. Michael Baretti for an informal presentation on growing and caring for orchids. Bring along your orchids for advice and diagnosis Preregistration required. This class will be at the cooperative extension office

•Feb. 19, 9-11 a.m., pruning fruit trees, $10. Extension educator Bryan Butler will lead a hands-on workshop in pruning apples at a local apple orchard. Participants will prune trees in teams. Pruning peaches will also be addressed. Preregistration required.

For questions or registration materials, call Lisa Spence on Mondays or Thursdays at (410) 386-2760 or stop by your local Carroll County library and pick up a brochure in the community programs section. Limited space available Registration closes Feb. 15 or when spaces are filled

DASHING THROUGH THE SNOW.

The storm will pass. And thankfully, so will a Kubota snowblower. Try our snowblower attached to a Kubota B-Series or L-Series tractor for a snow removal team that's hard to beat.

They are a cinch to operate using the tractor's 3-point hitch as a hydraulic lifting system. Clear snow from driveways, roads or parking lots. Break up and clear heavy drifts. A special heavy-duty rear-mount snowblower is a recent addition to Kubota's B- and L-Series line-up

So before the forecast calls for snow, make a dash to your Kubota dealer.

Kubota.

Penn State Offers Program On Dairy Production Medicine

UNIVERSITY PARK (Centre Co.) — Veterinarians whose practice centers on food animals can find new techniques and skills to better serve the rapidly changing dairy industry in the eastern United States by attending the Dairy Production Medicine Certificate Program, co-sponsored by Penn State's College of Agricultural Sciences and the University of Pennsylvania School of Veterinary Medicine.

"Dairy operations in Pennsylvania and the Northeast are increasing herd size, yet concentrating the animals on fewer farms," said David Wolfgang, Penn State senior research associate in veterinary science. "That means veterinarians should learn new skills to transform their practice from the traditional focus on individual animal care to a more holistic approach that focuses on collective production and performance — a 'herd's-eye' view."

The production medicine course, which starts March 9, comprises 10 three-day workshops spaced over 2 ½ years. Practitioners will receive intensive instruction on such topics as dairy nutrition, milk quality and safety, reproductive performance, herd expansion, environmental stewardship, and impact of facilities on animal health and welfare.

Wolfgang estimates there are 800 veterinarians in Pennsylvania who include large food animals in some part of their practice. Within that number, there are about 250 veterinarians whose primary practice focuses on food animals.

In addition to intensive classroom instruction, the program uses a single case farm where each participating veterinarian can see methods for dairy production medicine applied in real-world situations.

"The farm will be fairly close to the University Park campus, but it must be large enough to give the class a variety of experiences in production medicine," Wolfgang said. "Serving as a case farm is a real benefit for the producer, since the farm will have between 20 and 30 consultants working collectively to improve herd health and performance."

The class starting in 2000 will be the fourth class since Penn State started the program in 1991. Wolfgang said the current enrollment includes veterinarians from Maryland, Mississippi, Vermont, and Pennsylvania.

A new area of instruction is included in the program, Wolfgang said. Instructors from The Smeal College of Business Administration will educate practitioners to better utilize their new skills, make effective presentations and work with clients.

"The trend nationally is moving to larger dairy farms with bigger herds," Wolfgang said. "Even traditional family farms will have to become more efficient to stay in the game. The Dairy Production Medicine Program will allow vets to help farmers become more efficient by moving away from just fixing broken cows to preventing the breakdown in the first place."

The program is open to 25 participants. Registration deadline is Feb. 1. For registration and tuition information, contact Brenda Dinges, 115 Henning Building, University Park, PA 16802.

Farm Meeting On Profit Set

ALLENTOWN (Berks Co.) — The year 2000 might go down in history as the most traumatic year for many farmers, particularly those who have not put much emphasis on marketing.

When will farm prices start back up? More importantly, how can you profit from price moves? These and other questions will be addressed by the "Decisions 2000" seminar, February 1 at the Days Inn and Conference Center on Route 309 outside Allentown, Pennsylvania.

"Decisions 200" will be providing effective marketing advice for all innovative producers. The two featured speakers are known the world over for their agricultural marketing insight. Richard Brock of Brock Associates from Milwaukee, Wisconsin publishes "The Brock Report" and "Pork Profit Edge" in addition to writing for Farm Futures magazine and running a commodity marketing advisory service. Professor Lou Moore has over 40 years experience with educational programs for livestock and grain farmers in Pennsylvania.

Richard Brock is the top ag commodity adviser in the United States over the past three years. This is measured by the University of Illinois as they track the major ag advisory services for "return for advice given."

Did you hold your 1998 crops into the summer of 1999 only to sell them for $1 per bushel less? Richard Brock advised, "Coming off the biggest bull market in history, I was prepared for the biggest bear market in history. I knew the laws of economics had not been repealed; High priced corn would lead to over production worldwide at the same time demand was dampened." Compared to the season's averages, Richard's clients received $.72 more for corn, $.68 more for wheat and $1.14 more for their soybeans!

Because of the financial difference in incomes, grain production will consolidate over the next few years just as pork production has consolidated over the last 5 - 8 years. Management of farm businesses is going to take more time and concentration with specialized talents. Agriculture is rapidly becoming more specialized in the areas of financial management, agronomics, animal science and commodity marketing.

I'm not sure I've seen a more exciting time in agriculture. It's exciting to watch the success of many producers over the past two years and yet disappointing watching those who have struggled. The difference has been great and we will continue in that trend.

The Lehigh Valley Grain Marketing Club, DeKalb, Monsanto, Keystone Farm Credit and Penn State Cooperative Extension are sponsoring this educational seminar to get producers started into a prosperous new millennium.

Kyle Henninger, president of the Lehigh Valley Grain Marketing Club says, "This is truly a provocative group of people. It helps stimulate your mind and get you out of the potential ruts we all can get into. I hope you plan to attend this excellent seminar."

Contact John Berry, agricultural marketing agent at 610-391-9840 or jwb15@psu.edu for additional information.

Yorktowne Spinners Top 2000 Sheep-To-Shawl Contest Creation Sells For $1,050

HARRISBURG (Dauphin Co.) – With Kathy Schweiker, wife of Lt. Gov.. Mark Schweiker, the Small Arena of the 84th Pennsylvania State Farm Show was alive Monday evening with the sounds of sheep and shears at the 2000 Sheep to Shawl Competition.

When it was over, the Yorktowne Spinners of York County had spun their way to victory, followed by the Penn-Wheels of Bucks County, and the Butler County Peddlers, taking third place for its creation.

Immediately following the contest the shawls were auctioned with the first place shawl selling for $1,050, the second place shawl for $375, and the third place creation for $275. The Yorktowne Spinners donated 50 percent of the proceeds to the York County 4-H.

In finishing first, the Yorktowne Spinners captured the "Weaver's Award" for creativity of design, use of color, and skill. The Canyon Country Spinners of Tioga County took both the "Shearer's Award" and the "Spinning Award." The PA Mohair and Cashmere Growers' Association of Cumberland County took the "Fleece Award," and Penn-Wheels of Bucks County took the "Team's Choice Award," as voted by the other teams competing in the contest.

Creating a shawl is an intricate process. Each team is composed of a shearer, a weaver, and three spinners who compete to craft a quality homemade shawl from start to finish. Three judges evaluate and score the teams on the basis of shearing, spinning, design of the shawl, weaving, speed and team identification.

The shearing portion of the competition is judged for speed, lack of small nicks to the wool, lack of cuts to the sheep, uniformity, and shearing. The spinning portion is evaluated based on the individual spinning of the members and how it relates to the design of the shawl. They are also judged for fleece preparation, which may be done by all team members.

The team is then scored on the design and appearance of their finished shawl. Judges look for originality in design, difficulty of the weave, color coordination between the warp and weft, softness and drapeability and the execution of the finished fringe.

Judges look for evenness and check for errors in the completed shawl, which must measure 22 inches wide and 78 inches in length

Finally, teams are evaluated on speed and awarded a bonus for finishing their shawl first Speed coupled with quality is the goal of all teams Teams are encouraged to create a theme that makes their team unique and makes it easy for the audience to recognize all of the members of one team They are judged for originality of theme and their overall appearance

In order to participate in this contest, the team members must be Pennsylvania residents and have competed or exhibited at two events prior to the State Farm Show.

The purpose of the Sheep to Shawl Contest is to promote public awareness of the contributions made by the sheep and wool industry to Pennsylvania agriculture and to provide an opportunity for craftspeople in the state to showcase their skills. Originally established as the northeastern regional competition, the Sheep to Shawl Contest has been held annually at the Farm Show, drawing up to 5,000 spectators.

The competition is sponsored by the Pennsylvania Sheep and Wool Growers' Association and is supported by the Pennsylvania Department of Agriculture and the Pennsylvania State Farm Show Commission.

Chairperson of the competition is Karen Varner of Hershey, Dauphin County. Don Hunter of Butler County, Betsy Dillon of Hockessin, Del., Susan Coughlin of Dauphin County, and William Leinbach of Berks County served as judges for the competition.

During the competition, members of the audience were invited to try their hand at carding, spinning, and weaving. Stu and Keri Lynn Huggens, a father-daughter duo, performed country music, tempered by folk and kicked by rock.

The following teams competed in the 2000 Pennsylvania State Farm Show Sheep to Shawl Contest:

• Penn-Wheels (Bucks County)
Spinner: Elizabeth Barnes
Spinner: Marlene Halstead
Spinner: Janet Lapsley
Weaver; Wendy Chavin
Shearer: Royal Unziger

• Yorktowne Spinners (York County)
Spinner: Greta Dise
Spinner: Chris Erickson
Spinner: Leslie Orndorff
Weaver: Marge Erickson
Shearer: Nathan Good

• Butler County Peddlers (Butler County)
Spinner: Susan Dyer
Spinner: Linda Gross
Spinner: Marilyn Maerbach
Weaver: Wini Labrecque
Shearer: Dean Sherwin

• The High Whorlers (Lycoming County)
Spinner: Phylleri Ball
Spinner: Joy McCracken
Spinner: Judy Read
Weaver: Mary Ginter
Shearer: Ralph Lovell

• Canyon Country Spinners (Tioga County)
Spinner: Kathleen England
Spinner: Ava Keller
Spinner: Louise Painter
Weaver: Carol Kahabka
Shearer: Tom Horton

• Pennsylvania Mohair and Cashmere Growers' Association (Cumberland County)
Spinner: Terry Kunst
Spinner: Binnie Roig
Spinner: Jody Sheffer
Weaver: Barb Fessler
Shearer: Ken Snyder

Maine Anjou Exhibitors Continue Their Success At Farm Show

HARRISBURG (Dauphin Co.) — For the second consecutive year, the Maine-Anjou Association held its own open show during the Pennsylvania State Farm Show.

The grand champion and reserve champion female were exhibited by Donald Walter of Walter Cattle Company. Donald is from Airville, York County. Jamie, the grand champion, is an early spring yearling. She placed first in her age class at last year's Farm Show competition. This was the first show for the reserve champion, Sweet Thing, a late spring yearling.

The grand champion bull of the Maine-Anjou Breed was Mid-State Woodsman. Woodsman is owned by Bob Mikesell and Mee-Cee Baker of Port Royal, Juniata County.

The Pennsylvania Maine-Anjou Association was formed in 1997. The association then petitioned officials of the Pennsylvania Farm Show to allow members to show at the 1998 Pennsylvania Farm Show. Although no show was held in 1998, members were permitted to place four head of Maine-Anjou cattle on exhibit. Through this display, the association was able to develop a greater interest in the breed. In 1999 members were granted permission to have their own open show for the Maine-Anjou breed.

The Maine-Anjou breed is noted for its carcass traits, feed efficiency, and mild manner. The breed originated in France and was originally red and white in color. Today, purebred Maine-Anjou cattle are black and some have white markings.

Minimize Stress, Prevent Injury In Handling, Transport

MIDDLETOWN (Dauphin Co.)–You've paid attention and invested some well-spent time and effort in the bull calves marketed from your dairy farm, and in the process, adopted practices which will also benefit the health and performance of the heifer calves you keep for replacements.

Now it's time to focus on the conditions under which your bull calves are transported and marketed to minimize stress and prevent injury, which detracts from their market value.

First of all, make sure the calf is ready to be marketed. It should be able to walk without assistance before boarding the truck for sale. If the calf is already weak, it may not survive the trip. If it does survive, it will be worth very little. Poor condition and injury result in financial losses, and they create a negative public perception of the dairy and veal industries.

Evaluate transportation and marketing by observing, asking questions, and giving instructions to caretakers handling your livestock. Do not tolerate abuse. Be there when the calf is picked up. Visit the facility where it's being sold. Are the calves handled and restrained with a minimum of stress to the animal? Are younger, smaller animals, such as calves, separated from older, larger animals? Are animals grouped and gated to limit the area of movement and the risk that they will injure themselves?

Is the truck or holding pen overcrowded? Are there obvious signs of agitation or aggression? Will the calves you've taken care of properly be commingled with calves in poor health that have not been well cared for? If the trip is long, will the driver stop and check on the animals, and how often?

Loading and unloading is stressful to livestock. A properly designed loading area and the use of proper techniques will minimize the stress. According to animal behavior specialist and design engineer Temple Grandin, minimizing the number of changes in direction that the animal must take will help. Ramps should not exceed at 25 degree angle, and non-slip flooring should be provided so livestock have confident footing.

Cattle have poor depth perception, particularly in enclosed, narrow areas such as chutes and alleys. Remove some of the stress by avoiding sharp contrasts in lighting, and shadows that startle them, causing them to balk and bunch up. Uniform lighting, color, texture, and curved pathways are safer and have a calming effect that keeps the animals in the group moving more confidently. Curved designs also limit the potential for injury from protruding corners.

Calves should be walked or lifted properly, never thrown, pulled, dragged, or caught by the neck, tail, or legs. Moving calves from one area to another on the farm, in transit, or at the sale, can be frustrating at times, but patience pays. Use of force should be calm and firm.

Transportation should be comfortable and safe. Clean, dry, enclosed, well-ventilated, but draft-free conditions should be provided. Be prepared for the weather. Give them shade, and provide evaporative cooling in hot weather. In cold weather, provide shelter from the wind and insulative bedding material. If using wood shavings as a bedding base, cover with another material so that calves do not ingest the wood shavings.

Before sending the calf to market, make sure the calf has had good access to plenty of water to avoid dehydration during transportation and marketing. Penn State University researchers conducted a study recently on the impact of sports drinks in reducing transportation stress and shrinkage. The study demonstrated the benefits of what some producers have been doing for years to help get their young animals through the rigors of transportation and relocation. Adding electrolyte enhancing drinks such as Gatorade or AllSport to the water reduces the amount of weight loss and the effects of stress during transportation-particularly in extreme temperatures.

For more information about the veal quality assurance program and dairy calf management, contact (717) 985-9125 or write American Veal Association, 1500 Fulling Mill Rd., Middletown, PA 17057.

Conservancy's Annual Appeal Major Success

LANCASTER (Lancaster Co.)–When The Lancaster County Conservancy launched its 1999 Annual Appeal: Building Our Living Legacy, the organization's director of advancement, Barry L. Spangler, stated that The Conservancy was considerably raising the bar for itself by increasing its goal amount 40 percent to $75,000.

When The Conservancy reached its goal within six weeks, Spangler's doubts were eliminated and he began to think that this year's appeal might indeed do very well. The Conservancy's appeal came to a close at year's end, and to everyone's amazement The Conservancy had received $189,229.65.

The $75,000 goal had been exceeded by an astonishing $114,229.65. The most remarkable fact was that The Conservancy had to date received all but $910 of commitments made.

The Conservancy's Executive Director, John W. Symonds, said, "The Conservancy began its annual appeal five years ago," and the private, nonprofit land preservation group, "has always set challenging goals for itself."

Spangler underscored Symonds by adding, "in 1997, our appeal goal was $48,000 and we exceeded that goal by $10,500."

Symonds commented that 1999 had been an exceptional year for The Conservancy.

"Our first membership drive increased our rolls by 40 percent; we now protect over 1,700 acres of some of Lancaster County's most beautiful natural open space land, and the results of the appeal have been gratifying to everyone involved."

Spangler announced that while the greatest growth in donations occurred amongst individual donors, The Conservancy had been able to increase contributions from all major constituencies.

The annual phonathon raised $7,600. A garden party to honor the 1999 recipient of The Conservancy's Conservation Partnership Award, Mrs. Caroline Nunan, our first ever golf tournament, and our annual bird seed sale all won new friends for The Conservancy.

The organization has spent several years trying to forge partnerships with disparate groups.

"I believe there is large and diverse support for the organization's mission of preserving the dwindling amount of natural open space land remaining in Lancaster County," Spangler observed. "Our ongoing task is to increase public awareness of the organization and its mission."

Everlast is stronger.

Everlast makes metal roofs and sides that are **substantially stronger than it's competition.** Everlast II does not buckle as easy during erection, less popping and buckling while walking on it. Higher wind and snow loads. More attractive.

Everlast Roofing, Inc., 239 N. 5th Ave., Lebanon, PA 17046,

HOW BIG A COOLER DO I REALLY NEED?
Depends on a lot of things. But one thing's certain. Mueller makes the milk cooler that's right for your operation. And it's built to last. So it'll have high resale value the day you need a bigger cooler. For help deciding how big a milk cooler you need, contact your local Mueller dealer.

Attention
Dairy, Swine & Poultry Producers!
New Products Now Available...

With the addition of our new soybean processing facility, we now offer these products to meet your nutritional needs Manufacturing these products ourselves allows us to utilize locally grown soybeans and support our local agricultural community!

GOLDEN PRO 46 XP
This natural, mechanically extruded and expelled soybean product is experiencing great acceptance with local dairymen. A course golden colored meal with a 6% fat content, Golden Pro 46 XP is extremely palatable. Golden Pro 46 XP is a natural way to bring the value of high by-pass protein into diets that require a lower fat level

GOLDEN MEAL 40
An 18 percent fat content along with a 40 percent crude protein makes this mechanically extruded meal product a valuable component in a variety of rations Full fat content gives you a high level of digestible energy, while high temperature extruding ruptures the oil cells for better nutritional absorbtions

CRUDE SOYBEAN OIL
A product of Keystone's expelling process, this oil can be used in a wide variety of on farm applications. A natural alternative to animal fats, this oil provides needed energy in various rations

To make these products available, and to help you utilize your home raised soybeans Keystone Mills announces its

Soybean Exchange Program

As manufacturers and distributers of Golden Pro 46 XP and Golden Meal 40, we are anxious for you to try our products. We are offering a soybean exchange program featuring these quality nutritional products.

SWEETCAKE 16NU

FEED SUPPLEMENT BLOCKS FOR THE LIVESTOCK INDUSTRY

• High Natural Protein • No Urea • Fat Enhanced
• Balanced Supplementation • Safe For All Livestock Classes

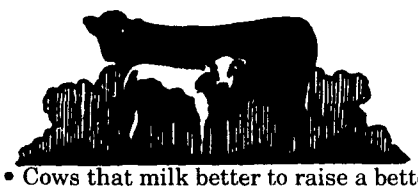
Sweetcake Advantages

- Aids in making the best use of your available forage
- Promotes a more even herd consumption, with 24-hour availability to all cattle
- Reduces labor to save you money and give you more time to make important management decisions
- Supplies much-needed vitamins and minerals that forage lacks to help your cattle perform to their genetic potential
- Supplies fat in most formulations to enhance energy intake

For Dairy

- Replacement heifers that grow out soundly and economically
- Body condition on dry cows so they can return to lactation, producing at the maximum potential
- Healthier herds, with essential trace minerals that help prevent metritis, retained placenta and other health problems
- Prompt re-breeding, thanks to essential nutrients

For Beef



- Stronger, healthier calves at birth
- Heavier Calves at weaning
- Cows that cycle better for improved conception rates
- Cows that milk better to raise a better calf

- AVAILABLE IN 200 LB. SIZE -

RECEIVER HITCH BY DMI

The Latest In-Tow-Vation!

Cushioned 2" Receiver Hitch

- Fits under your truck bumper, mounting directly to your truck frame
- Brings the receiver to your load – extends 7" and swings 12"
- Exclusive Proximity Hook-up – one person gets it right the first time
- Spring "Cush n" takes the push/pull out of towing, lowering stress on the driver and truck drive train
- Tows whatever your truck is rated to tow - exceeds Class IV certification
- Accepts a variety of adapters drawbar, ball, step-up or step-down, pintle hook and weight distribution system

Never Miss a Hitch Again. DMI

CORN TALK

PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

Corn Talk, Lancaster Farming, Saturday, January 29, 2000

Despite Dry Weather, Webster's Corn Posts High Yields

A dry year translated into an early harvest for Ansel Webster. All the corn was taken off the first week of October with average yield of 177.3 tons per acre (dry basis). He credits "Mother Nature and the Lord" for his achieving high corn yields in a drought year. ***Photo by Carolyn Moyer***

CAROLYN N. MOYER
Tioga Co. Correspondent

TIOGA (Tioga Co.) — "I've never reached 1,000 tons before," said Ansel Webster. He credits "Mother Nature and the Lord" for his achieving high corn yields in a year when many farmers watched their crop wither away in the drought of 1999.

His average yield was 5.49 tons per acre. On a dry matter basis, that translates to 177.3 dry shell bushels per acre.

This year on the whole 185 acres, "I had 1,015.17 tons of high moisture corn," said Webster. "I was top dog last year for the county. I don't know where I am this year."

The highest yield he usually has is around four tons per acre.

"We must have had some really heavy dews along that river and enough rain when we needed it," said Webster, who plants a 95-day corn on his sandy loam soil.

"We can get by with 100-day corn, but if you go over that, you're really pushing it as far as high moisture shell corn. Of course for silage, you don't have to worry about it as much. That can vary quite a bit."

Because of the dry weather, corn dry down was faster than usual.

"We started combining the first part of October, which is really two weeks earlier than we generally do, so this year has been an exceptional year. We were all done this year by the time we generally start," said Webster.

Webster's corn is custom combined, placed right on trucks and moved to the farm which has purchased it. All of Webster's corn is harvested for

Corn, Soybean Conference Feb. 8

Dennis Avery

CAMP HILL (Cumberland Co.) — Dennis Avery, director of global food issues at the Hudson Institute, is scheduled to be the keynote speaker at the upcoming Pennsylvania Corn and Soybean conference Feb. 8 here at the Radisson Penn Harris Convention Center.

Avery's topic will be "The Crucial Moment for American Agriculture."

Avery believes that producers are looking at one of the biggest opportunities in farming history. Mark your calendar

(Turn to Page 2)

Insect and disease management school participants look over samples of plant disease. See story page 8. ***Photo by Andy Andrews***

Conference Feb. 8

(Continued from Page 1)

and plan to attend.

Another featured speaker on the program this year is Gene Lewis from the United Soybean Board. Lewis is a Hardinsburg, Ind. soybean and corn farmer who will be making two presentations: one on "Ag Perspectives For 2000" and another on "New Uses Development and the Soybean Board."

The conference will also feature Gene Gantz, a crop insurance consultant, with a session on the upcoming significant changes in crop insurance and how they will affect Pennsylvania grain farmers. Gene has considerable experience working with midwest producers using crop insurance as part of financing and grain marketing programs.

The conference will also review the potential of lightbars for sprayer guidance. This is a precision ag application that some corn producers think has a real fit in Pennsylvania. The program will also feature panel of grain merchants who will share some of their thoughts on the current GMO situation.

The conference will also feature numerous industry exhibits, Five-Acre Corn Club awards, and the Pennsylvania Soybean Contest results. The event is sponsored by the Pennsylvania Soybean Promotion Board, the Pennsylvania Master Corn Growers Association, and Penn State.

Registration is $20, which includes lunch. For more information on attending or exhibiting at the conference, contact the Penn State Agronomy Department at (814) 865-2543.

CARGILL FULLTIME forage

Want to increase your cows' milk production and give them a healthier diet without taking a huge bite out of your wallet? We've found a way, with Cargill FullTime Forage. The key? Higher cell-wall digestibility and crude protein levels for your cows, great prices for you!

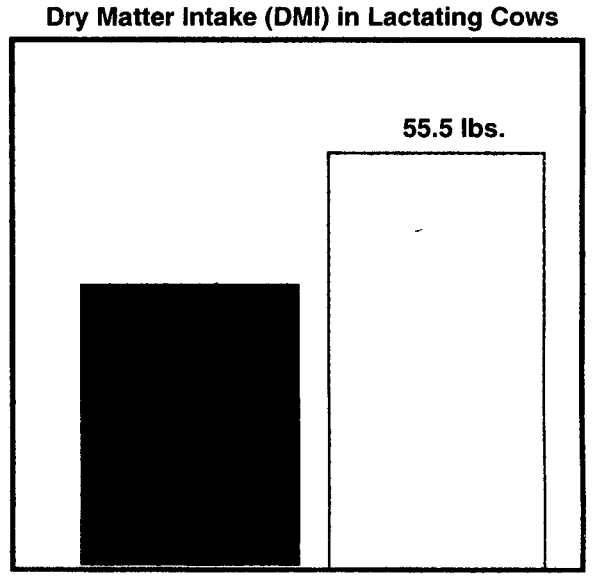
Milk it for all it's worth! You want to get the most out of your business. Consider this: Research shows that for cows, a high forage diet is healthier than a high grain diet and can lead to significant increases in milk production. More milk means more money in the bank.

A range of studies has shown the dramatic increase in milk production with Cargill FullTime forage. In a one study conducted at Michigan State University, cows fed FullTime forage as part of a high forage ration, on average, consumed 6% more dry matter, resulting in 7.2 more pounds of milk per cow per day.

With FullTime forage you get high fiber digestibility, low lignin, improved dry matter intake and better cow performance from a rumen-friendly diet.

FULLTIME forage

Another major study has conformed it. You can see increased milk production with Cargill FullTime Forage. In a 1999 USDA study in Beltsville Maryland, cows whose diet included Cargill FullTime Forage (vs normal corn silage) consumed 11% more dry matter and increased milk production by 6.9 pounds per cow per day. This agrees with a Michigan State University study which demonstrated at 6% increase in dry matter intake, and increase of 7.2 more pounds of milk per cow per day.



Dry Matter Intake (DMI) in Lactating Cows
55.5 lbs.

Despite Dry Weather, Webster's Corn Posts High Yields

(Continued from Page 1)

high moisture corn. In recent years, he's noted that it can be difficult to market the product and that many other farmers in the valley who have retired from their dairy operations are now growing corn for sale.

"I've found with the dairymen being squeezed so much on trying to make a living, it's bothering some to find a market for our high moisture corn," Webster noted.

He now has a steady market for the corn from a local dairy farmer. Any extra is marketed on the open market.

In the past, Webster has also been a member of the 5-acre-corn club and won the top award in 1989 with Pioneer hybrid 3751.

"I used to stick to an old variety they had for years, but it was a slow dry-down corn. I got away from that because I sell for high moisture corn. That way we can get in the fields and harvest quicker before we get into bad weather."

He said, "Pioneer wanted me to try out this corn borer resistant variety and I was planting the other variety of Pioneer along with 3751. Then Dave Potter of Agway contacted me and wanted me to try some DeKalb. I wished I'd tried more, I guess," he said.

"I always thought I wanted to try the Roundup ready corn, but we have so much trouble with Japanese bamboo and the only thing I've found that will touch it is Banvel. That won't kill it, but it will knock it back enough that the corn can get above it and you can still get a pretty good yield," explained Webster. "Whoever invents a weed control that can get rid of that bamboo will get rich quick, I think, because it's all up and down the river."

Webster has been farming for most of his life. He grew up on a dairy farm in the Mansfield area. He farmed himself during high school before having a two-year stint in the army, working for the electric company and trying out a factory job. Webster then decided that farming was the profession he wanted to pursue.

"I went in with my father on our dairy farm, and we were partners for quite a while. Then we got a chance to swap the farm in Mansfield for this farm down by the river, and I certainly haven't been sorry for it," said Webster.

The Websters milked about 50 cows at the new farm for many years before selling off the milking animals and concentrating on raising replacement heifers. When he saw what kind of crops he could get on the river bottom, he decided to just stick to crop farming.

Today Webster has sold some of his property, although he holds the farming rights for five years. He will also lose some land to the Rt. 15 expansion. He now raises corn and hay on about 640 acres.

Over the years, he has witnessed many changes in farming.

"There's better weed control," explained Webster. "and I have a computerized corn planter. That is really handy. You know whether you're planting or if you're not and it will tell you the population in each row. It's quite an improvement over the old 2-row corn planter."

Webster can fine-tune the planting rate with his computerized corn planter.

Webster tries to do most of the work himself, although he does admit that the computer in the corn planter baffles him a bit.

"With the new tractors one man can do a lot of work. I generally do all the work myself except for planting the corn. I never have got to learn the computerized corn planter," said the 74-year-old Webster. "I have a nephew who knows computers pretty well. He generally does my corn planting. This year I had a girl who is interested in farming do my corn planting and my son finished up."

With the help of others, Webster has learned more and more about the corn planter every year.

"I might have to do it myself," said Webster. "My son generally takes a week of his vacation to help me plant, but he has to ask for a week so far in advance. We don't know what the weather will be. It might rain all week."

Webster's other son lives in California. He and his wife also had three daughters, one of whom is deceased.

With land close to the river, one might expect to have water in their fields from flooding, but the location of Webster's farm couldn't be better.

"They built some dams after 1975. And the difference farming here is like daylight and dark. Before they put the dams in, we spent almost as much time cleaning off flood trash as we did working the ground. Now we don't have any of that. They let the water out bank full — only what the river will take. It might take a week or two to get the dam back down to the right level, but we don't have the flooding. We feel real fortunate!" said Webster.

Ansel Webster reviews the performance report from Pioneer. His fields included a new corn borer resistant variety as well as another variety of Pioneer Corn. He also planted some varieties of DeKalb.

NCGA Expresses Profound Disappointment At WTO Breakdown

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

WASHINGTON, D.C.–The nation's corn farmers are profoundly disappointed by the breakdown of the World Trade Organization (WTO) talks in Seattle recently. Nevertheless, they are heartened by indications from U.S. officials that negotiations on agriculture could resume soon.

"American farmers were among those who had the most to gain going into these talks, and we have a great deal to lose if the WTO fails to make progress towards further liberalization of global trade in food and agricultural products," said National Corn Growers Association (NCGA) President Lynn Jensen, a South Dakota farmer who headed a delegation of NCGA leaders to Seattle.

"Significant progress was made in Seattle in terms of developing a substantive agenda for future agriculture talks," Jensen noted. "In fact, from what we understand, agriculture was as close to being done as any of the working groups."

Jensen expressed hope that WTO members will capitalize on this progress and move quickly to jump-start the stalled agriculture negotiations.

"We export approximately 20 percent of the U.S. corn crop, and additional corn as value-added products," Jensen said. "We have the capacity to export much more, but trade barriers and competitors' export subsidies prevent the U.S. corn industry from realizing the full potential of our comparative advantage in corn production.

"Thus, NCGA will continue to press for a trade agenda that includes elimination of export subsidies, tariff reductions, and further reductions in trade-distorting domestic support programs," he said.

"This week's setback makes the choice very clear. If the WTO can make significant progress on these objectives, it will enhance global food security and create real opportunities for U.S. farm exports.

"But, if the wave of protectionism sweeping the globe is allowed to proceed unchecked, not only will farmers lose, but so will the world's consumers who depend on abundant, safe, and affordable food."

Proven First in Soybeans. Now in Corn

As the first genetically enhanced seed available on the market, Roundup Ready® crops continue to make their mark with the growers of America. First with soybeans, now with corn, Roundup Ready has consistently led the way, to bring the most effective options to growers everywhere.

In fact, after only two years on the market, Roundup Ready corn has already proven to be a leader in performance — over 94% of surveyed growers in 1998 said Roundup Ready corn has met or exceeded their expectations.

Plant Roundup Ready corn for performance you can trust.

Roundup Ready. CORN

ALWAYS READ AND FOLLOW LABEL DIRECTIONS. Roundup Ultra®/Roundup® will kill plants that do not contain the Roundup Ready® gene. Regulatory approval of grain harvested from seed of Roundup Ready corn is pending in certain export markets and may not be received before the end of 2000. As a result, growers may be restricted from introducing the grain into channels of trade where the potential for export to such markets exist. In such cases, growers must channel such grain for feeding on farm, use in domestic feed lots or other uses in domestic markets only. Growers should refer to Monsanto's Technology Use Guide for information on crop stewardship to avoid the potential movement of pollen to neighboring crops. For assistance in locating domestic outlets for corn grain, view the ASTA web site at www.amseed org or contact Monsanto at 1-800-768-6387. Roundup Ready® is a trademark of Monsanto Company

In 2001, Bt Corn Technology Will Provide Rootworm Control At Root Zone

ANDY ANDREWS
Lancaster Farming Staff

LANDISVILLE (Lancaster Co.) — Beginning in 2001, about 1 percent of the corn acreage in the U.S. will be comprised of Bt corn that fights corn rootworm where it matters most — at the roots.

The Bt variety, marketed under unspecified variety names by a major seed producer, will be another transgenic corn tool to fight destructive crop pests. But producers need to keep in mind that transgenic corn coming out may not protect against black cutworm and other pests, according to Dennis Calvin, Penn State entomologist.

Calvin spoke to about two dozen crop management experts and industry representatives in mid-December at the first of a Penn State-sponsored two-day Capitol Region Crop Insect and Disease Management School at the Penn State Extension Southeast Regional Laboratory near Landisville.

If corn producers are to use the new Bt varieties, it's possible they'll need other insect-type controls using standard chemical treatments or in combination with an overall industry approved integrated pest management (IPM) program.

Today's varieties of Bt corn do not control black cutworm and provide little control of stalk borer, fall armyworm, or corn earworm.

The new corn rootworm Bt "stacked" varieties, noted Calvin, would be expressed at the larvae stage of the corn rootworm.

Penn State tested a variety of corn rootworm Bt this past year. Unfortunately the drought wiped out the rootworm population, though "what we did have looked good," said Calvin. The control was the same as other standard soil insecticide programs, though using the Bt type controls could push costs slightly higher. It's not clear yet what the premium costs could be. More work is necessary, he noted, at the Penn State Rockspring research farm and at a private farm where testing is under way.

Calvin and other crop management experts provided an introduction to the philosophy of pest management through IPM at the school.

The use of Bt corn as part of a program has raised some concerns over the Monarch butterfly controversy. Lab studies indicated that it is possible the pollen from Bt corn can kill Monarch butterflies, and industry and academia has been under heavy criticism from the public.

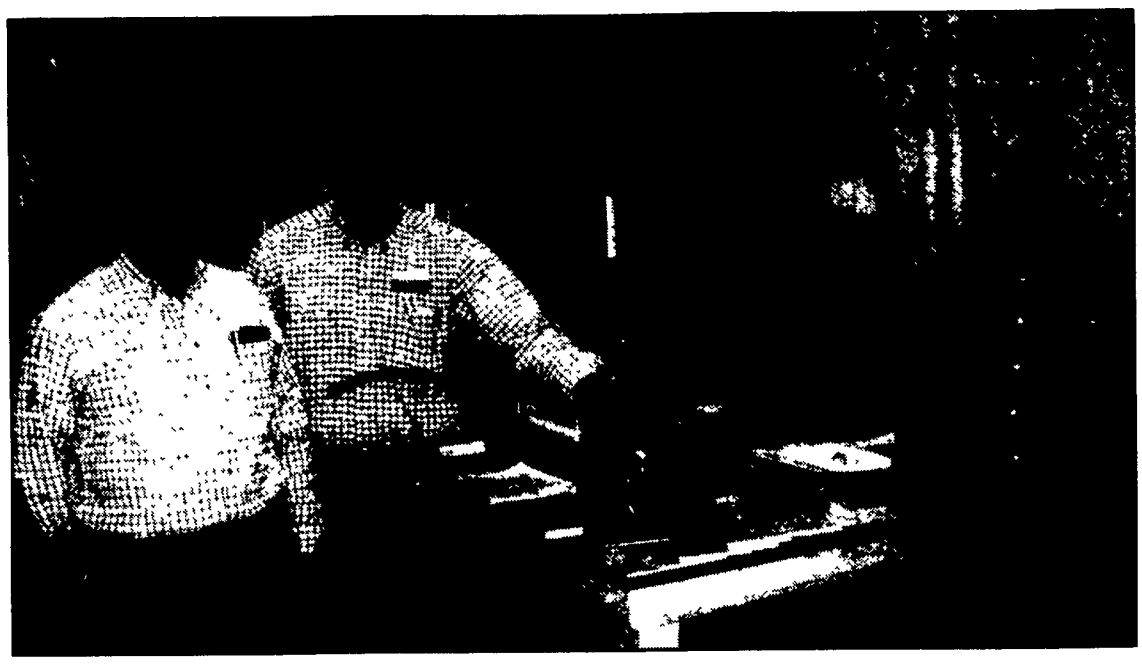
Calvin said he spent time at two conferences this fall, including two days in Chicago, reviewing the Bt and Monarch butterfly controversy. Apparently, the Bt 176 type can have a 10-fold expression in the corn pollen, yet only 1-2 percent of the Bt corn planted uses this type. The Bt 176 type only expresses up to eight yards from the edge of a field. More field studies of the effects of the Bt corn on the butterflies may be needed.

Favorite pollen-feeding plant species for the Monarchs are milkweed and dogbane. In Iowa and Illinois, milkweed grows on the roadways. A milkweed variety in Kansas, Blue Vine, is a really good host for the butteries.

Much of the information about the potential toxicity of Bt to the butterflies has been "taken out of context to stir something up," Calvin noted. But the controversy has allowed the industry to step back and reexamine other, more "holistic" ways, friendly to the environment, to control pests.

Calvin referred to the programs outlined in the Penn State-issued Field Crop IPM Guide, available for $75 from the Capitol Region Extension Agronomy Team. More detail about the program is available by contacting Del Voight at the Lebanon extension office at (717) 270-4391.

For now, growers have embraced the Bt corn, which uses a natural biological control embedded in corn genes, to control the European corn borer. The industry has "made a lot of strides in the genetic method of pest management," said Calvin. But with those advances have come new strategies to ensure its long-term effectiveness and viability.



Several crop insect and disease management experts spoke to about two dozen crop management experts and industry representatives in mid-December at the first of a Penn State-sponsored two-day Capitol Region Crop Insect and Disease Management School at the Penn State Extension Southeast Regional Laboratory near Landisville. From left, looking over a predator beetle model, John Ayers, Del Voight, and Dennis Calvin.

IPM emphasizes taking a look at the crop grown, the rotation, the cultural practices, the soil and environment types, consistent scouting, and understanding effective timing and application of pesticides. Producers must look at the economics of the use of different technologies to see if they'll be useful.

Finding that "economic threshold," Calvin noted, is key. The issue is, "when do I treat to get the most effective control?" Fact is, the economic thresholds are "not based on as much science as we think," Calvin noted.

For example, for the corn leaf aphid, the threshold is 25 aphids per foot of row in the fall, or 100 aphids per foot of row in the spring.

To find those thresholds, a computer spreadsheet program was shown at the school.

In the past, to control the corn borer, no economic treatments were available in the region. Only a small percentage of growers could justify using standard treatments. But with Bt corn, the borer became an economic concern, now that technology has arisen to treat it, according to Calvin.

"This changed the economics of managing the pest, because we have a tool that does a much better job," noted the Penn State entomologist. Bt corn offers almost complete control of the pest under good growing conditions.

Calvin noted several resources for producers. If there is one book that offers a complete index of information from identification to insect biology, he recommended the reference, "Handbook of Corn Insects," available from the Entomological Society of America (Landham, Md., 1999, 174 pp., $35, ISBN 0-938522-76-0, 301-731-4535). For corn reference, if there was one book to identify insect pests, "this would be it," he said.

For soybeans, Calvin recommended the "Handbook of Soybean Pest Insects," available from the society (1994, 142 pp., $25, ISBN 0-938522-29-9).

Penn State has its own IPM Website at www.fra.cas.psu.edu/

Calvin also recommends the "Penn State Agronomy Guide," also available on the Web at http://agguide.agronomy.psu.edu/

Del Voight, crop team member and Lebanon extension agent, and John Ayers, Penn State plant pathologist, reviewed ways to diagnose dis-

PENNSYLVANIA MASTER CORN GROWERS ASSOCIATION

Between The Rows

Dr. Greg Roth
Penn State Agronomy Associate Professor

SIDELINE VIEW OF THE GMO DEBATE

The debate over the potential for GMO (genetically modified organism) corn continues in the national media, but here in Pennsylvania we seem to be mostly on the sidelines on this issue.

I see our position similar to that of a backup quarterback in a football game: while all of the action taking place now only has an indirect effect on us, we better pay attention because we could be in the game quickly.

Generally our corn markets, which are mainly poultry and livestock feed, have not sent any signals to producers regarding a market for non-GMO corn. As a result, most producers in our area seem to be continuing to purchase GMO corn and soybean seeds.

Let's just review a few of the issues surrounding the national debate over GMOs.

One of the largest issues is food safety. Are the products from GMO derived foods as safe as those from non-GMO crops? Approved GMO products have undergone a comprehensive review by the FDA on this issue and they have concluded that the food and feeds produced from these crops are no different than from normal corn. This is based on an analysis of the composition of the grain, the properties of the introduced compounds, and feeding trials that have been conducted on animals.

Nevertheless, some are questioning the thoroughness of the FDA approval process. Opponents of the technology are suggesting that the FDA should ban the use of GMO crops in foods until long-term testing can be completed or at least label products that contain GMO crops.

The FDA has had a long-standing policy on labeling stating that they "will require labeling if the composition differs significantly from its conventional counterpart." Up to this point the FDA has not endorsed labeling. Since such a wide range of products contain corn, and since much of the corn supply in the U.S. contains some GMOs, many consumer food products on the market contain GMO corn. A decision to label GMO foods by the FDA would mean that that the food industry would either need to label many products or begin to secure large supplies of non-GMO corn.

In the last several weeks, Midwest corn processors have been sending letters to corn producers that typically supply them. In these letters, the companies note that while they support the use of biotechnology, they are concerned about the market signals requiring non-GMO corn. They go on to suggest that producers should plan on segregating GMO and non-GMO corn next fall.

The issue of segregation causes lots of headaches for Midwest corn producers. One of the first issues is how they can be sure their crop is GMO-free. Testing procedures are being developed that should be cost effective, quick, and relatively accurate for next fall's harvest. Possible sources of contamination include cross pollination from an adjacent GMO crop, GMO seed in a non-GMO hybrid, or incomplete cleanout from combines, elevators, trucks or grain bins.

The next issue would be acceptable tolerance levels — would it be any detection, 1 percent, 2 percent or 5 percent GMO in a shipment of grain? Now, it's not clear.

Liability is a concern as well. If a mistake is made along the way in the grain production or delivery process, who is liable for the contamination?

Another area of frustration with producers is whether non-GMO corn will command a premium. The marketplace will likely determine this. If it does command a premium, then some corn users may be reluctant to make a switch to non-GMO.

Another issue with the GMO crops is their impact on the environment. Will they cause resistance in target species and increased mortality of non-target species? Most scientists agree that there is potential for corn borer resistance to Bt corn but it is remote.

A resistance management program that consists of not planting 20 percent of our corn acres to Bt corn has been adopted by the seed industry and the National Corn Growers Association. This would allow any resistant insects a greater possibility of mating with susceptible insects, thereby producing susceptible offspring that could be controlled with Bt corn the next year. Otherwise a resistant corn borer might be forced to mate with another resistant corn borer, and this would increase the likelihood of a resistant population developing. Consequently, it's important to pay attention to refuge requirements of Bt corn.

The issue of increased mortality of non-target insects came to light earlier this year when an article was published in Nature, a prestigious British journal, that showed that Bt corn pollen was toxic to the larva of the Monarch butterfly. This started quite a controversy early in the summer. Numerous entomologists around the country began to look at the issue. In November they met and shared their findings with the press.

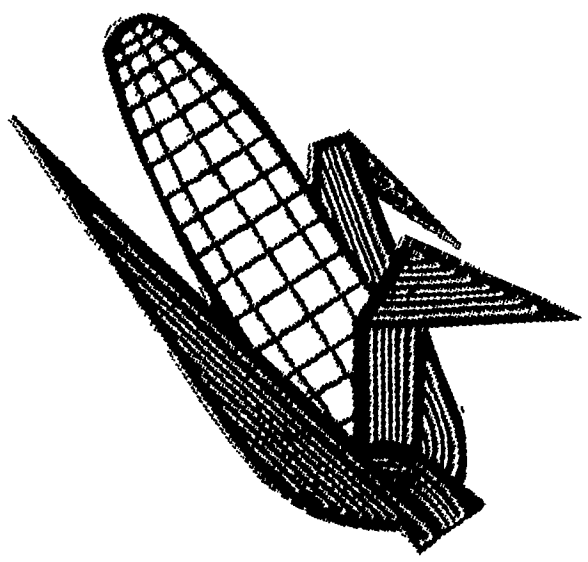
According to Dr. Dennis Calvin, Penn State's extension entomologist, a few of the conference conclusions were that 1. Bt corn pollen does have some toxicity to Monarch larvae; 2. toxic levels of corn pollen do not occur far from corn fields; and 3. it is likely the Bt corn pollen is not a significant mortality factor to Monarch butterfly larva. Thus the Monarch issue was probably overblown in the press but there do appear to be some effects of the pollen on off-target organisms.

There are many other issues in the GMO debate. With the large overhead needed to develop these crops, the genetics of farm seeds are concentrated in the hands of a few companies. Is this good or bad? If we ban GMOs or make it difficult to produce and market them, are we sacrificing what could be one of the greatest agricultural innovations of all time? Who will fund the application of GMO technologies for self-pollinated crops such as rice and wheat in the less developed countries?

All of these are legitimate questions and each of us has to develop our own position on these issues. In some ways this debate is not that much different that others that have occurred with the introduction of other new technologies: television, nuclear power, the Internet — to name a few.

Take time to research and monitor this topic as it unfolds. Visit my webpage for more links to other sources of information: http://www.agronomy.psu.edu/Extension/CornManagement/CornManagement.htm

Keep informed. That way you'll be ready if we get called in the game.



In 2001, Bt Corn Technology

(Continued from Page 8)

eases and pests to come up with effective management methods. Voight demonstrated how using a digital camera, a picture of a disease or insect can be taken. The picture can be downloaded into a computer and transmitted by e-mail using a commercially available word processor to plant entomologists or pathologists quickly at Penn State. The technology can expedite information about a pest or disease from the grower, to Penn State experts, and those experts can provide recommendations directly back to the grower.

Recommendations about treating can then come directly from Penn State specialists.

NCGA Elects New Board Leaders

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

ST. LOUIS, Mo. – The National Corn Growers Association (NCGA) has elected a new slate of corn growers to lead the organization into the next century. Elections were conducted during the recent National Corn Congress Aug. 5-6 in Washington, D.C.

Moving to the helm as NCGA President is Lynn Jensen, who with his wife Jodi grows corn, soybeans, edibles, and alfalfa in Lake Preston, S.D. A farmer for 19 years, Jensen has been active in his state and national corn growers associations for more than seven years. As an NCGA Corn Board member, he served as a liaison to the Customer and Business Development Action Team.

Leland Klein, who with his wife Sharon raises corn, soybeans, rye, alfalfa and hay in Battle Creek, Neb., was ratified by Corn Congress as president-elect. Klein, who also manages a cow/calf operation, has held many leadership positions at various state and local organizations, and most recently served on NCGA's Corn Board.

Roger Pine of Lawrence, Kan., moves from president of NCGA to chairman of the board. Pine and his wife, Sue, grow corn, soybeans and sod in Lawrence. An active member of his state and national organizations for 14 years, Pine previously served as president. At the state level, he has served as president and vice president of the Kansas Corn Growers Association.

Newly elected corn growers to the NCGA Corn Board are:

• Greg Guenther, Belleville, Ill. - Guenther and his wife Nancy grow corn and soybeans on their farm in Belleville. He has served as president of the St. Clair Service Company for eight years and as director of the St. Clair County Fair Bureau for nine years. On the state level, he has served as field services, market development and legislative chairman for the Illinois Corn Growers Association. He is involved in several local and state organizations, and has served as St. Mark Lutheran Church president and vice president.

• Bill Horan, Rockwell City, Iowa - Bill and Pamela grow corn and soybeans in Rockwell City. Bill has served for eight years as a board member and president of the Iowa Corn Growers Association. At the national level, he has spent seven years as an NCGA board member and is a member of NCGA's Public Policy Action Team. Horan is also a board member of the U.S. Grains Council, representing the Iowa Farm Bureau. He was selected by Iowa's governor and is serving on that state's Value-Added Growth Foundation. Horan served in the U.S. Marine Corps and is a Vietnam veteran.

• Richard Peterson, Mountain Lake, Minn. - Richard and Kathy Peterson own a farming operation where he and his brother Eugene raise corn, soybeans, hogs, and sheep. Peterson has served NCGA and the Minnesota Corn Growers Association in many leadership positions. He was field services chairman when NCGA membership reached a record 30,000 members. In addition, he is a member of the American and Minnesota soybean growers associations, the Minnesota Pork Producers, Minnesota Farmers Union, and Minnesota Farm Bureau.

• Kyle Phillips, Knoxville, Iowa - Phillips, his wife Sue, and his father grow corn and soybeans in Knoxville. He recently ventured into special crop production by planting an identity preserved specific corn hybrids and a white corn for human consumption. Phillips is president of the Iowa Corn Growers Association and serves on the Marion County Farm Bureau Board.

• Fred Yoder, Plain City, Ohio - Fred and Debbie Yoder grow corn, soybeans, and wheat in Plaine City, where they also operate a retail seed business. Yoder also handles farm machinery sales with a local dealer. Yoder serves as president of the Ohio Corn Growers Association and has also served as vice president and has been an NCGA delegate for several years. He most recently served on the NCGA Production and Stewardship Action Team.

On The Mark, Get Set, Grow!

The 6100 Series Rigid And Vertical Fold Planters.

Precision farming starts with precision seed placement. And that's exactly what you'll get with the White 6100 Series planters. Our pull-type planters feature an exclusive air-metering system that's designed to singulate every seed. Its low air pressure, edge-drop seed discs and short, 18" seed drop ensure precise seed placement for maximum germination.

Adaptable To Any Tillage Situation.
Our 4, 6, 8 and 12 row planters have the flexibility to meet most tillage practices both now and in the future. They're built rugged with a massive 7" x 7" frame and strong, welded-tongue design to handle the demands of heavy residue. Add a 6900 splitter attachment for interplant capability.

This season get the planter that places each seed where it'll grow the best — and perform the best. Stop by your AGCO® White Planter dealer today.

PMCGA, Seed Industry Offer Member Sign-Up Program

STATE COLLEGE (Centre CO.)–Consider joining NCGA and PMCGA today to be part of a national effort to promote corn and corn producer-related issues.

With our Membership Incentive Program (MIP), corn producers who grove five or more acres of corn can now join both organizations with little real cost.

The MIP program works like this:

If you sign up for a three-year joint membership for $75, you can receive a free bag of seed from one of our participating industry partners listed on the form. To get signed up, complete your membership form and send it in to our office at the address listed on the form along with a check for $75 made payable to PMCGA to cover the three-year membership.

Our office will then send your name to the seed company you have selected and a coupon to you indicating you have qualified for the program. You will then be contacted by one of the seed company reps and your seed will be delivered before the planting season.

This is a win-win-win proposition–you get a bag of seed and membership in a large national organization for $75, NCGA and PMCGA get your support, and the seed industry gets to showcase new genetics to key producers.

As a member of NCGA, you will be part of a 30,000-member national organization that is addressing many of the issues we face in the industry. Current issues include corn prices, industry consolidation, environmental issues, and development of new markets for corn.

NCGA also sponsors the National Corn Yield Contest and Commodity Classic. They also send a quarterly newsletter to all members, entitled the National Corn Grower. PMCGA sponsors one or two conferences a year, the Five-Acre Corn Club, *Corn Talk,* and helps to promote corn issues to the public at many local events.

If you are a corn producer who grows at least five acres of corn, consider joining for three years today and taking advantage of the MIP program. Use the MIP program to look at some new hybrids that some of our seed company partners have available this year. Remember, membership in the Pennsylvania Master Corn Growers Association (PMCGA) automatically makes you a member in the National Corn Growers Association (NCGA).

Low Prices Mean Ethanol Is Great Opportunity

Fred Stemme
Director Of Communications
Missouri Corn Growers Association (MCGA)

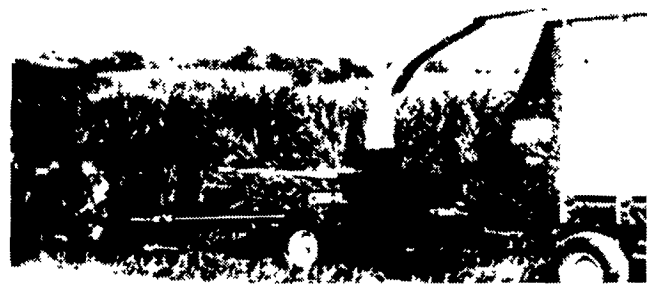
"It's going to take something major to get us out of the current price slump," said Gary Marshall, MCGA CEO. "With a 2 billion bushel surplus, we are probably facing another tough year in 2000."

According to Marshall, "We didn't get here overnight. It took four years of record world corn production to bring us to this point. The Asian flu, of course, didn't help anything, but for the most part exports are up. In fact, we are expecting final numbers for 1999 to say that it was the largest demand year for corn yet.

"So, what does that mean? Essentially, we need something major to move the market. A major drought is something that certainly no one likes to hope for, unless if we could export that problem to our neighbors in the southern hemisphere. So we're left with the question of what else could cause a major increase in demand?

"Ethanol is the obvious answer. A state or federal program which would provide additional production incentives or use requirements is the obvious answer to give our prices the most immediate bump. That's why we'll be asking state and federal lawmakers to give every consideration to this option."

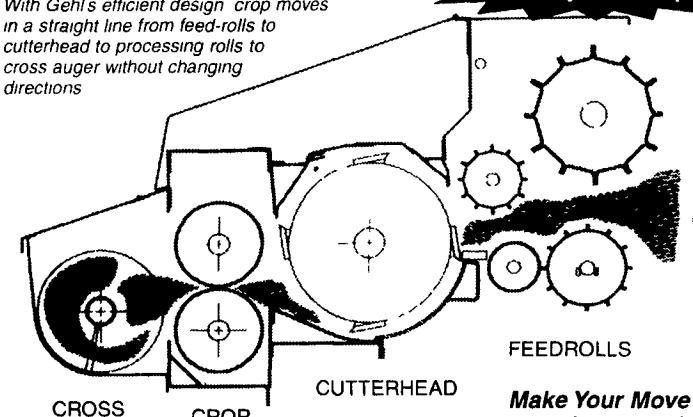
Now Is The Time To Make Your Move To Binkley & Hurst With Quality Gehl Machines That Last & Last!



In Stock Now! The New Kernel Cracking Crop Processor Gehl Forage Harvester. The new medium size Gehl 1075 Forage Harvester with high speed crop processing roller mill that can be opened up for haylage wihtout removal of unit

In Stock! Ready To Chop

With Gehl's efficient design crop moves in a straight line from feed-rolls to cutterhead to processing rolls to cross auger without changing directions



Make Your Move Now For 0% Interest Financing

Located directly behind the cutterhead cylinder, the Crop Processor features a pair of high-speed grooved rolls that crack kernels, break up the cob and shred the stalk material

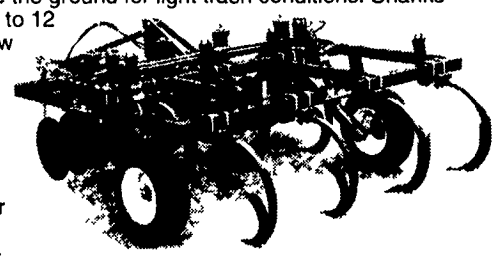
For Better Seed Beds – Better Stands

A Brillion Soil Management Tool

SELF LEVELING

Brillion's Soil Builder feature coulter gangs that cut up stalks and crop residue or rise above the ground for light trash conditions. Shanks penetrate the soil up to 12 inches to shatter plow pan to improve root growth increase water-holding capacity Most of the crop residue is left on the surface to combat wind & water erosion.

6'3" Soil Builder in Stock



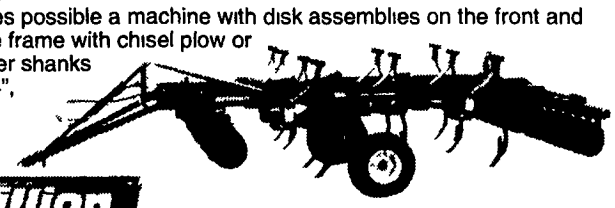
Brillion

Brillion Commander System

The Brillion Soil Commander, best in the field for soil conservation efficiency.

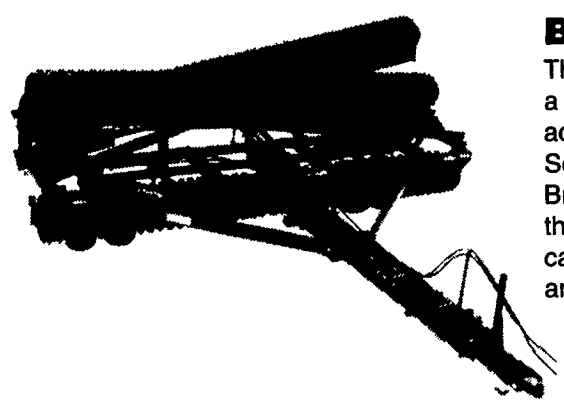
The Soil Commander is a versatile tillage tool designed to meet the needs of the mid-size farmer who uses a 135-200 H.P. tractor. One of the keys to the machine's versatility is that it uses interchangeable shank legs and individually mounted disk assemblies instead of a disk gang.

This makes possible a machine with disk assemblies on the front and rear of the frame with chisel plow or deep-ripper shanks on 15", 24", 27" or 30" spacings.



Brillion

COMMANDER SYSTEM



BRILLION PULVERIZERS

The pulverizer has long been one of the farmer's most valuable tools. When pulled behind a disc or field cultivator the pulverizer will help create an ideal seedbed with fewer trips across the field.

Some of the most valuable soil nutrients are locked in the clods left in your field. The Brillion Pulverizer crushes clods to release those nutrients for use by growing plants. At the same time air pockets are eliminated and moisture is drawn up the root zone by capillary action. Good soil to seed contact creates more uniform germination, pollination and maturity... and that means increased crop yield and greater profits.

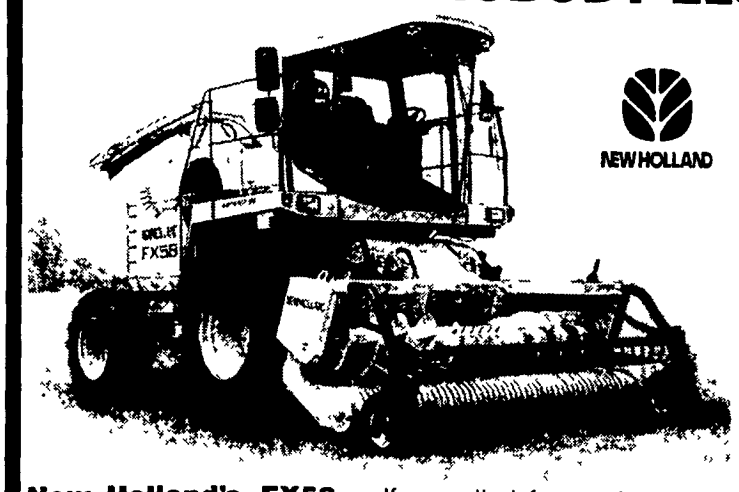
MESSICK'S KNOWS HARVESTERS
LIKE NOBODY ELSE!



NEW HOLLAND

We stock and sell the most harvesting equipment and parts in the East!

All backed by experienced, fully equipped service department with on-the-road service.

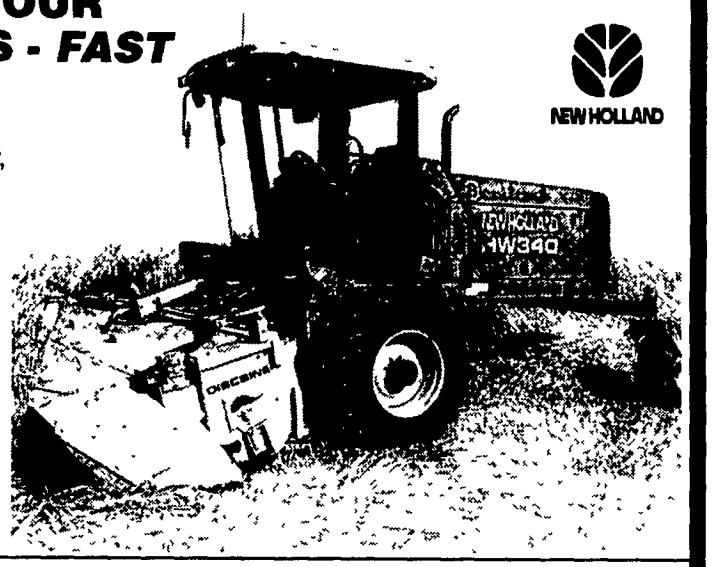
From metal detectors to hyd-transmission to gearboxes etc. - We fix 'em right the first time!

Hundreds of harvesters in the fields with high customer satisfaction.

New Holland's FX58 self-propelled forage harvester dominates all other choppers.

- Reliable 525-hp Caterpillar engine with electronic governor keeps you going through the tough spots.
- Massive 30-inch cutterhead has 8 new, beveled and reversible knives.
- Heavy-duty Length of Cut (LOC) gearbox is built for high capacity.
- Optional crop processor makes high-quality feed.
- Metalert® III stops tramp metal contamination.

KNOCK DOWN YOUR BIGGEST FIELDS - *FAST*
NH HW 340



NEW HOLLAND

For speed, high-volume capacity, top-quality cutting, and all-day comfort, nothing beats the New Holland Model HW340.

- 166-hp turbocharged Genesis™ engine provides plenty of power to knock down your biggest fields fast
- Makes fast work of even the toughest fields – 12-disc modular cutterbar makes a wide 15½-foot cut.

Ask us for a demonstration today!

NEW BIG BALERS ARE BUILT TO LAST

The New BB940 and BB960 are designed for big capacity – year after year. These features make sure you get the job done right.

NEW HOLLAND

- InfoView™ baler control system.
- New Holland precompression system.
- Extra-wide pickups.
- Roller bale chute folds up hydraulically.
- Optional Bale-Slice™ Crop Cutting System.
- Easy maintenance.

MAXIMUM PRODUCTIVITY - LM 430

Looking for a tough, versatile farm hand that can tackle just about any job? Then you should look at the new LM430 telehandler from New Holland. This machine is built to lift, carry, dig, load, stack . and just about anything else you can think of.

Department of Energy Awards Project

ST. LOUIS, Mo. — The National Corn Growers Association (NCGA) recently announced that corn growers' checkoff investments in research have paid off with a Department of Energy grant totaling $889,632 for the development of new uses for this country's number one crop - corn.

This grant, made through DOE's Renewable Resources Vision 2020, is for a three-year program of process development and commercialization of polyols, value-added chemicals made from corn.

The current polyols market would require 250 million bushels of corn to supply the total domestic demand for these valuable polyol compounds: ethylene glycol (antifreeze); propylene glycol (aircraft deicing fluid); and glycerol (ingredients for personal care products and prepared foods). The next generation of these catalysts to make other chemicals, beyond polyols, could increase the demand for corn three or four fold, perhaps as much as an additional billion bushels, in the next 10 years.

"This research represents substantial - and very real-commercial value for all corn growers." said NCGA Corn Board member Bob Boeding of Lawler, Iowa. "And it is made possible by their check-off investments."

The DOE grant will enable NCGA and its partners, the pacific Northwest National Laboratory of Richland, Wash., and Michigan State University, East Lansing, Mich., to develop research resulting in corn-based commodity chemicals that are highly valuable and commercially competitive without the need for government subsidies.

Boeding noted that this is "the very kind of public/private partnership that NCGA referred to in our comments made at the recent executive order signing by President Clinton on bio-fuels and bio energy." In those comments, NCGA President Roger Pine said that more partnerships among agriculture, industry and government are needed in order to meet the challenge of creating security for the United States in the 21st Century.

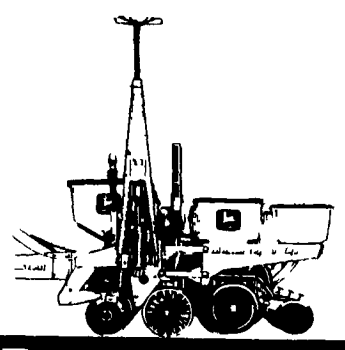
"NCGA corn growers have been steadfast in gaining this kind of recognition for the research process they have developed," Boeding said. "It reflects on state Corn Grower and NCGA efforts to leverage growers' checkoff dollar investments."

The DOE grant is a "matching funds grant," meaning corn growers must match this amount with a minimum equal amount of funds and in-kind efforts.

"It is the intent of NCGA to develop corn grower ownership potential in this (polyols) commercialization project and to be benefit from the investment for years to come," Boeding said. "This success can only be realized if corn growers continue to shape their destiny by investing checkoff funds in projects which expand and build potential markets for corn."

Corn Planter Units Service Special

Next spring you'll have corn planting confidence if you have your planter units computer tested now!!
Finger Pick up or Vacuum units: Computer print out on each row.



$10 per row unit tested
$15 per row unit cleaned and inspected
Good until March 1, 2000
All parts & labor required to bring units into specifications are extra.

Soil Tests Document Phosphorus, Crop Needs

NORCROSS, Ga.–A crop's growth requirement for phosphorus and/or potassium does not change with the crop's market price or its level of worldwide supply.

Such marketing factors can change rapidly. They are seldom within our control and most often at the mercy of weather conditions or the demand for food and feed in other regions of the world. Thus, a commitment to planting a crop becomes a commitment to providing the essential ingredients for high yield crop production. One such ingredient is an adequate and balanced crop nutrition program.

Soil testing provides valuable decision making information essential for good nutrient management. Specifically, it gives the best possible measure of the level of acidity and a prediction of availability of essential nutrients such as potassium and phosphorus. Equally valuable is the measure of change in fertility level over time by comparing soil test values from the same field year after year. A vital component of high yield production is to maintain a highly productive and fertile soil.

A recent summary of soil test results for agronomic crops on a state by state basis indicates that 26 to 75 percent of the soils in the Southeast are inadequate in phosphorus and 23 to 74 percent inadequate in potassium for optimum crop production. The survey evaluated 1.8 million soil samples collected across the U.S. in the fall of 1996 and spring of 1997 and analyzed by private and university labs. Surveys are no substitute for quality sampling on a site-specific field by field basis. Yet, this survey clearly reveals that phosphorus and potassium are limiting factors in too many fields and that soil testing is an essential tool for nutrient management planning and the determination of crop fertilizer needs.

Some believe that soil testing is utilized more in high management cropping systems, and that the survey values might not adequately measure the sector of untested, low fertility, low-yield fields.

What information of value might be derived from such a summary? Consider the following observations about the southeastern U.S. as they relate to phosphorus and potassium nutrient management for optimum crop production, profitability and protection of the environment.

•More than one-third of the fields sampled are in need of lime. This practice is essential for optimum nutrient availability and use efficiency by crops.

•Phosphorus shortage is most striking in Georgia and Alabama and less of a problem in the poultry/livestock states of Delaware and North Carolina. Concerns with phosphorus and the environmental must be considered. However, equally important to farmers is the need to; (1) supply adequate phosphorus to responsive soils to achieve target crop production goals; (2) improve nitrogen use effectiveness; and (3) generate soil protecting crop residues.

•Potassium fertility seems to be lowest where high potassium-requiring agronomic crops are grown–mostly on low exchange capacity, coastal plain soils. The small nutrient reservoir with such soils favors best management practices such as multiple application of nitrogen, potassium, and other nutrients subject to leaching.

•The large percentage of medium to low testing soils suggests significant loss in yield and income potential throughout the region. Such soils provide little opportunity for farmers to benefit from an exceptional growing season, or from stress protection offered by good plant nutrition, or from improvements in technology and/or interacting production practices.

For more information, contact Dr. Noble R. Usherwood, Southeast Director, PPI, 233 Kenilworth Circle, Stone Mountain, GA 30083, (404) 294-0137, e-mail: usherwood-@ppi-far.org.

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

Pro Farmer, NCGA To Host Marketing Clinics After Commodity Classic

ST. LOUIS, Mo.–The National Corn Growers Association (NCGA) has announced unique Pro Farmer marketing opportunities for those attending the Commodity Classic March 5-7 in Orlando, Fla. The two organizations will conduct two first-of-their-kind marketing clinics March 7-8 to help growers improve their bottom lines. The clinics will be held at the Omni hotel, the Commodity Classic hotel.

About 3,800 growers are expected for Commodity Classic, the fifth annual combined convention and trade show of the American Soybean Association (ASA) and NCGA.

"It's not enough anymore to be good farmers. Today we have to be equally good economists and even better marketers," said NCGA President Lynn Jensen of Lake Preston, S.D. "Pro Farmer has de-signed marketing clinics to give growers plenty of information, especially as they prepare for the 2000 planting season."

The two clinics planned are "Mastering the Basics of Marketing," 2 p.m. to 5 p.m. Tuesday, March 7, and 'Beyond the Marketing," 8 a.m. to 11:30 a.m. Wednesday, March 8.

"These two sessions are held consecutively to allow producers to progress quickly toward a 'masters in marketing' in just a day's worth of time," said Jensen. "There may never be a more convenient time or inexpensive time to take in two workshops of this caliber–save travel costs by attending these two workshops immediately following Commodity Classic 2000."

He notes that, normally, corporations and cooperatives pay Pro Farmer tens of thousands of dollars to put on the exact same classes. Because of the working agreement with NCGA, these workshops are available at great money-saving rates.

CROP INSURANCE PROGRAM FOR CORN IN PENNSYLVANIA
Protection against unavoidable losses due to:
• Drought • Hail
• Wind • Freeze
• Wet weather • Wildlife
• Uncontrollable insects and diseases
Six coverage levels available:
50, 55, 60, 65, 70, or 75% of your proven yield is guaranteed.
Two plans of insurance to choose from:
Standard Actual Production History (APH) - Yield lower than your % guarantee paid at $1.90 per bushel. This program offers protection from production losses only.
Crop Revenue Coverage (CRC) - Coverage is in dollars per acre determined by multiplying your bushel guarantee by the December, 2000 futures contract price. This program offers some protection when the market prices drop.
Farms may be separated into separate units by Farm Serial Number allowing for spot losses.
Premiums are set by the USDA and are heavily subsidized
Crop insurance coverage is mandatory to remain eligible for USDA Disaster Programs.
Sale closing date is March 15, 2000
John J. Gartside, Crop Insurance Agent

1999 EVALUATIONS OF NUTRITIONALLY ENHANCED CORN

Peter Thomison
Allen Geyer
Ohio State Unversity

There are several specialty corns being marketed for value-enhanced grain production. These include the TopCross, Supercede, and NutriDense corns.

These specialty corns were developed with improved nutritional traits to enhance the feed value of grain. Nutritionally enhanced grains produced by these specialty corns offer major advantages over No. 2 yellow corn because they contain more protein, essential amino acids, and energy (oil) which can help livestock feeders reduce reliance on costly ingredients and supplements.

The Supercede and NutriDense corns have been introduced more recently, and we undertook limited testing of Supercede hybrids in 1998. Unlike the TopCross high oil corn production system which involves the use of blends, the Supercede and NutriDense nutritionally enhanced corns are single cross hybrids. The Supercede and NutriDense corn hybrids have been licensed to seed companies for distribution and are registered trademarks of Dow AgroSciences and ExSeed Genetics, respectively.

Evaluations of nutritionally enhanced corns in 1999 were conducted at the OSU-OARDC Research Farm at Wooster in northeast Ohio and the OSU-OARDC Northwest Branch Research Farm near Hoytville in northwest Ohio. Nine nutritionally enhanced corns including two Supercede hybrids, six NutriDense hybrids, and a single cross high oil corn hybrid) from five seed companies were planted at each site (Supercede and NutriDense are trademarks of Dow AgroSciences and ExSeed Genetics, respectively.) A normal (low oil) single cross hybrid was also included as a check.

Grain yields of the nutritionally enhanced corn hybrids ranged from 164 to 191 bushels per acre at Hoytville and 119 to 141 bushels per acre at Wooster. At Hoytville, most of the Supercede and NutriDense entries produced yields that were not significantly different from the normal corn hybrids. Yields of most of the Supercede and NutriDense hybrids were comparable. Differences in yield among the specialty and normal hybrids were not significant at Wooster.

Grain produced by the NutriDense, Supercede, and single cross high oil corn was characterized by higher oil content than grain of normal corn hybrid (5.9 percent vs. 4.2 percent at Hoytville; 6.0 percent vs. 4.2 percent at Wooster). There were significant differences in grain oil content among the nutritionally enhanced hybrids at each location with oil levels ranging from 5.4 percent to 6.8 percent at both sites. Grain protein levels of nutritionally enhanced hybrids averaged 2.1 percentage points higher than the normal corn at Hoytville, but only 0.4 percent higher at Wooster.

At Hoytville, the nine nutritionally enhanced hybrids exhibited significantly higher grain protein levels than the normal corn, whereas at Wooster, protein levels in the nutritionally enhanced and normal corn grain were generally not significantly different. At both locations, there were significant differences in grain protein among the nutritionally enhanced corn hybrids. Starch levels in grain averaged 3.5 percentage points less in nutritionally enhanced corn compared to normal corn.

Full results of the 1999 Nutritionally Enhanced Corn are available on the web at the following address: http://www.ag.ohiostate.edu/hocorn/NECrep99.htm

Corn Growers Look To 21st Century

Indiana Corn Growers Association President Michael Aylesworth testified on behalf of NCGA Sept. 21 before the Commission on 21st Century Production Agriculture.

Aylesworth is a member of the Public Policy Action Team, which will be charting NCGA's policy course into the next century.

Corn Board member Greg Guenther also spoke on behalf of the Illinois Corn Growers Association. The commission is holding field hearings around the country to seek input regarding the future of production agriculture in the United States.

Aylesworth outlined some of the fundamental tools needed for America's farmers to remain profitable into the next century. These include expanded research; affordable, effective crop insurance tools; a strong global economy and access to markets around the world; a fair and reasonable tax system; and viable, efficient transportation systems. He also addressed a number of emerging trends that are changing the face of farming, including agribusiness mergers and acquisitions, rapid advancements in technology and biotechnology, and growing environmental concerns worldwide.

"The state of this country's agricultural economy is changing," Aylesworth noted. "For Freedom to Farm to work and for farmers to survive the 21st century, we must identify emerging trends in the industry and prepare for their implications."

Plant Genome Projects Benefit From NSF Grants

The National Science Foundation (NSF) has awarded $50 million in grants for broad-based research in knowledge and distributed intelligence (KDI).

The awards are for projects as varied as knowledge networking in biocomplexity, earthquake computer modeling, and case studies in intellectual property.

A total of eight projects including genomics and other biological sciences totaling $14.5 million will contribute to the overall plant genome mapping effort. These projects are to develop methods to handle the vast amount of information generated by research such as the Plant Genome Initiative.

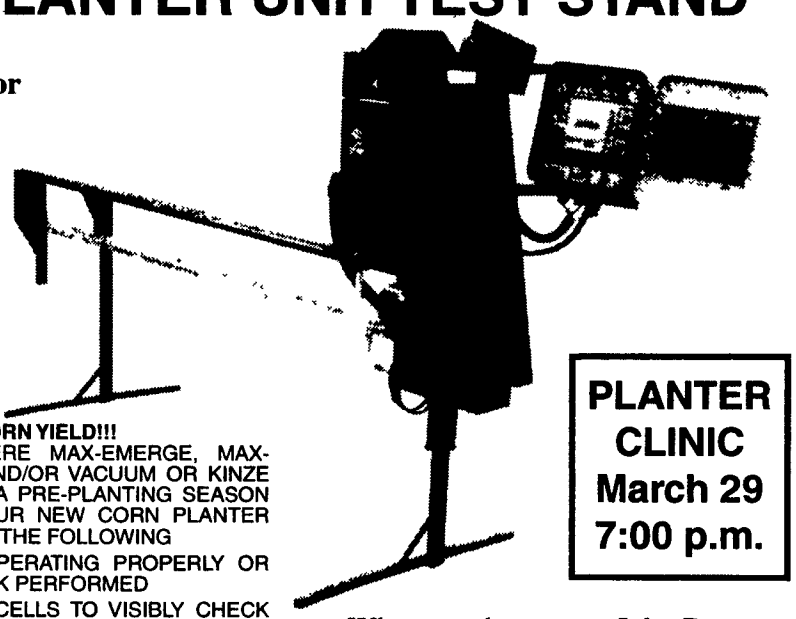
John Deere and Kinze
CORN PLANTER UNIT TEST STAND



For Finger Pickup or Vacuum Units... In Use By Dealers Throughout The Midwest

PLANTER CLINIC March 29 7:00 p.m.

BE SAFE & SURE...
PLAN NOW FOR A HIGH CORN YIELD!!!
BRING YOUR JOHN DEERE MAX-EMERGE, MAX-EMERGE 2, PLATELESS AND/OR VACUUM OR KINZE PLANTING UNITS IN FOR A PRE-PLANTING SEASON TUNE-UP AND REPAIR. OUR NEW CORN PLANTER UNIT TEST STAND WILL DO THE FOLLOWING

- SHOW IF UNIT IS OPERATING PROPERLY OR NEEDS SERVICE WORK PERFORMED
- SHOW 50 EXPOSED CELLS TO VISIBLY CHECK FOR SKIPS, DOUBLES, OR TRIPLES
- TEST CAN BE PERFORMED WITH YOUR SEED CORN TO MAXIMIZE RESULTS
- TEST STAND CONVEYOR BELT SPEEDS ARE INFINITELY VARIABLE TO SIMULATE ANY FIELD SPEED
- PRODUCES A HARD COPY PRINTOUT OF TEST RESULTS FOR PRESENT AND FUTURE COMPARISON

CALL NOW FOR YOUR APPOINTMENT!!!
Better To Be Safe, Than Sorry!!

When you have your John Deere or Kinze row units repaired by us for maximum planter accuracy, we will test them on our computerized test stand for only $15.50 per row (plus parts).

* Price includes computer printout of each unit

PENNSYLVANIA MASTER CORN GROWERS ASSOCIATION

President's Message

Dan Wolf
President, PMCGA

WINTER'S FINALLY HERE

After a milder-than-normal start, winter seems to have finally arrived.

Perhaps it takes a blast of Canadian air that parks daytime highs in the twenties to turn one's focus away from outdoor projects. Couple that with a positive trend change in a lackluster grain market and we could be persuaded to think about planning another growing season.

In view of the difficulties we encounter with weather and markets, sometimes it helps to take advantage of opportunities to broaden our horizons.

Two events are scheduled for next month that could be very beneficial. On Feb. 1, the Lehigh Valley Grain Marketing Club is sponsoring "Decisions 2000" at the Days Inn and Convention Center in Allentown.

This is a chance to hear two knowledgeable and highly respected agricultural experts. Richard Brock, of Brock Associates, is a marketing adviser who will discuss world and U.S. financial trends as well as the outlook for grain and livestock prices.

On the program as well is Lou Moore, Penn State professor of ag economics and a seasoned observer of farm trends and technology changes.

Call (610) 391-9840 for registration information.

The Pennsylvania Corn and Soybean Conference will be Feb. 8 at the Radisson Penn Harris Hotel and Convention Center in Camp Hill. Among the topics being discussed are crop insurance reforms, the GMO controversy, new soybean uses, GPS equipment, and ag perspectives for 2000. The keynote address will be presented by Dennis Avery, an internationally known analyst, noted for his study of trends in food demand, agricultural productivity, and global farm competition. Call (814) 865-2543 for more information.

Hope to see you at one or both of these educational events.

NCGA Welcomes EPA Biotech Decision

ST. LOUIS, Mo.–The U.S. Environmental Protection Agency's (EPA) announcement on Jan. 14 concerning Bt hybrids adds credibility to the recommendations made last April by the National Corn Growers Association and seed industry representatives.

In the spring of 1999, NCGA helped organize the Agricultural Biotechnology Stewardship Working group that included biotechnology providers. This working group provided the EPA an industry insect resistance management (IRM) plan that would manage the Bt technology to avoid possible insect resistance.

Key among the points was a requirement to plan a 20 percent refuge of non-Bt corn in the Corn Belt and up to a 50 percent refuge of non-Bt corn in the Cotton Belt. The refuge ensures a population of European corn borer moths that are suspectible to Bt.

"NCGA strongly supports the planting of IRM refuges because they allow the maximum use of this pest control technology while maintaining its long-term effectiveness," said Fred Yoder, Plain City, Ohio, farmer and a member of NCGA's Corn Board. "We welcome EPA's statement because it generally follows the plan we submitted. The EPA's announcement actually validates those recommendations."

For more information about the NCGA's IRM education plan, visit the NCGA web site at www.ncga.com

Using Leaves For Corn, Soybean Production

Mark Antle
Department Of Agronomy
Penn State

Farmland can benefit from the application of leaves collected from municipalities. However, there are some agronomic issues regarding soil quality and crop production which every producer should consider before agreeing to accept leaves for land application.

For example, what is the nutrient value of the leaves which will be applied? How will the leaves affect the organic matter content of the soil? Will the extra carbon immobilize too much nitrogen? How will the application of leaves impact grain yields?

A three-year study was conducted by Dr. Joseph Heckman at the Rutgers Snyder Research and Extension Farm in northern New Jersey in order to address these concerns and others.

The trial consisted of the application of three different rates (0, 10, and 20 tons dry matter per acre) of leaves to field plots each November for three consecutive years. The plots were chiseled soon after application of the leaves and planted to corn or soybeans the following spring.

Soybean plots were split to compare 0 vs. 100 pounds per acre of additional nitrogen. The corn plots were split to compare 170 and 270 pounds per acre of additional nitrogen.

Tree leaves have a relatively low concentration of most plant nutrients (1 percent N, 0.1 percent P, and 0.4 percent K) and a high carbon to nitrogen ratio of approximately 50:1. However, an application of 20 tons per acre of tree leaves (approximately 6 inches deep) adds an estimated 45 pounds P per acre, 171 pounds K per acre, 108 pounds Mg per acre, and 738 pounds Ca per acre.

Soil analyses were performed one year after the three-year study was completed. As expected, soil organic matter increased with the heavy applications of leaves. Organic matter content was 2.4 percent, 2.9 percent, and 3.1 percent on plots receiving 0, 10, and 20 tons per acre, respectively. Mehlich-3 levels for P and Mg did not significantly increase with the annual application of leaves, but at the 20 ton per acre rate, Ca and K levels showed a significant increase.

The application of leaves to cropland does cause some immobilization or "tie-up" of available nitrogen. Soybean plants in the trial exhibited mild symptoms of nitrogen deficiency until a well-nodulated root system was established. However, this did not seem to reduce soybean grain yield.

When a higher rate of N was applied to corn grown on soil amended with leaves, grain yields generally increased by the additional nitrogen fertilizer.

There is still some uncertainty in making nitrogen recommendations on corn fields where leaves have been applied. Therefore it was determined in the study that more research is needed on crop nitrogen requirements under these conditions.

Generally soybean and corn yields were comparable or better in soils amended with leaves compared to the unamended soils. Corn yields appeared to increase from approximately 2 to nearly 20 bushels per acre with addition of the leaves. The researchers speculated that the improvement was in part due to improvements in soil moisture holding capacity.

One item not specifically addressed is the fact that leaves supplied by municipalities sometimes contain a small amount of bottles, cans, and other undesirable materials. Leaves collected from curbside are usually vacuumed into a truck and of course the vacuum will pull in whatever loose material happens to be in or around the leaf piles. If a producer is not willing to accept a certain amount of foreign material in the leaves, he or she should probably not accept bulk leaf waste. The exception to this would be if the leaves were composted and screened, but there is still a possibility of some inorganic material passing through the screens.

In general, the application of tree leaves to cropland appears to enhance certain soil physical properties such as organic matter and to a lesser degree provide a source of nutrients. Increasing soil organic matter can result in higher yields on amended soils. Careful attention must be paid to managing carbon and nitrogen because there is the potential for nitrogen immobilization. Higher N rates might be necessary to compensate for the additional carbon added in the leaves.

Some fields will benefit more than others from the addition of leaf waste. Each producer needs to decide if this is a practice that would be worth the extra management on his or her farm.

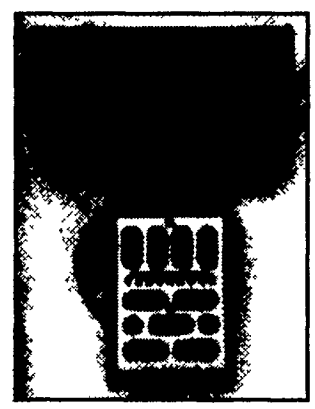
Commander Series Trailer Sprayer

HARDI

Sets the Industry's standard for precision, efficiency and safety

Features:

- 750, 875 and 1200 gallon tank sizes
- HARDI PARALIFT™ System - adjusts boom height
  - fast and friction free adjustment provides up to 88" crop clearance
- Tank design optimizes agitation for uniform mixture
  - centrally located sump empties tank completely
- HARDI Flush and Rinse™ System (optional)
  - flushes control unit, pump, filters, boom lines and main tank
  - mounted under main tank providing sprayer stability and accessibility for filling
- HARDI Color-coded Manifold Valve Control System
  - controls sprayer functions quickly and easily
- High ground clearance - 27"
- HARDI Self-priming Diaphragm Pump
- Eagle Boom with Patented Self-stabilizing Suspension
  - provides smooth ride and level boom in rough fields at high speeds
  - boom widths from 45' to 90'



Available with HARDI Pilot electronic application controller

Corn Grower Research Efforts Pay Off With PLA Breakthrough

ST. LOUIS, Mo. — The National Corn Growers Association (NCGA) welcomed Cargill Dow Polymers' announcement Jan. 11 about its plans for the first commercial-scale plant to produce polylactic acid (PLA), a plastic from corn.

Cargill Dow's action culminates research and market development on PLA and opens the door to a market that could eventually consume 500 million bushels of corn per year.

Groundbreaking will occur this spring at Blair, Neb., site of a Cargill wet milling plant. The PLA plant will be on line by late 2001. The plant will use 40,000 bushels of corn per day for an annual use of 14 million bushels.

The plant will turn corn into polymers, small chips or pellets of plastic-like material that manufacturers will then process into fabrics for clothing as well as plastics for cups, food containers, packaging, and home and office furnishings such as carpets.

Cargill Dow emphasized that this is the first time a renewable resource, corn, "stands alone on price and performance.

"Our grower leaders are thrilled to see our efforts yield commercialization," said Floyd Schultz, chairman of NCGA's Customer and Business Development Action Team, and a farmer from Plainfield, Ill. "The combination of Cargill's expertise in corn processing and Dow's position as a world leader in polymer production and marketing should yield important new products for consumers and an important new market for our most important crop."

PLA applications research has been a priority for several years for corn growers at the state and national levels. The plastics industry is huge, and PLA has great characteristics for new products. Fabrics made from PLA have the feel of silk and durability of polyester. Other PLA products may include plastic wrap and plastic bottles.

The developments of PLA and related plastics could use 500 million bushels of corn per year, nearly the level of ethanol, which uses 500 million bushels annually and adds about 25 cents per bushel to the price of corn.

Now Every GLEANER® Combine Comes Equipped With Comfortable Financing.

0%*

NO INTEREST UNTIL OCTOBER 1, 2000

You know GLEANER® offers superior comfort and performance. Now, even our financing can fit your operation. Through March 31, 2000, GLEANER offers new flexibility with financing plans that can get you into a new high-performance GLEANER combine. Now you can get more out of your field with less strain on your budget. And, it's on every new and select used GLEANER combine and header – even the new state-of-the-art Fieldstar® Precision Farming System.

But heads up! This offer ends MARCH 31, 2000. Make your way to your participating GLEANER dealer and exercise your financing options today.

CORN TALK NEWS

RESEARCH UPDATE

PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

DROUGHTY SOILS

Greg Roth
Penn State Agronomy
Associate Professor

A key problem in our Mid-Atlantic Region is that frequently we encounter droughts on a regular basis. Many of our soils are shallow or sandy and corn yields are severely impacted on these soils. As a result we are often unable to meet the demands for corn in our region.

Recently several land grant researchers in the region have joined forces to look for ways to manage our variable soils more efficiently. This project is known as the Mid-Atlantic Regional Cropping Systems Project, and is funded by the Foundation for Agronomic Research through support of numerous industry contributors and the United Soybean Board.

Dr. Mark Alley from Virginia Tech heads up the project. Other collaborators on the project are from North Carolina State, University of Maryland, and Penn State.

The main study site of the project is at the Camden Farm in Port Royal, Va. This is a large corn/wheat/soybean grain farm with two major soil types: droughty sandy loam Bojac soils and productive Wickham sandy loam soils.

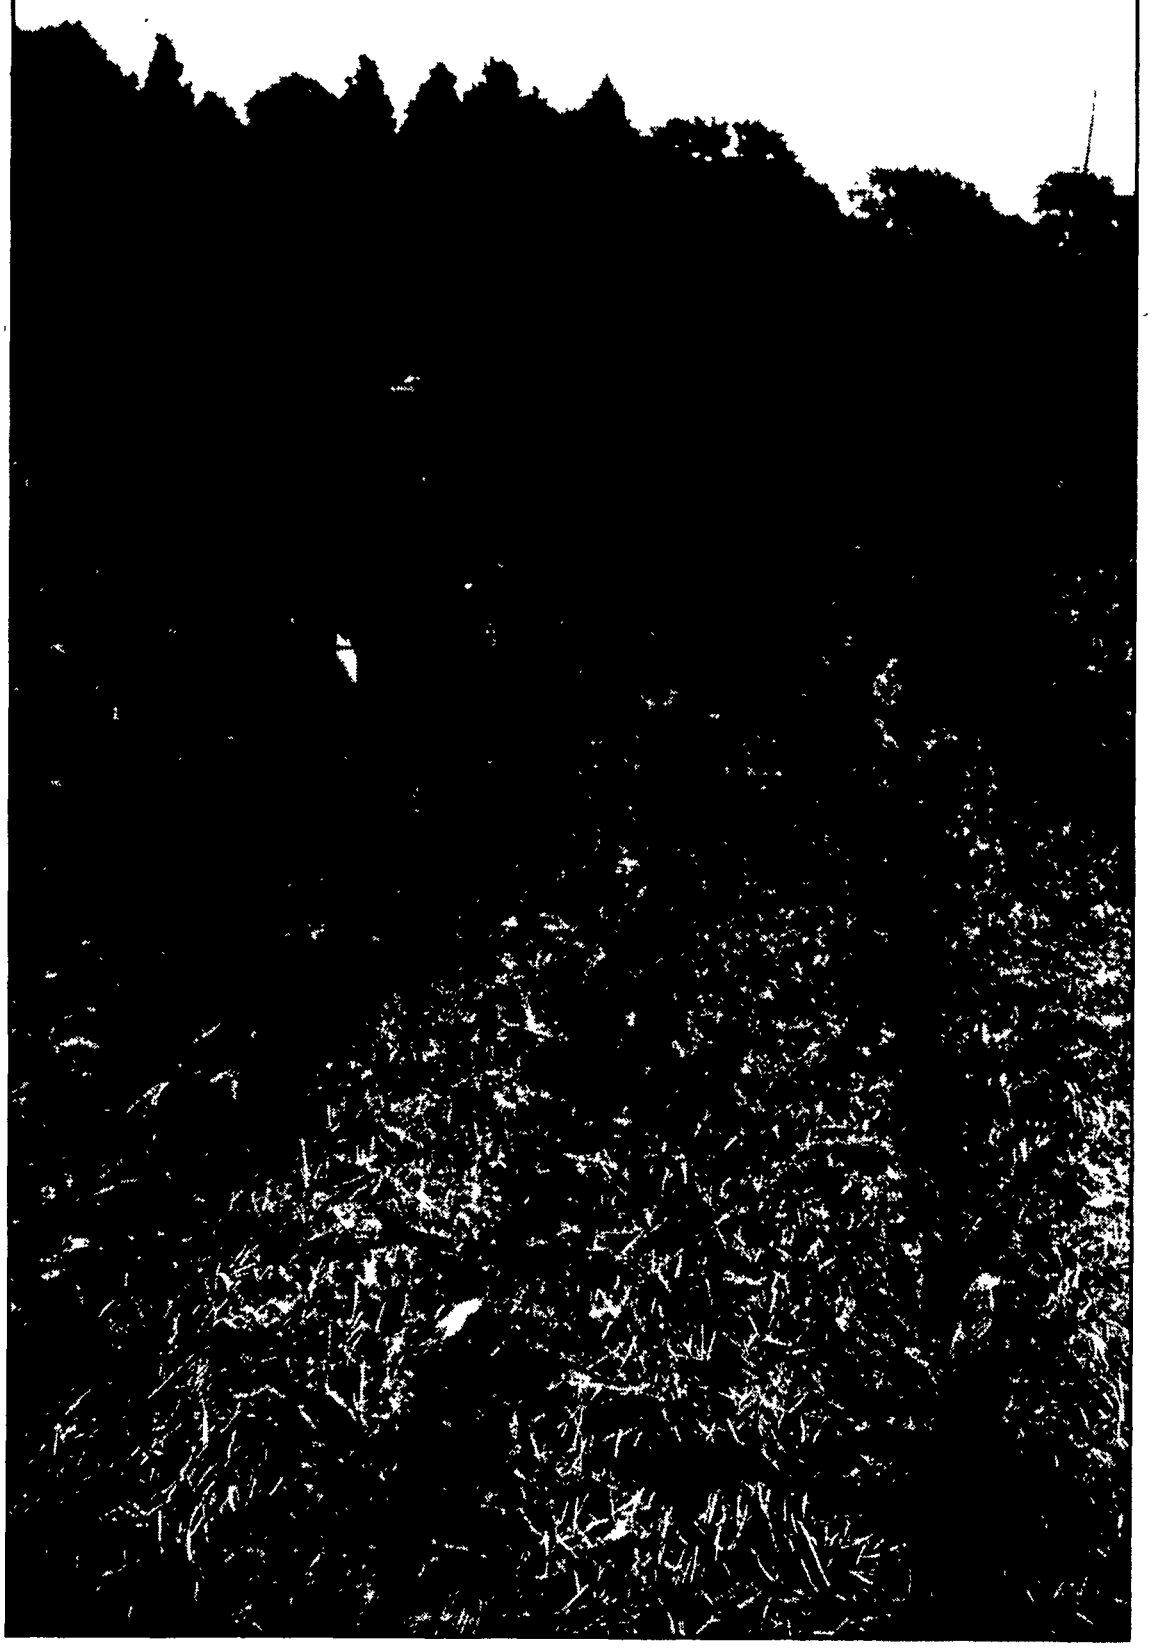
On these soils, three different grain crop rotations have been established: 1) a standard no-till corn, conventional-till wheat, double-crop soybean rotation; 2) no-till corn, no-till soybeans, no-till wheat, no-till double-crop soybeans; and 3) no-till wheat, no-till double-crop soybeans, no-till barley, and no-till double-crop corn. The objective is to determine the profitability of each rotation on the different soils.

In the first year of the study, 1998, an economic analysis indicated rotation 1, the corn/wheat soybean rotation, would be the most profitable on The Bojac soils or on a farm with an equal portion of both soils. For a farm with all of the productive Wickham soils, Rotation 2 would be the most profitable. These results are based on yields during the first year (1998) when full season corn averaged 158 bushels per acre; double-crop corn, 78 bushels per acre; full-season soybeans, 35 bushels per acre; double-crop soybeans, 24 to 29 bushels per acre; conventional-till wheat, 64 bushels per acre; no-till wheat, 55 bushels per acre; and no-till barley, 92 bushels per acre.

The other researchers in the project are studying various components of the system and new technologies that could improve the base system. At North Carolina State, for example, Ron Heininger and Gail Wilkerson are developing variable rate N and variable rate weed management systems. We are evaluating starter fertilizers and plant populations for corn here in Pennsylvania.

The project has established a Website to share the results of the main study and all of the satellite projects as they progress: www.farmresearch.com.

Penn State is one of four universities that have joined forces to study optimum crop management practices on droughty soils in the Mid-Atlantic region.



Potassium deficiency was apparent in some fields, especially where no starter was used, as shown here by John Rowehl, extension agent.

CORN BITS

NRCS To Seek Input On Nutrient Management Guidelines

For some time, USDA's Natural Resource Conservation Service has been developing a technical guidance document related to implementation of comprehensive nutrient management plans (CNMPs).

As part of the Clinton administration's Clean Water Act Plan, it is expected that all animal feeding operation owners and operators will have such plans in place by 2009.

While developing the guidance document, NRCS obtained input from the Environmental Protection Agency. EPA believes that document should be a comprehensive, standalone, prescriptive reference that would provide all the information necessary for development and implementation of a CNMP.

NRCS, on the other hand, maintains that development of a CNMP is not significantly different than the agency's traditional planning process and, therefore, the document should be specific, but brief, with reference to technical materials that NRCS already has in place to address associated issues.

NRCS believes such a document will provide maximum flexibility to producers during development of a CNMP. Recently NRCS leadership decided to move forward with the brief document. It is expected to be posted in the Federal Register for a 60-day public comment period in mid-October. NCGA will review and offer input on the document at that time.

1999 Pa. Commercial Hybrid Test Reports

Short-season hybrids (Maturity Zone 1) 1999 results

How to use this report

This report provides independent and unbiased information for the evaluation of commercial corn hybrids available in Pennsylvania. It should be used to supplement other sources of information, such as seed industry performance tests, other independent testing data, and on-farm performance records when making hybrid selection decisions.

The first factor to consider when using this report is hybrid maturity. The hybrids listed in Tables 1, 3, and 4 are ranked in ascending order by grain moisture with the earliest hybrids (lowest grain moisture) at the top. In Table 2, hybrids are listed alphabetically. Grain or silage moisture is a good indicator of hybrid maturity; those with lower moisture are generally adapted to shorter season environments. Identify hybrids in the list that you know are adapted to your area, and then evaluate new hybrids that have similar moisture contents. Selecting hybrids based on yield alone may result in a hybrid that is too late for your farm. Note that there is considerable range among maturity in hybrids entered in each zone. Once you have identified the appropriate hybrid maturity range, compare the yields of the hybrids that have been evaluated.

Yield performance is variable across locations and is best predicted by using data averaged over multiple locations, so the mean yield over all sites is the best guide to hybrid performance. Individual location hybrid means (Table 2) can help to assess how consistent, or stable, the hybrid was across locations. For example, some hybrids may do well at high-yielding sites but may not do well at low-yielding sites. We DO NOT recommend using data from a single site, even if it is close to your farm, to make hybrid selection choices.

Once you have identified some prospective hybrids, consider their standability from the erect plants column as well as any disease rating data that may have been collected. It also is important to check with a seed company representative about other characteristics of the hybrid that may be important for your operation.

Once you have gone through this process, you should be able to select hybrids that have above-average performance. This is an important part of profitable corn production, since, as these reports demonstrate, there is a wide range in the performance of corn hybrids.

Further, we recommend that you evaluate selected hybrids on your farm under your growing conditions and practices. This is the best way to make a final determination of the proper hybrids for your operation.

Tests of commercially available corn hybrids are conducted annually at several locations in each of the four maturity zones in Pennsylvania to provide farmers, seed producers, cooperative extension agents, and other interested persons with information about hybrid performance. This report includes both the grain and silage results from the 1999 season.

Table 1 contains the combined results for all locations harvested in this zone. Table 2 contains the yield data generated at each location. We believe that the statewide performance averages found in Table 1 are most important to consider when making a final decision about variety capabilities, since they represent a wide variety of growing, soil, and management conditions. A two-year summary of results for hybrids tested in both 1998 and 1999 growing seasons is given in Table 3. The results for hybrids entered in the silage performance test are reported in Table 4.

Procedures

This testing program was available to any producer of hybrid seed corn For the grain tests, hybrids were planted in paired-row plots equal to 1/500 of an acre. Each row was over-planted (30 kernels per row) and thinned when the corn was 12 to 18 inches tall. The final population was 26,000 plants per acre Silage plots were 1/1,000 acre in size, consisting of one row over-planted to 32 kernels and thinned to a final population of 28,000 plants per acre. All grain entries were replicated three times in each test while silage entries were replicated four times. Cooperators and planting and harvesting dates are shown in Table 5.

Discover the Latest Hybrids of Roundup Ready® Corn

Have you been looking for great yields from your corn? Then look no more, because we've found just what you need. We now have new hybrids of Roundup Ready corn, giving you more total hybrids to choose from for the 2000 planting season.

As you know, good hybrid selection can help you maximize corn yields by providing the very best match for your specific farming conditions. With so many hybrids, you can select the right one to respond to your soil type, moisture level, and tillage and planting methods. So don't delay – discover the latest hybrids of Roundup Ready corn, and see what they can do for you.

For more information, contact your local dealer or your Monsanto rep, visit www.farmsource.com, or call 1-800-ROUNDUP.

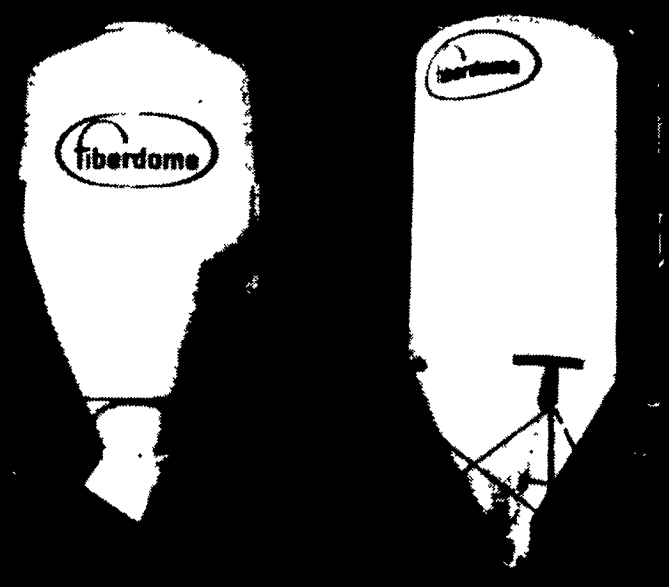
Cub Cadet

fiberdome Incorporated

Why settle for 2nd best - when Fiberdome now manufactures the most advanced fiberglass bulk bin available!

- Eliminates bridging, won't rust or corrode
- Cuts heat buildup and condensation
- Feed stays fresh in any weather
- Precision engineered for long, long life
- Unique 5-year warranty
- Adaptable to any auger or feeding system

Capacities from 2.5 ton to 30 ton
(Tonnage based upon 40 lb. density) Industrial Bins Available



(2' -10' Ton) (11-30 Ton)

Write for a full color brochure and a free sample of fiberglass - The modern material used for high-performing bins

...made to last

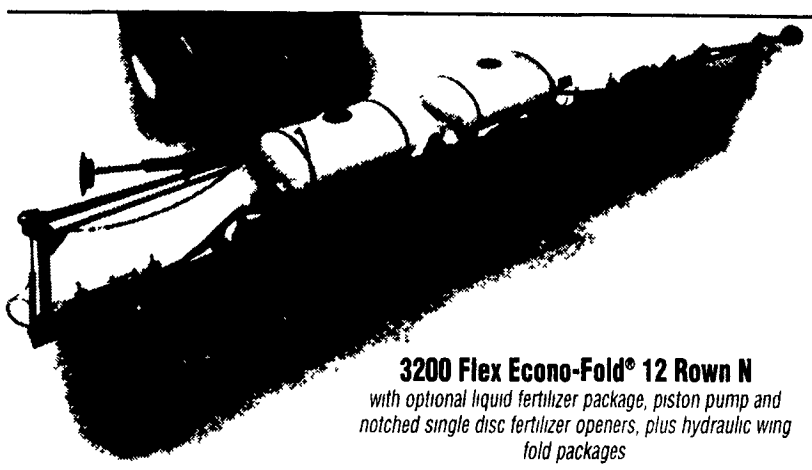
BINKLEY & HURST BROS., INC. INTRODUCING

The New KINZE 3000 SERIES PLANTERS

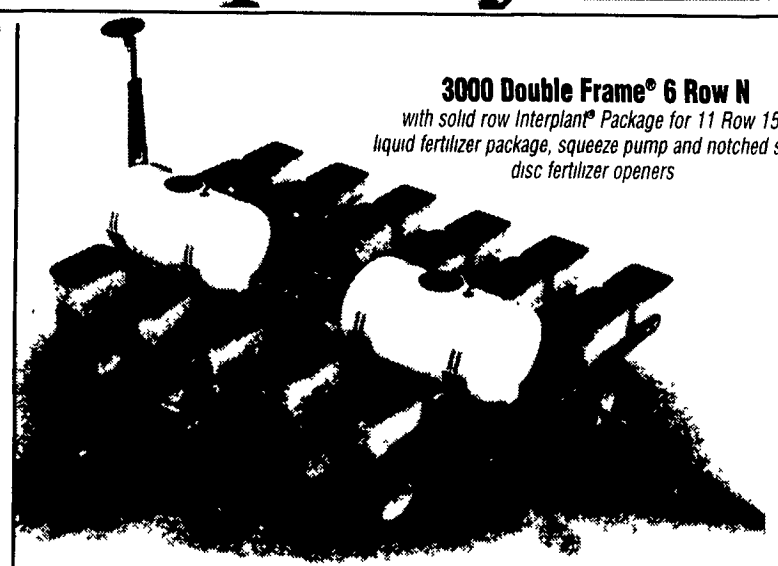
PRECISION & Simplicity

KINZE FERTILIZER SYSTEMS



3200 Flex Econo-Fold® 12 Rown N
with optional liquid fertilizer package, piston pump and notched single disc fertilizer openers, plus hydraulic wing fold packages

Stimulate fast, early seedling growth and lower your fertilizer application costs with more efficiency, better placement and reduced trips.



3000 Double Frame® 6 Row N
with solid row Interplant® Package for 11 Row 15", liquid fertilizer package, squeeze pump and notched single disc fertilizer openers

With the KINZE® front-mounted Double Frame®, you have it all!
Standard width rows Liquid or dry fertilizer Solid row Interplant® All with the same planter, same frame components, same drive system Without sacrificing one ounce of KINZE® Quality

12 Reasons Why You'll Be Wise To Check Out The New KINZE Row Unit.

1 Load Equalizing Gauge Wheels
2 Precision-Ground Replaceable Pivot Spindles
3 Cast Adjustment "Rack"
4 Thumbscrew Meter Attachment
5 18% Larger Seed Hopper
6 Self-Aligning, Twist-Release Throwout Clutches
7 Translucent, Molded Chemical Hopper
8 Closing Wheel Arm Eccentrics
9 20% Heavier Opener Blades
10 Improved, Strongest-Ever Row Unit Shank
11 "Beefed-Up" Shank Lower End w/Improved Tube Protection
12 Molded Depth Wheel Covers

Pre-Season Extra Large Discounts

With new grain storage now you're investing in your future

With BROCK BINS, the quality of that future is for certain. That's because BROCK offers the **best** quality grain bins on the market today – with more features that mean not only more convenience but also longer life. Here are a few of the BROCK features that make us your No. 1 bin buy:

BROCK offers quality holding bins in diameters 6 thru 21-ft – to meet any need you have
Choice of conventional or rust-proof black poly-coated bin assembly bolts Both are highest grade to protect your investment.
Choice of 45 or 60-degree sloped hopper bottoms.
BROCK's unique walk-thru door has no tie bars & needs no tools to open door "boards." Makes life easier.
High rise (3" high) roof ribs provide tight fit & added roof strength
Adjustable stiffener ring increases roof strength & eliminates sag
Strong 25-lb per sq. ft uniform load rating makes our roof the one most producers prefer
High-strength drying floor, floor supports, and fan transitions let you keep grain in top condition for top price

For more information and prices about the world's No. 1 quality bins – your No. 1 grain marketing tool – see your BROCK dealer or contact us.

American Phytopathological Society: Threats To Health Reduced With Bt Hybrids

ST. PAUL, Minn.–The re-cent approval and commercial release of genetically modified, insect-resistant corn hybrids (Bt corn) represents the culmination of decades of research.

This innovative technology has a distinct health benefit of discouraging the build-up of mycotoxins in corn, potentially dangerous human and animal toxins produced by fungi that cause plant disease.

Mycotoxin build up is directly related to certain fungal plant diseases that can be increased by insect damage in crops. Insect larvae chew on stalks and kernels, creating wounds where fungal spores can enter the plant. Once established, these fungi often produce mycotoxins. Some mycotoxins, such as fumonisin, can be fatal to horses and pigs, and are probable human carcinogens.

"Lower mycotoxin concentrations in Bt corn hybrids clearly represent a benefit to consumers," said Gary Munkvold, plant pathologist at Iowa State University and American Phytopathological Society member. "Studies show Bt corn hybrids that control European corn borer damage to kernels usually have very little Fusarium ear rot and, consequently, lower fumonisin concentrations."

Bt corn hybrids control feeding by the European corn borer and to some extent closely related insects such as the corn earworm, common stalk borer, armyworm, and southwestern corn borer–all of which cause mechanical damage to the corn. The damage influences the development of several crop damaging diseases including ear rots, kernel rots, and stalk rots.

Kernel rot caused by the fungus Aspergillus is also associated with insect damage to ears. Several species of this fungus produce the most notorious mycotoxins found in corn, the aflatoxins. The economic impact of aflatoxins has been greater than that of other mycotoxins in corn, because aflatoxins can be passed into milk if dairy cows consume contaminated grain," grain," said Munkvold.

Bt corn hybrids can be an important tool in the integrated management of corn ear and stalk rots and a boon to the environment as well. "Using genetically modified hybrids to control insects and diseases offers an alterna-

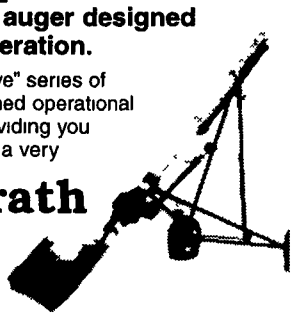
Your Source For Quality Grain Handling Equipment

A premium quality galvanized auger designed for low maintenance operation.

Mayrath introduces the all new "InLine Drive" series of portable grain augers Mayrath has combined operational efficiency with long term dependability providing you with a high quality, GALVANIZED auger at a very affordable price The revolutionary "InLine Drive" system minimizes the number of moving parts greatly reducing costly downtime and maintenance in the future

Mayrath InLine Drive



DIAMETER	CAPACITY	LENGTHS
8'	3200 BPH	32', 42', 52', 62', 72'
10"	4500 BPH	32', 42', 52', 62', 72'

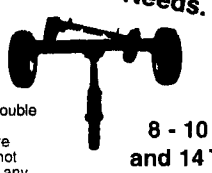
The InLine Drive
Unique in design, high in efficiency.

The gearbox is located inline with the actual auger flighting. The outer tube is expanded to allow unobstructed and efficient flow of grain past the gearbox section. This design allows it to be more reliable and low maintenance operation.

The unique "InLine Drive" design features an internally mounted gearbox inside of an expanded, bell shaped tube housing Auger flighting is positioned to allow a high volume of unrestricted grain flow around the internal gearbox A new intake design utilizes double flighting and a cupped intake guard to offer a high capacity, complete cleanout operation A specially engineered hopper bolts directly to top of the intake guard, further enhancing the augers capacity

Quality & Strength you can depend on!

Always Call Binkley & Hurst Bros. For All Your Running Gear Needs.



The Double Read Feature does not cause any problem about flexibility

Soil Aerator Weed Killer!
Yetter Defining Solutions
Yetter Rotary Hoe
• Aggressively uproots wees
• Incorporates herbicide
• Aerates soil before planting
• Follows soil contour
• Staggered arms allow residue flow
• When you pour the herbicide from the can–it's gone, with no real guarantee of effectiveness against weeds today or in the future. Yetter Rotary Hoes allow you to keep ripping out weeds year after year with the same iron.
• Along with killing those yield-robbing weeds, you benefit by busting yield-limiting crusted soils. Isn't it time you kicked the can and got the Hoe? Yetter Rotary Hoes, a guaranteed approach to environmentally-friendly weed control with the added benefits of time-saving speed and accuracy - year after year
WEED KILLER
Kick the herbicide habit with low cost weed control

Orlando To Host Nation's Top Corn, Soybean Growers

SAINT LOUIS, Mo.–Thousands of corn and soybean growers from across the U.S. will be heading to sunny Orlando, Fla. this March to attend the largest commodity event of the year–Commodity Classic 2000.

An estimated 3,800 of the nation's corn and soybean growers and industry leaders are expected to converge March 5-7 at Orlando's Orange County Convention Center for the fifth annual combined convention and trade show of the National Corn Growers Association (NCGA) and the American Soybean Association (ASA).

"Orlando is an appropriate place for us to plan and build for the future of agriculture as we enter a new century of challenges," said NCGA President Lynn Jensen. "Attendees can certainly expect to have plenty of quality attractions and events along with all there is to see and do in Orlando."

Commodity Classic is the premier venue for growers to learn and network with leading innovators in crop production and agribusiness industry representatives to improve their efficiency and profitability. Classic 2000 agenda includes a diverse range of production, education, new product seminars, and top entertainment events.

"By reputation, Commodity Classic's educational seminars attract the best within our industry and go a long way in helping keep producers on the cutting edge of new technology," said Marc S. Curtis, president of the American Soybean Association.

Back by popular demand at Commodity Classic 2000 is thought-provoking and highly entertaining technologies futurist Dr. Lowell Catlett. Catlett's knowledge of technologies and their implications on the way we live and work has earned him the reputation of one of the best in his field with corporate and association audiences nationally and internationally. Catlett's presentation is sponsored by Dow AgroSciences. Classic climaxes with a Monsanto-sponsored concert featuring country music superstar Ricky Skaggs, whose chart topping talent covers country, bluegrass, and gospel music.

Events include:

•Early registration event: The first 1,300 growers and family members who register for a full package will receive a ticket to this year's early registration bonus event, sponsored by BASF. This year's kickoff event at world-famous Sea World is not to be missed and sure to be the best yet.

•Seminar topics include "Marketing In the New Millennium;" "Building Yields One Seed at a Time," "The Complexity of Today's Export Market," and a special taping of AgDay TV's *Weekend Marketplace.*

•Learning center topics: Sponsored by Rhone-Poulenc, you'll learn how to implement sound agronomic and production management practices to increase corn and soybean yields, reduce costs, and make you more efficient.

•A bigger and better than ever trade show, featuring more than 580 exhibit booths. A one-stop-shop to learn about new products coming to the marketplace.

•A wide array of quality family entertainment diversions, including Walt Disney World and Sea World.

Bt Corn Hybrids

(Continued from Page 29)

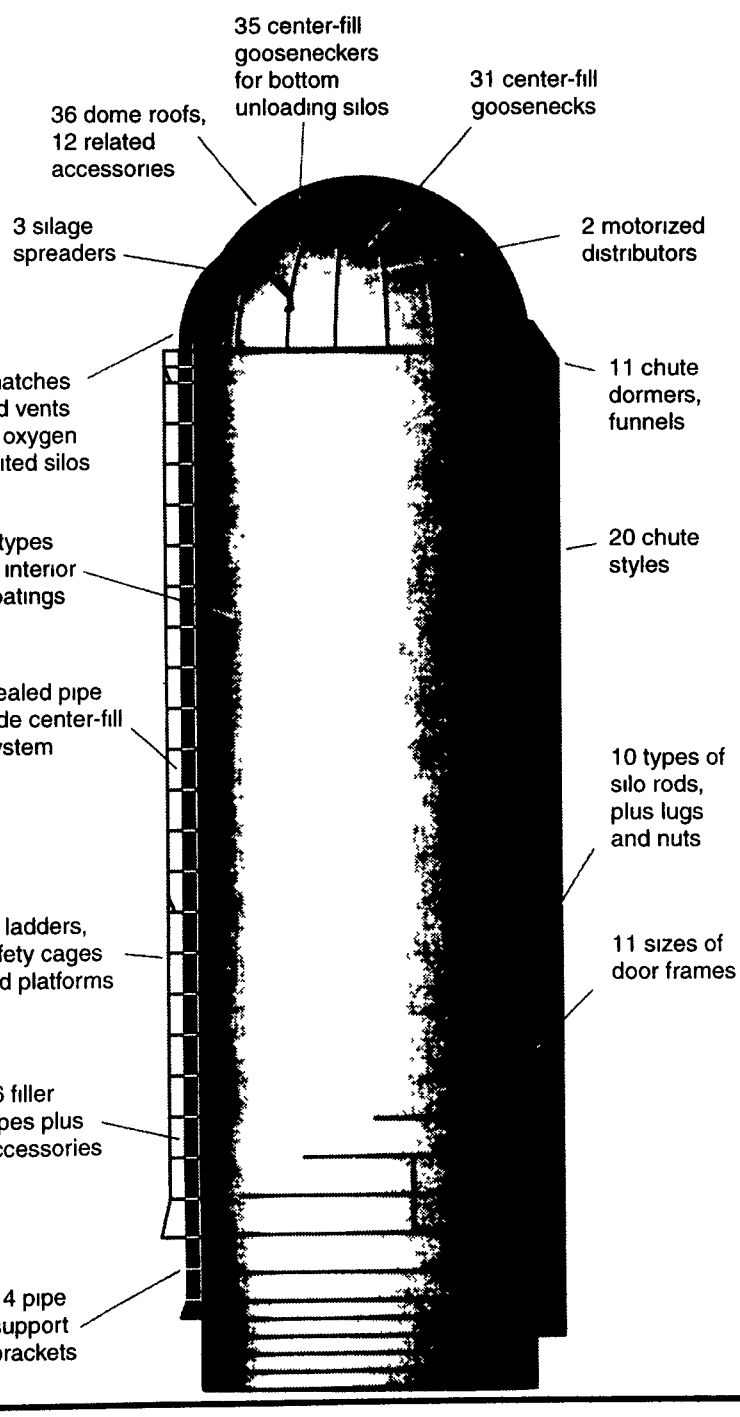
tive that is much more effective, consistent, economic and en-vironmentally sound than foliar insecticides. For example, non-Bt hybrid sweet corn can require 12 or more insecticide applications in a single season for the production of sweet corn for fresh market sales."

Controversy over production and use of genetically modified crop cultivars has focused a great deal of public attention on Bt corn. "Debate surrounding the use of genetically modified crops should bebased on risk/benefit assessment including environmental impacts, livestock impacts, and potential human health threats," said Munkvold. "Consumers and regulatory agencies should consider the food safety and environmental implications of Bt corn when making decisions about its use."

For more information about Bt corn, visit the APS October/November feature story at http://www.scisoc.org. The American Phytopath-ological Society (APS) is a professional scientific organization dedicated to the study and control of plant disease with 5,000 members worldwide. For more information on APS, contact APS Headquarters at (651) 454-7250 or aps@scisoc.org.

For silo equipment, think "Lancaster"

No other name gives you so many value-packed silo products for filling and construction.



35 center-fill gooseneckers for bottom unloading silos
31 center-fill goosenecks
36 dome roofs, 12 related accessories
3 silage spreaders
2 motorized distributors
8 hatches and vents for oxygen limited silos
11 chute dormers, funnels
2 types of interior coatings
20 chute styles
Sealed pipe side center-fill system
10 types of silo rods, plus lugs and nuts
16 ladders, safety cages and platforms
11 sizes of door frames
36 filler pipes plus accessories
14 pipe support brackets

The steel products on your silos have to be tougher than nails if they're going to last That's why more dairymen trust Lancaster silo equipment for lasting value from top to bottom

Thirty years ago we invented the silage spreader as the best way to fill silos But maybe you don't know just how many products we make If your concrete or steel upright storage system needs parts and equipment, Lancaster makes it

We use good ideas from practical farmers like you to constantly make our products work better and last longer You see, with us the job is more than just bending metal It's using the best materials and dedicated craftsmanship to give you more value for every equipment dollar

For silo equipment, do yourself a favor Insist on Lancaster for every item For the Lancaster dealer nearest you, call today **1-800-635-8708.**

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

Industry News

Aventis is the new company name from the merger of AgrEvo and Rhone Poulenc. The products and services from these two companies will now be under Aventis.

Cyanamid will be using the universal trade name Clearfield to refer to crop lines that are imidazolinone tolerant/resistant (sometimes referred to as IR or IT). The term Clearfield or CL will replace IMI. The Clearfield trade name will be used similarly to that of Roundup Ready and Liberty Link.

Syngenta is the proposed name for the merger of Novartis and Zeneca. The two companies have agreed to spin off their ag divisions from their parent companies to form a new company. The completion of this merger likely will not occur until late 2000, depending on approval from shareholders and the FTC.

• Glyphosate products. A number of new glyphosate containing products will be available in 2000 and during the next several years. Monsanto, the maker of Roundup, is marketing some of these new products while others are from other companies. See Table 1 for a list of glyphosate products.

Corn
Labeled

Aim 40DF (FMC) is labeled for early postemergence use on corn (field, seed, popcorn, and silage). The use rate for Aim is ⅓ ounces per acre. Aim is effective on small black nightshade, velvetleaf, lambsquarters, and pigweed. The price of Aim was reduced for 2000, so it could be an attractive tank mix partner to improve broadleaf control.

Axiom AT 70DF (Bayer) is a premix that contains the active ingredients of Axiom (flufenacet and metribuzin) and atrazine. Flufenacet is an amide-type herbicide similar in control spectrum to Dual, Harness, Surpass, Frontier, etc. Performance of Axiom on annual grasses and small seeded broadleaves has been similar to Dual, although it may need some assistance with yellow nutsedge. The addition of atrazine improves broadleaf control. The use of Axiom AT will be similar to Bicep, Harness Xtra, FulTime, and Guardsman. Use rates depend on soil texture and organic matter content, and range from 1.5 to 2.75 pounds per acre for our area.

Bicep Magnum TR 4.59L (Novartis) was available last year and contains s-metolachlor, atrazine, and flumetsulam (Python). It is primarily targeted at areas that have triazine-resistant lambsquarters and pigweed, but will also controls the same weed spectrum as previous Bicep products. Bicep Magnum TR can be applied preemergence to field corn from 1.6 to 2.2 quarts per acre. Follow restrictions with regard to soil insecticides, soil pH, organic matter, and planting depth to avoid crop injury.

Broadstrike + Dual (Novartis) will likely be discontinued within the next couple of years because of other products that fill this need. Python and Hornet will remain available.

Celebrity Plus 70WG (BASF) is a mixture of the active ingredients in Accent (nicosulfuron) and Distinct (dicamba + diflufenzopyr). Celebrity Plus will be applied postemergence at 4.7 ounces per acre to corn between 4 and 24 inches tall for control of many annual grasses and broadleaves plus some perennials. Nonionic surfactant and ammonium sulfate should be included in the spray mixture. Be cautious of interactions with certain OP soil-insecticide interactions. Celebrity Plus will, for all practical purposes, replace Celebrity (nicosulfuron and dicamba).

Degree 3.8CS (Monsanto) contains the same active ingredient as Harness but is a new encapsulated formulation of acetochlor designed to extend soil-residual control of annual grass species. (Degree may not control pigweed and lambsquarters as well as Harness due to the changed formulation). Degree will be positioned to compete with Dual II Magnum and Top Notch in the early preplant market. Monsanto claims the release of acetochlor from the encapsulation is triggered primarily by soil temperature. As the soil temperature warms up, the product becomes available to control weeds, while under cold conditions, it remains unavailable.

Degree Xtra 4.04EC (Monsanto) is a premix of Degree (encapsulated acetochlor) and atrazine. It will provide preemergence control of annual grasses and broadleaves.

Dual II Magnum 7.62E and Bicep II Magnum 5.5L (Novartis) have been available for the past two seasons, but will increase in availability, probably eventually replacing the non-Magnum formulations. The Magnum products contain the more active s-metolachlor that will be incorporated into the Dual and Bicep line of products. Dual Magnum and Bicep Magnum also contain the safening ingredient for corn. It controls the same weed spectrum as previous Dual or Bicep.

Frontier X2 6EC (BASF) contains dimethenamid-p, which is the more active isomer of dimethenamid (Frontier, Guardsman, and LeadOff). Since it is more active, the use rates will be lower by approximately 55 percent. For example, 28 fluid ounces of Frontier would be equivalent to about 16 fluid ounces of Frontier X2. X2 controls the same weed spectrum as Frontier, providing good control of annual grasses, some broadleaves and nutsedge. There will be limited quantities of X2 in 2000, but full conversion will occur over the next couple of years.

Leadoff 5L (DuPont) is a prepackage mix of dimethenamid (Frontier) and atrazine being marketed by DuPont that contains the same ratio as Guardsman herbicide from BASF. LeadOff contains 2.33 pounds per gallon of dimethenamid and 2.67 pounds per gallon of atrazine and may be soil-applied to field corn, seed corn, sweet corn, and popcorn.

Liberty ATZ 4.3L (AgrEvo) is a prepackaged post product that contains glufosinate (Liberty) and atrazine. It may be used in Liberty Link or glufosinate-resistant (GR) corn hybrids only. At 40 fluid ounces per acre, Liberty ATZ will provide 1 pound ai or 1 quart atrazine plus 24 fluid ounces Liberty 1.67L. Liberty in combination with atrazine controls a number of annual weedy grasses and broadleaves.

Northstar 51.4WG (Novartis) is a prepackage postemerge herbicide for use in corn. NorthStar is a premix of the equivalent of 0.5 ounce Beacon (active ingredient primisulfuron) and the equivalent of 4 ounces of Banvel or Clarity (Dicamba). The labeled use rate for NorthStar is 5 ounces of product per acre and it can be applied over the top to corn between 4 and 20 inches tall. Unlike Exceed and Spirit, NorthStar only has an 8-month rotation restriction for soybeans.

Pendimax 3.3EC (Dow AgroSciences) contains pendimethalin, the same active ingredient in Prowl. Its label and uses are very similar to that of Prowl.

Readymaster ATZ 4L (Monsanto) is a premix of glyphosate and atrazine for postemergence application to Roundup Ready corn. The formulation contains about 2 pounds ai per gallon glyphosate and 2 pounds ai per gallon. atrazine. Use rates will range from 1.5 to 2 quarts per acre. Expect other ReadyMaster products containing Harness in the upcoming years for use in Roundup Ready corn.

Pending

Balance 75WDG (Rhone Poulenc) is not yet labeled east of Ohio. EPA and the state department of agriculture are still reviewing this product for use in Pennsylvania and other areas of the Northeast.

Soybean
Labeled

Authority 75DF (DuPont) contains the single active ingredient sulfentrazone. Authority is applied preemergence at 4 to 5.3 ounces per acre and provides control of common broadleaves including nightshade. To broaden the weed control spectrum, tank-mix with other pre products or apply a planned post herbicide such as Classic, Synchrony, or Roundup (on respective herbicide resistant varieties only).

Backdraft (Cyanamid) is a premix of Scepter (imazaquin) and glyphosate (Roundup Ultra) for use in Roundup Ready soybeans. This herbicide is intended for early post applications with the glyphosate providing control of existing weeds and the Scepter providing residual control of weeds emerging after application.

Boundary 7.8EC (Novartis) is a premix of s-metolachlor and metribuzin. It will mostly be applied preemergence at the 1.25-1.5 pint per acre rate followed by Roundup Ultra or other glyphosate product in Roundup Ready soybeans. The 1.5 pint rate equals 1.24 pint Dual II Magnum and 6 ounces of Sencor. This program could allow a wider application window for Roundup following the Pre program. Boundary will eventually replace Turbo (Dual + Sencor).

Domain 60DF (Bayer) herbicide premix is similar to Axiom but is a different ratio. Domain is a 1:1.5 combination of 24 percent flufenacet and 36 percent metribuzin. Axiom 68DF is a 4:1 ratio of flufenacet and metribuzin. Flufenacet is an amide-type herbicide similar in control spectrum to Dual and Frontier, etc. Domain will be mostly used as a preemergence herbicide in a planned program in Roundup Ready soybeans to allow a wider application window for Roundup or other glyphosate products. The current maximum use rate for soybean is 9-16 ounces per acre.

Extreme (Cyanamid) is a premix of Pursuit (imazethapyr) and glyphosate (Roundup Ultra) for use in Roundup Ready soybeans. This herbicide is intended for early post applications with the glyphosate providing control of existing weeds and the Pursuit providing residual weed control. The recommended use rate will be equivalent to 24 fluid ounces of Roundup and 1.44 ounces of Pursuit DG.

Glyphomax 4L and Glyphomax Plus 4L (Dow AgroSciences) are basically the same glyphosate products as Roundup and Roundup Ultra, respectively. Dow will recommend tank-mixing FirstRate with one of the Glyphomax products for use in Roundup Ready soybeans. At this time, this line of glyphosate products cannot be applied to Roundup Ready corn.

Pendimax 3.3EC (Dow AgroSciences) contains pendimethalin, the same active ingredient in Prowl. Its label and uses are very similar to that of Prowl.

Table 1. GLYPHOSATE AND GLYPHOSATE-TYPE PRODUCTS

Product	Manufacturer	Active Ingredient/ Acid Equivalent (adjuvants in formulation)	Apply to Roundup Ready Crops?

UTILIZATION OF BT CORN FOR BEEF CATTLE

Mark Antle
Department Of Agronomy
Penn State

Now that the use of Bt corn hybrids is increasing nationwide, many questions have been posed by beef producers regarding the performance of beef animals when fed diets consisting of Bt corn.

In response to some of these concerns, two trials were performed by the University of Nebraska in cooperation with Novartis Seeds. The researchers, J. D. Folmer, G. E. Erickson, C.T. Milton, T.J. Klopfstein, and J.F. Beck, wanted to determine if any animal performance differences existed between two corn varieties, N7333 and N4242, and their Bt counterparts. They also wanted to determine whether a variety difference played a role in animal performance.

The first trial utilized fields of N7333 Bt and N7333 non-Bt postharvest corn residue to evaluate daily gain and grazing preference. Twenty-three acres of Bt and 21 acres of non-Bt corn fields were each divided into 3 pastures and stocked with 8 or 9 steers per pasture in order to provide equal stocking rates.

Over a 70-day grazing period, daily gains of the steers were similar (.62 pound per day) between the Bt and non-Bt pastures. Grazing preference was evaluated by allowing 16 steers equal access to 7 acres of Bt or non-Bt corn residue. The steers showed no preference for either the Bt or non-Bt fields.

It should be pointed out that there was very little corn borer pressure in either the Bt or non-Bt fields. The published results of the trial did not provide information on stalk quality, but it could be surmised that quality was similar for both types of corn residue.

In the second trial, 128 steers (average weight 620 pounds) were fed either Bt or non-Bt corn silage from either N7333 or N4242 for 101 days. Dry matter intake averaged higher for steers fed Bt corn silage for both varieties. Daily gain was significantly higher for cattle fed N4242 Bt (3.3 pounds per day) compared to N4242 non-Bt (3.0 pounds per day), but was similar for N7333 Bt compared to N7333 non-Bt (2.9 pounds per day).

Feed efficiency was significantly higher for animals fed N7333 non-Bt compared to N7333 Bt, but similar for N4242 Bt vs. N4242 non-Bt. When comparing across the two varieties, overall the steers gained 11 percent faster and 8 percent more efficiently on N4242 compared to N7333.

Based on the results of the trial performed at the University of Nebraska, it appears that the presence of the Bt trait in corn hybrids does not have a consistent affect on performance of growing steers. The study does support the popular notion that hybrid genotype plays an important role in animal performance.

Record Ethanol Production Set; Record For Year Anticipated

Fred Stemme
Director Of Communications
Missouri Corn
Growers Association

According to the Energy Information Administration and the Renewable Fuels Association (RFA), the domestic fuel ethanol industry produced an all-time record of 106,000 barrels per day in October 1999.

The previous record of 103,000 bushels per day was set the previous October. According to RFA, the production increase was a response to new market opportunities in reformulated gasoline markets across the country, particularly in California, the start-up of new ethanol production facilities, and continued improvements in technology and production efficiencies.

"We are on the way to setting a new record for annual fuel ethanol production in 1999," said Eric Vaughn, RFA president. Production totals for 1999 through October exceed 1.22 billion gallons, and if production in November and December reflects previous years' production, the total for 1999 can be expected to exceed 1.5 billion gallons.

The two new Missouri ethanol plants, under construction by Missouri farmer-owned cooperatives, will add to this total by each producing approximately 15 million gallons of ethanol annually.

N82-J6

INNOVATION DRIVES PERFORMANCE

New N82-J6 is a 118-day, NK® Brand Bt corn hybrid with YieldGard® protection against European Corn Borer. It's another innovative solution for your farm from Novartis Seeds.

N82-J6 was the highest yielding hybrid in the summarized Maryland Corn Trials.

Call your Hoffman Seeds Dealer today or call 1-800-776-7929 to learn more about the new NK® brand hybrids from Novartis Seeds.

NK Brand®is a registered trademark of Novartis
YieldGard® is a registered trademark of Monsanto Co.

- **Excellent control of 1st & 2nd generation European Corn Borer.**
- **Exceptional top-end yield performance.**
- **Moderate protection against fall armyworm and corn earworm.**
- **Tall, leafy plant with excellent staygreen.**
- **Good drought tolerance shows in stable performance.**
- **Strong choice for full-season grain and exceptional silage characteristics for southeast and south central PA and south.**
- **Highest fiber digestibility in our full-season testing program**
